Teamwork

The landscape has changed

2x

More collaboration

People work on twice as many teams and spend 50% more time collaborating

Internal, external & remote

People need to connect and communicate across organizations, locations & time zones

Diverse workforce

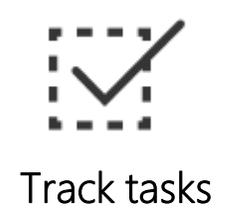

People have different expectations, preferences, skillsets and abilities

Employee engagement

Globally, employee engagement is 15%, but at the best performing companies, 70% of employees are engaged and profits are 21% higher

Persistent 1:1 & Group Chat

Enhanced Collaboration

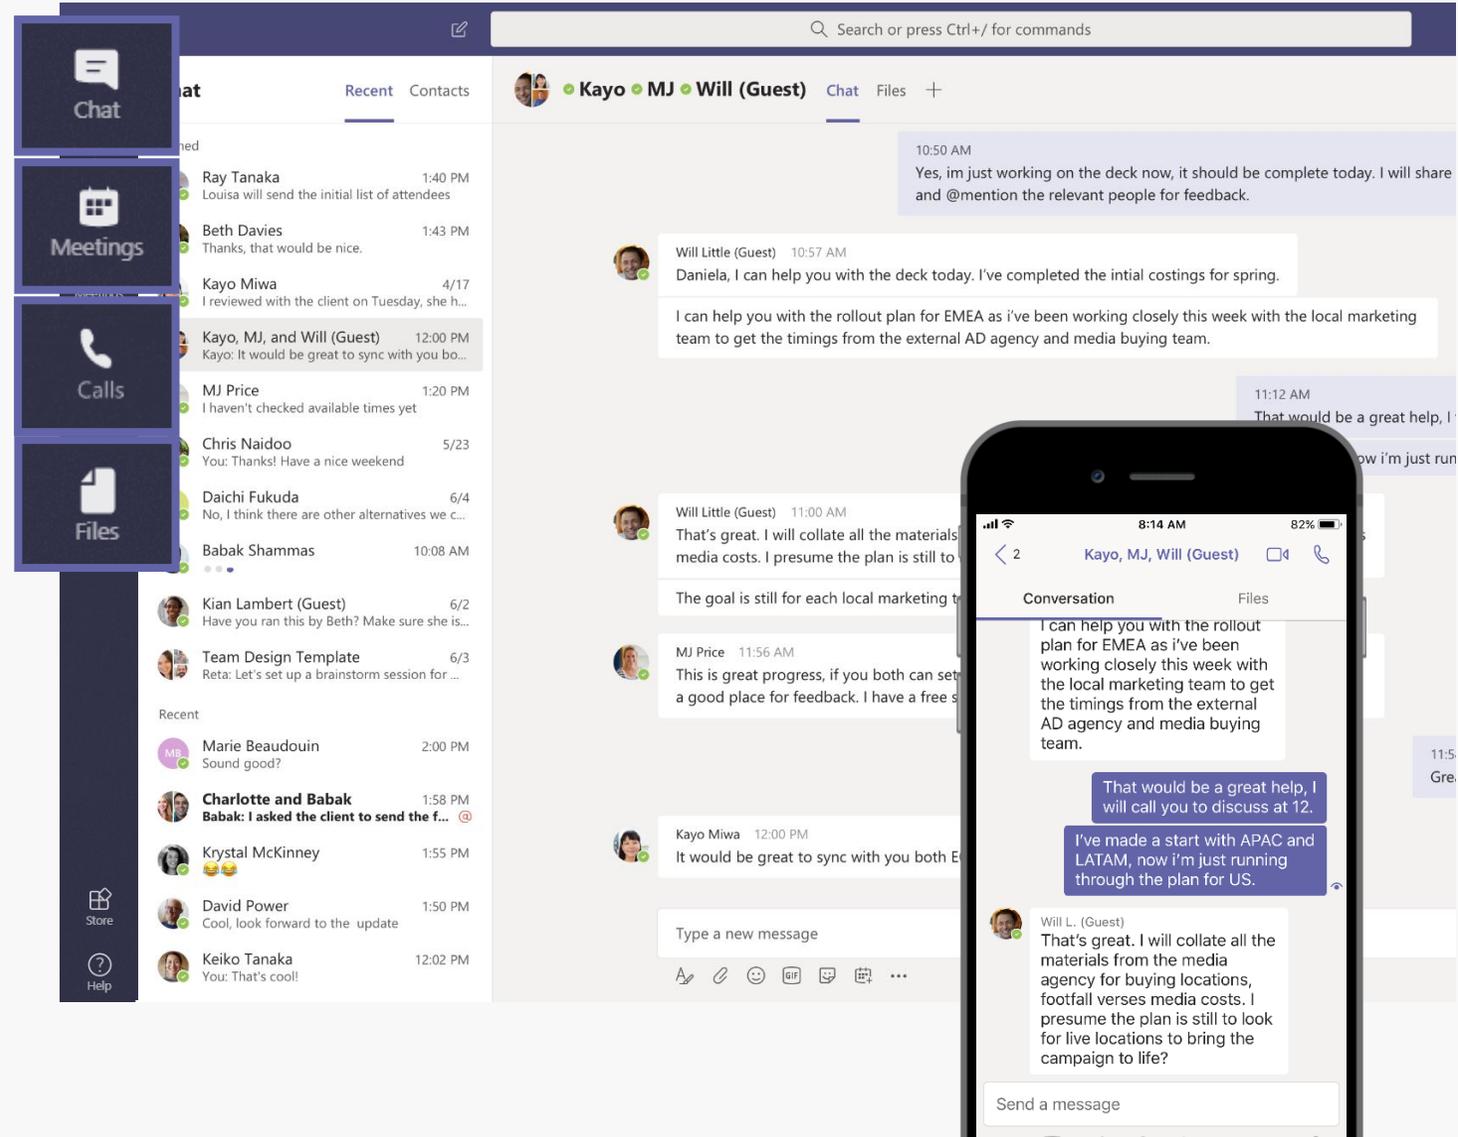

Enterprise Communications

Customize & Extend

Built with the enterprise-grade security and compliance our customers rely on

Communicate through chat

Communicate across geographies, languages and organizations

Share information in an open and transparent way with **threaded, persistent channel discussions**

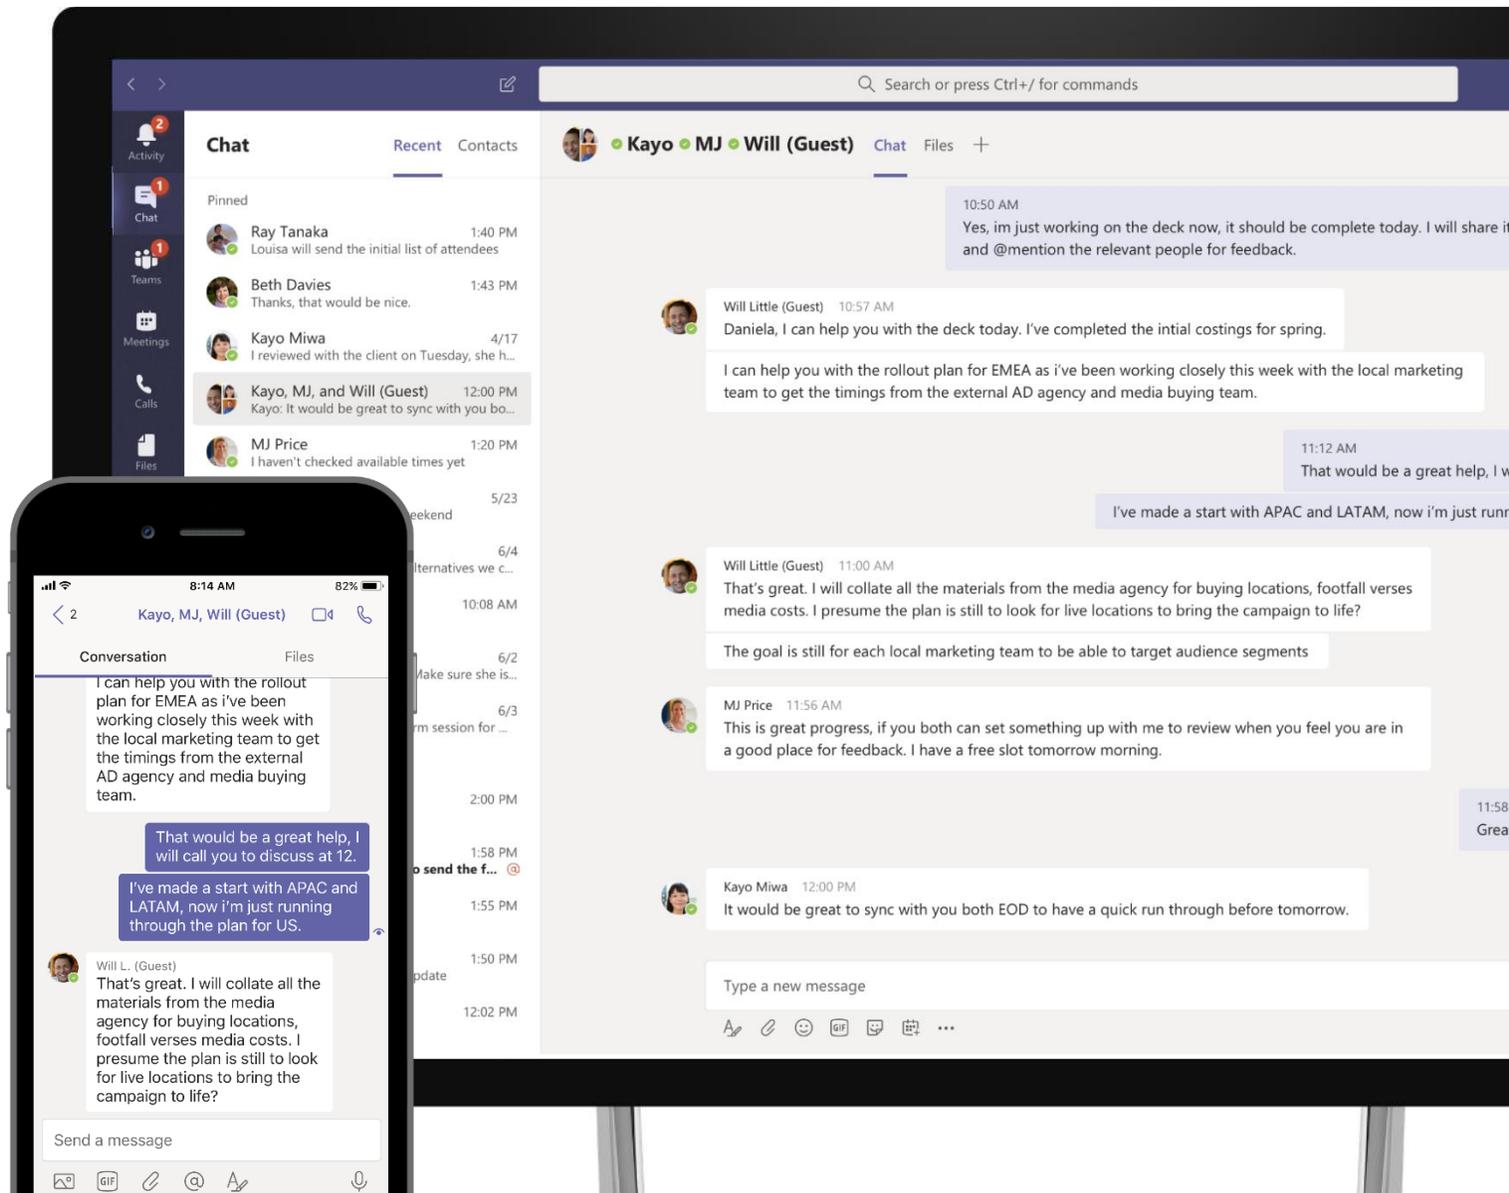

Manage private conversations with new **secure private channels**

Stay in sync with **1:1 or group chats**

Communicate across geographies, languages, and organizations with **guest access, federation, and translation**

Add some fun to your conversations with **gifs, memes, stickers & emojis**

Available across **mobile, desktop, browser**, and a wide range of devices

Communicate through meetings

Communicate from anywhere with an intelligent cloud meeting solution

Stay connected with an **intelligent meeting solution** using video, content sharing, digital whiteboard, notes and chat

Engage in **all types of meetings**—spontaneous, scheduled, external and large-scale live and on-demand events

Make meetings more effective by having meeting history and **relevant content at your fingertips**

Search through meeting content with cloud recordings and automatic **transcription and translation**

Join from a **range of platforms and devices**, including desktop, browser, mobile, and meeting room devices

Search **New Employee Onboarding > Orientation** Public No classification

The basic shape of a Team

Demo: Overview of Microsoft Teams

Teams and Channels

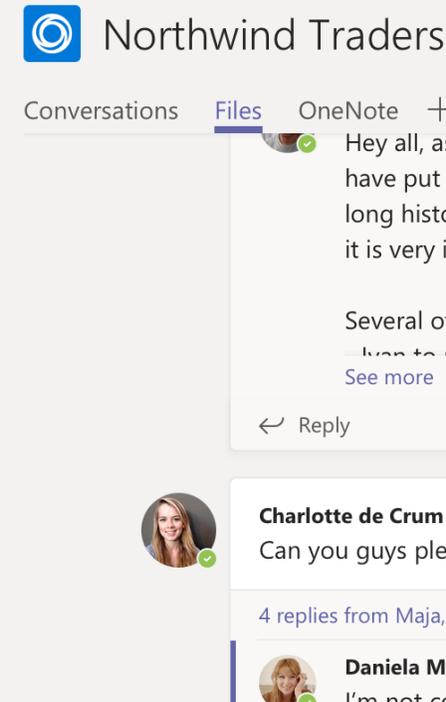

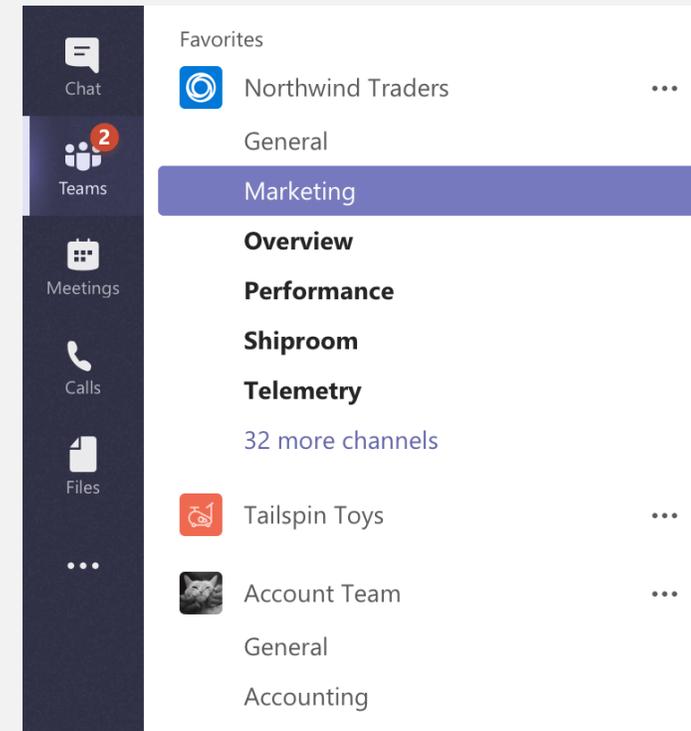

Pick a team and channel

A *team* is a collection of people, conversations, files, and tools—all in one place.

A *channel* is a discussion in a team, dedicated to a department, project, or topic.

The best way to get familiar with teams and channels is to pick a team and channel and start exploring!

1. Click **Teams**  on the left side of the app and then pick a team.
2. Select a channel and explore the **Conversations**, **Files**, and other tabs.

Chat and Share Files in Teams

Start a new conversation with the whole team

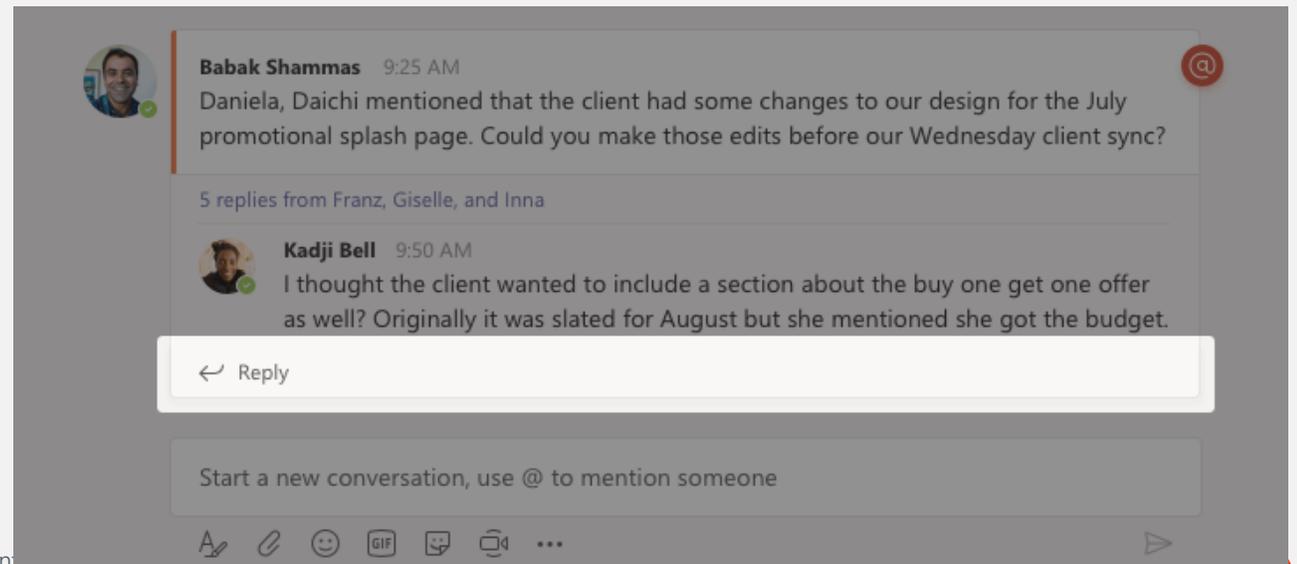

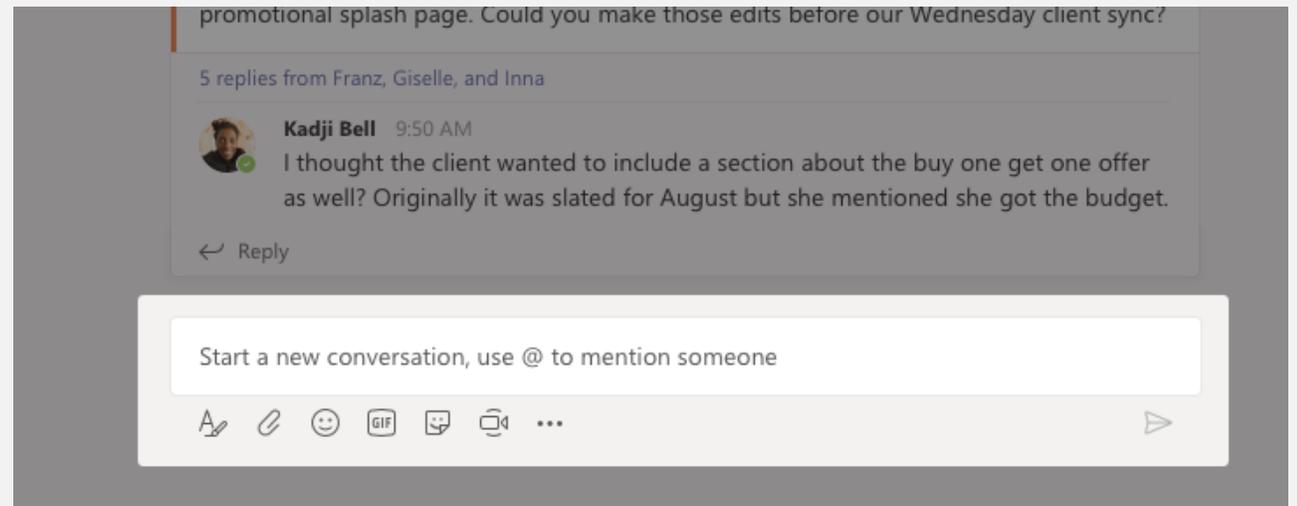

1. Click **Teams** , then pick a team and a channel.
2. In the compose box, say what's on your mind and click **Send** 

You can also have individual chats in the Chats tab.

Reply to a conversation

Channel conversations are organized by date and then threaded. The replies in threads are organized under the initial post so it's easier to follow multiple conversations.

1. Find the conversation thread you want to reply to.
2. Click **Reply**, add your message, and click **Send**

“Conversations” are at the heart of Team collaboration

- Follow/unfollow channel to be notified of all activity
- @Mention people or the Team to alert them to your message regardless of their follow status
- Only users that have favorited a channel get notified if you @Mention the Channel itself

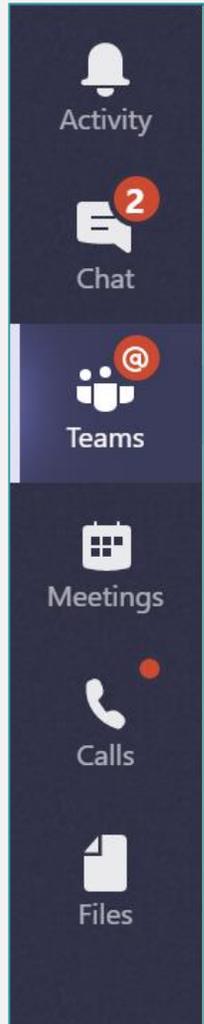

The Difference between TEAMS and CHATS

Team Conversations

- Visible to all Team members/owners
- Uploaded files go into the SharePoint folder for the Channel
- Conversation history goes into the Team mailbox for compliance needs (hidden)
- Notifications will be sent to those following the Channel + those who are @mentioned

Chats

- Visible only to those in the chat
- Uploaded files go into the OneDrive of the poster and are shared with current chat participants automatically
- Chat history goes into the participants mailboxes for compliance needs (hidden)
- Notifications will be sent to participants

Understanding the SharePoint and Teams relationship

The screenshot displays the Microsoft Teams interface for a private group named 'BGLeads'. On the left, a vertical navigation pane shows various tabs: Activity, Chat (with 2 messages), Teams, Meetings, and Calls. The main area shows a list of channels: General, BG Virtual Stand-up, BG-Dev Workshop 2018, GTM-Sales, Product Strategy, Project Tasks, SP 2019, and Technical Partnerships, followed by a link for '2 more channels'. On the right, the 'Documents' section shows a list of folders. Red arrows indicate the mapping between the channel names and the folder names in the document library.

Channel Name	Document Folder Name
General	General
BG Virtual Stand-up	BG Virtual Stand-up
BG-Dev Workshop 2018	BG-Dev Workshop May 2018 C...
GTM-Sales	GTM-Sales
Product Strategy	Product Strategy
Project Tasks	Project Tasks
SP 2019	SP 2019
Technical Partnerships	Technical Partnerships

Departmental Teamwork in Teams

The screenshot shows a Microsoft Teams chat interface. On the left is a sidebar with navigation options: Activity, Chat, Teams, Calendar, Calls, Files, AVA, and Help. The main chat area is titled 'AvePoint Marketing > General' and is marked as 'Private'. The chat history shows a message from Joanne Chang on July 31, 2019, at 9:35 PM. The message content is: "Dux Raymond Sy Michael Segner Amanda Barnes Jessica Ko I'd like to share the nurturing email campaign that AU team's working on. The purpose of the campaign is to engage with new leads moving forward, keeping them posted with our awesome content, ebooks, on-demand webinars, blogs etc. The content people are gonna receive will be based on what / if they click (see attached content schedule). Basically we have 4 streams - Migration, Management, Protection and 'No clicks' (for people who don't click anything we'll send our most popular content to capture". Below the text is a flowchart titled 'Content Schedule' which details the logic for email content delivery based on user clicks. The flowchart starts with 'Click Migration' leading to 'Management 1' through 'Management 5'. It also includes paths for 'Click Management', 'Click Back or Protection', and 'Don't open or click anything'. A note says 'Send MMR open with a different subject line'. Below the flowchart is a 'Login | Marketo' button with the URL 'app-ab04.marketo.com'. A reply from Michael Segner on 1/31 11:36 AM says: "Wow, first off *really* impressive work. What a sophisticated nurture design! Here are some thoughts, happy to discuss further:" followed by a bullet point: "• LOVE the segmented campaigns based off of clicks (or no clicks). The thing that pops out to me here is that it looks like your nurture campaign lasts across 3 months. Have you thought about extending it across a whole year (funding cycle)? You could extend it across 6 months and cast it twice." The chat input field at the bottom says "Start a new conversation. Type @ to mention someone."

Example: Global team collaboration

This screenshot shows a Microsoft Teams chat window for the 'Field Marketing' team. The left sidebar lists various channels, with 'General' selected. The main chat area shows a conversation from July 30, 2018. Martina Dingis asks for help with event assets. AnnMarie Connolly and Adeline Boror respond with suggestions and links.

Stuff for events
Hi Field Marketing!

As we have many upcoming events in autumn, I would like to get some new branded assets.
I was wondering if you can share pictures of the stuff you have in your regions? I appreciate any help 😊
I am looking to get new

- T-Shirts or Shirts for Event Staff
- Booth (a magnetic one maybe)
- Best raffle gifts

Have a great weekend all!

See less

AnnMarie Connolly 7/27 10:44 AM 2

Annie Wang when ya get a free min, pls share graphic and images for t-shirts produced at our NL Events.

Martina Dingis 7/27 10:46 AM 2

Got those from Annie Wang already 😊 thanks AnnMarie Connolly

Adeline Boror 7/30 8:32 AM 2

Hi Martina Dingis we don't do shirt or tshirt in France I did order some name badges in metal with magnetic fittings (see attached)
Regarding price draw I shared with you the 3D printer which is not expensive only 150 euros link here : https://www.gearbest.com/3d-printers-3d-printer-kits/pp_969800.html?wid=1433363

IMPORTANT!
New Webinar! 8/7: Delegating Administration
Hello everyone, we have a webinar on 8/7 at 11am EST/8 PST. We will feature **Dux**, John Peluso and **Hunter** for "Tailoring Microsoft Teams & Delegating Administration in Office 365"

[Landing Page](#)
[Graphics Page](#)

Can the following that are tagged please help with distribution/promotion?

- **Megan** for organic and paid social efforts
- **Sarah, Katie and Skylar** for connecting to sales
- **Brent** for CTA on anything around Office 365 compliance or anything else you can think of?
- **Chandler** and **Mikayla** can we incorporate this into our newsletter or any other customer comms?

Please note that the social media graphics have been updated and should be visible when you share out the link
Please let me know if there is anything you need!

FYI: **Michael, Chisa, Joanne, Martina, AnnMarie, Oscar Jessica, Annie, Isabelle**

Document Collaboration via Email

Document Co-Authoring in Teams

The screenshot displays a Microsoft Teams interface. On the left is a navigation sidebar with icons for Activity, Chat, Teams, Calendar, Calls, Files, AWA, and Help. The main window shows a document titled "Citizen Services 1.3.1 Product Update Blog.docx" with the following content:

Citizen Services 1.3.1

Citizen Services 1.3.1 represents a number of high-value features that expand the capabilities and enhance the flexibility of the platform. The release is about helping customers dial in those specific, granular settings that speak to their unique business processes.

Smart Forms

One of the features customers love about Citizen Services is the "WYSIWYG" form editor. Even users with no technical skills are able to design and create forms that their constituents use to submit service requests. Well, those forms have just gotten smarter in two important ways!

- Conditional Logic to Show/Hide fields**

Conditional logic can be added to the form so that certain fields on the form will only appear if specific conditions are met. For example, a form for reporting abandoned vehicles may have a field to indicate whether the car has a license plate. If the user selects "yes", a new field can appear where the user can enter the license plate number, and conversely, that field will disappear if the user selects "no."

Figure 1: Show or hide fields based on other form selections.

This capability makes for much more usable forms by hiding irrelevant fields, and opens opportunities for previously unsupported use cases.
- Cascading Dropdowns**

In many situations, it's useful for drop-down fields to be related to each other. For example, for a form requesting maintenance in an office, there may be a drop-down list to select which floor the office is on and another drop-down to select the room number. A cascading drop-down would allow you to configure the form so that only the relevant room numbers are loaded in the second drop-down once the floor is selected in the first drop-down.

Figure 2: Configure cascading dropdown lists.

Not only is this a useful capability in general, but specifically, it makes it easier to configure Citizen Services for use cases like building maintenance.

Export Service Request Data to CSV

On the right, a chat window is open with the following messages:

- Vanessa Molnar 11/1/17 12:16 PM: Well done Paul Olenick on the animated GIFs!!
- Vanessa ... 11/1/17 1:19 PM: Looping in Mary Zubrisky to review/edit this CS 1.3.1 product release blog
- Vanessa Molnar 11/3/17 2:34 PM: Looping you lovely ladies in re: the animated GIF's that need to be added to Paul's CS 1.3.1 product update blog Mary
- Evelyn Zh... 11/7/17 5:00 AM: Hello Vanessa , Here comes the blog: <https://www.avepoint.com/product/avepoint-blog/citizen-services-1-3-1/> . Also, the CS 1.3.1 release has been
- Vanessa Molnar 11/7/17 7:40 AM: Fantastic; thanks Evelyn!!

Helping email addicts adjust to Teams...

Your email...

- Forces YOU to separate your inbound communication
- Requires YOU to configure complex rules to ensure relevant information is surfaced and noise is reduced
- Notifies you on ALL new messages
- EVERY message goes into a recipient's mailbox

A team...

- AUTOMATICALLY separates your inbound communication into Channels
- Let's you TUNE IN to what you care about and tune out what you don't
- Notifies you only for messages you EXPLICITLY care about
- @mentions allow you to poke recipients only when relevant

And IT organizations benefit as well...

Email-focused approach

- Difficult to get users to store files where they belong
- Storage burden of duplicate attachments
- Data governance and security spread across multiple systems
- Burden of creating and managing distribution lists

Modern collab with Teams

- Files seamlessly routed in normal conversation flow
- File access from threaded conversation, pin important files to channel tabs
- O365 platform retention and security features have you covered
- Self-service approach *can* improve agility and admin efficiency when done right

Three ways to access your Teams

You can access Teams in three ways:

From the browser:

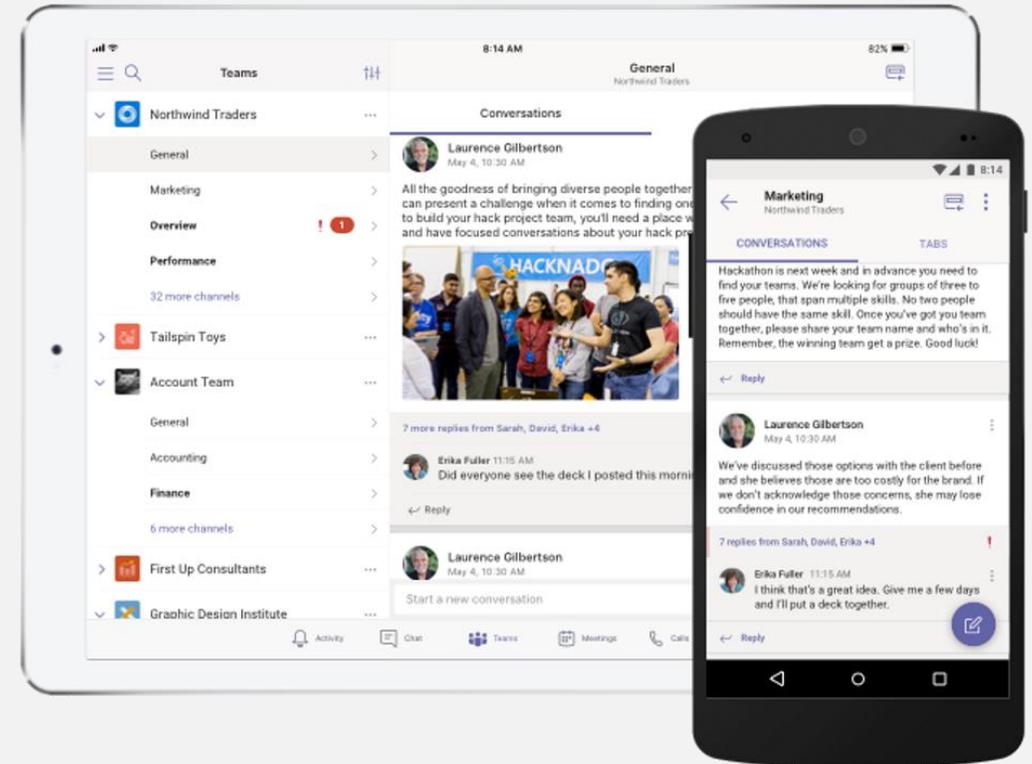

Launch the Teams app tile from the launcher (waffle)

From your desktop:

Using the Teams app client from Microsoft Office

From your mobile device:

Using the Teams mobile app

External Access

Anyone with an Azure Active Directory (AAD) account can be added as a guest in Teams.

Guests ...

Can have any email account (Work accounts e.g. Office 365)

Accounts are added and securely managed within Azure AD through Azure AD B2B Collaboration

IT admins can quickly and easily view, add, or revoke a guest's access to the host tenant

Are included as part of your Office 365 subscription at no additional cost

Are subject to Azure AD & Office 365 service limits

Guest Access Capabilities

my sales team creates
proposals more easily, giving
them more time to close deals

AVA: Restore Deleted Emails + Files

Give users a place to look for lost content:

- Filenames that can't be found
- Documents modified recently
- Broken URLs to documents and files
- Lost e-mails that can't be searched in Exchange / Outlook

Highlight quick-wins to limit support calls:

- Identify version history, first and second level recycle bins, soft-deleted content
- Identify recent data in AvePoint's backup data sets
- Fully security-trimmed to each user

Enable Business Solutions

Teams for different departments

Tax Assessor

Keep the team up to date on assessment rulings.

Rima's Top Reasons Teams Deployments Succeed in Government

- ✓ The agency's mission was tied to the need/use of Teams
- ✓ All end users were licensed on Pilot Day 1 (with phased release of client)
- ✓ The Pilot included users that worked together on a daily basis
- ✓ Adoption activities aligned to each part of IT's project plan
- ✓ Used an Onboarding/O365 Learning Team with rolling admissions to help build a community
- ✓ Team creation was open to everyone in the org
- ✓ Training was performed out of their environment (not commercial), made interactive

Examples: A Day in the Life

Microsoft

Leadership Connection Week in the life of an employee

Monday 9:00 AM Start the week by scanning the "Leadership Connection" group in the Yammer network. Get to know key initiatives, challenges, and opportunities across the organization. Like a few posts that resonate.

11:00 AM Respond to a question posted by the CEO on opportunities to increase customer satisfaction. Provide example of an initiative that worked at a local subsidiary.

Tuesday 8:00 PM Post a question on Yammer regarding a new HR policy for extended maternity leave and ask leadership's thoughts on including new fathers.

Wednesday 10:00 AM Learn about key takeaways from leadership meeting and direction for the company. Provide feedback on positive and negative impact of similar initiatives in the past.

2:00 PM Search "Leadership Connection" group in the Yammer networks to locate where employees are volunteering to help with various hurricane relief efforts. Look up #dayofservice and use this information for a presentation about positive impact employees can have on society.

Thursday 1:30 PM Participate on a live broadcast of the employee townhall on Yammer. Ask questions on live Yammer feed and participate in the discussion.

4:00 PM Respond to employee townhall poll on Yammer. Ask questions on the new operating model. Share to "Operation Quality Champs" Yammer group.

Friday 5:00 PM Accept invitation to join the virtual team of employees focused on the customer satisfaction initiative.

Microsoft Teams

Day in the life – Healthcare

Meet Dr. Thomas, an Oncologist at Contoso Health who uses Microsoft Teams to closely collaborate with his medical team to deliver better and more personalized care for his patients.

7:45 AM While commuting to work, Thomas gets a notification on his Teams mobile app. A nurse has posted a message on Contoso's "Oncology Department" Teams "General" channel, asking him to review their patient's x-ray results.

8:30 AM In his office, Dr. Thomas navigates to his patient's x-ray file and uses the "Start Conversation" feature and @ mentions the Radiologist requesting additional data about the results.

9:30 AM Reviews his patient's channel for updates and conversations. Confirms his 11:30 AM meeting with his team and @ mentions a nurse to call his patient and let her know they'll have x-ray results later in the day.

11:30 AM Joins the meeting on Teams to discuss patient updates with his Radiologist and Nurse.

12:30 PM After his meeting, Dr. Thomas gets additional information from the Power BI dashboard and post-meeting conversations in Teams. He messages his Radiologist with questions and to confirm results.

2:00 PM He responds to an @ mentioned conversation via Teams agreeing with his medical team's assessment on his patient. Follows up with a call to his patient to report that her x-rays came back negative.

3:00 PM Dr. Thomas' and team meet to get the most up-to-date status on all the patients under their care. He shares concerns about current wait times and identifies any quality of care issues using the Power BI dashboard to visualize trends. The team organizes their ideas and plans for next steps using the Planner tab on their "Oncology Department" Teams site.

5:00 PM Before his shift is complete, he assigns new tasks on any outstanding concerns for his patients to his colleagues for the upcoming shift through @ mentions in the conversation tab.

Get Started with Teams today! **Microsoft**

Microsoft Teams

Day in the life – IT Project Manager

Jamal is an IT project manager with Contoso Technologies and is responsible for making sure IT projects are meeting stakeholder needs, and delivered on time and within budget.

7:45 AM Jamal uses his Teams mobile app to get up to speed the activity feed as he travels to work and joins the daily stand up call remotely.

8:30 AM At the office, he navigates to the Visual Studio Online dashboard tab in Teams. Jamal reviews his projects and notes a few trends that are concerning.

9:30 AM On Teams he asks for additional data points related to projects risks and @ mentions specific individuals to get their attention.

11:30 AM Jamal joins a project review meeting in Teams, shares his screen, and navigates to the Planner tab to review key activities by owner and adjusts due dates.

2:00 PM He prepares his meeting notes and replays the Teams cloud based meeting recording for things that he may have missed. He @mentions the channel with updates and action items in Planner.

3:30 PM Jamal gets notified in Teams of a new bug that was posted in the channel from the Visual Studio Online connector. He @ mentions experts to help to resolve in time for their release date.

4:30 PM In Teams he goes to the Financial app tab to update current resource costs for several of his projects.

6:00 PM Jamal receives another notification from Visual Studio Online notifying him that the bug is being resolved. He prepares for his weekly status report and posts it into the PMO Teams site @mentioning the team.

Get started with Teams today! **Microsoft**

Not sure how to begin?

To help identify business scenarios, consider using the framework below

Practical Teams Strategies

Deploy Change Management Solutions

- Effective Change Management (CM) strategies require teamwork and communication to build successful campaign launches.
- Documentation can be stored and easily updated within contextual channels; it should be accessible to all team members, both internally and externally.
- Tasks and work items can be tracked with Planner, utilizing in-channel discussions and notifications to ensure delivery of a successful strategy.
- Create easier ways for teams to collaborate on your next project with dedicated channels in Microsoft Teams. Use one channel for research or messaging pillars and another to start your strategic plan.

Manage Event Staff

- Channels and Connectors, like the Facebook connector, show notifications from pages you own or follow. Members can start conversations about the content coming in.
- As actions and work become required, delegate tasks and track completion by adding Planner – use the tab to streamline contextual access!
- Use @mentions to coordinate your content and event planning to include approvals and more.
- Store content, tools and promotion materials in Teams.
- Streamline reviews and approvals of your content and event plan by managing it in Teams.

Microsoft Teams for Firstline Workers

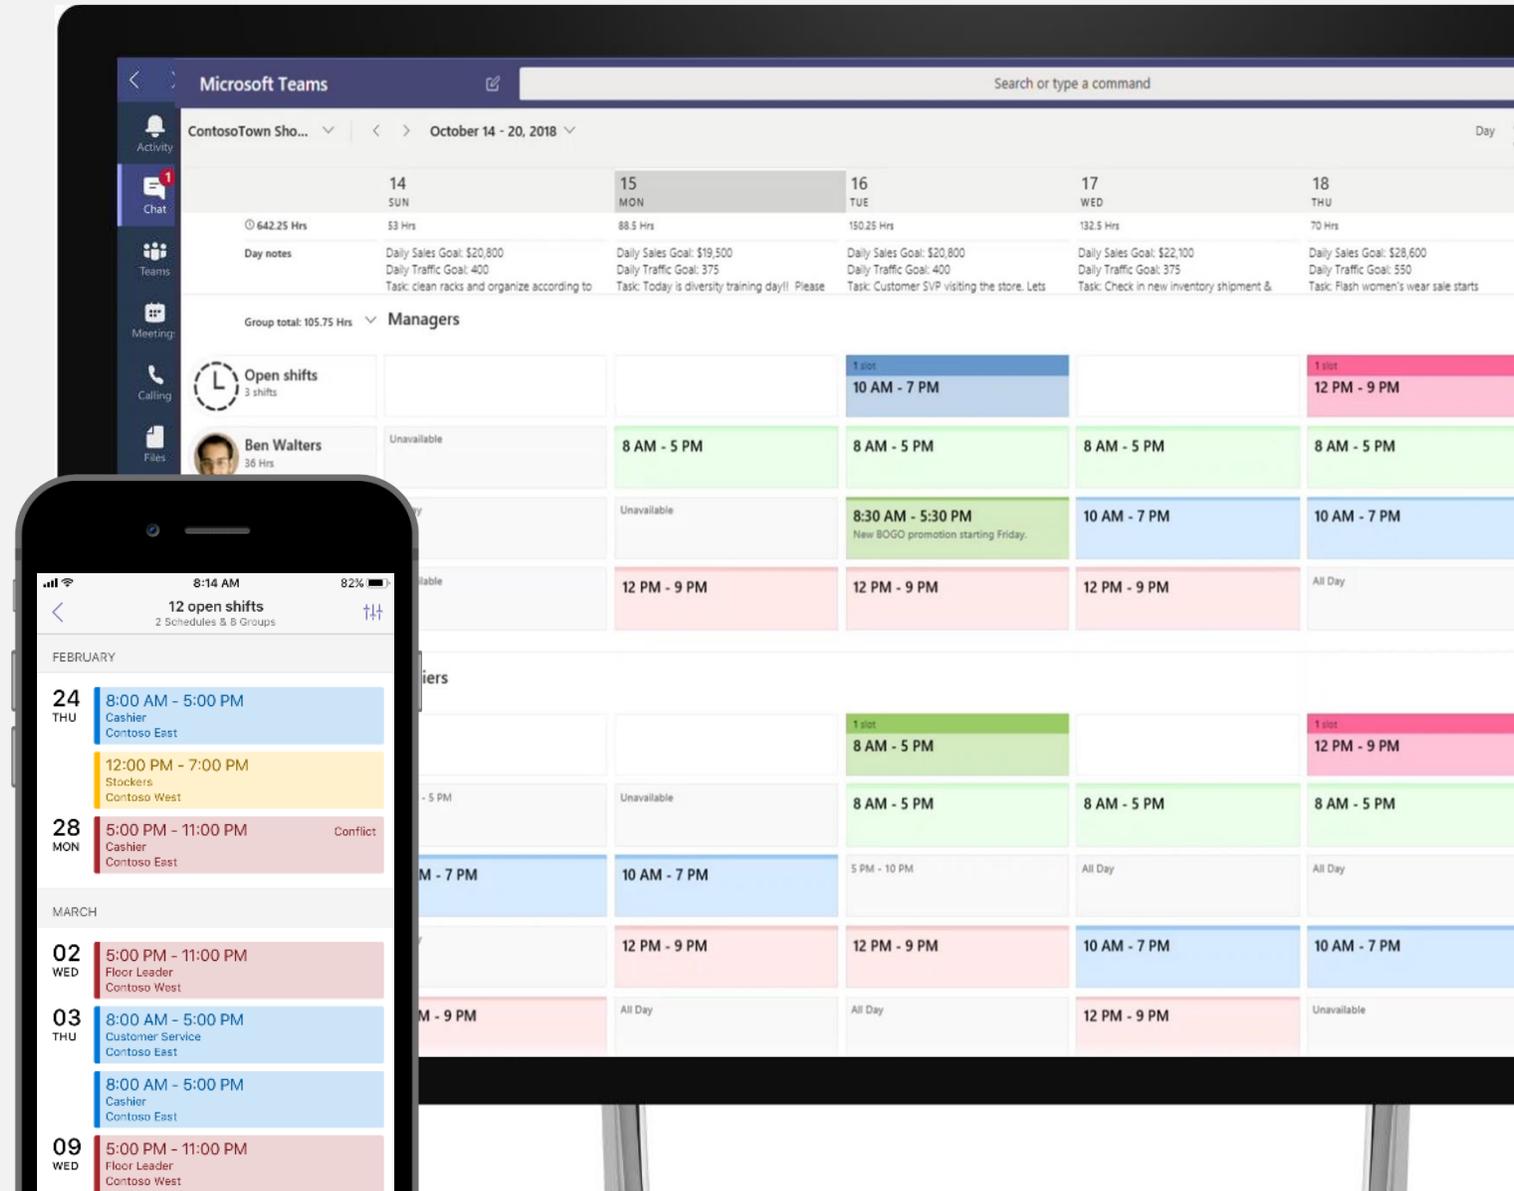

Empower Firstline Workers with tools to succeed

With Shifts, **Firstline managers** will be able to:

- Plan schedules for teams from the desktop and web apps
- Broadcast open and unfilled shifts
- Accept or deny time off, or shift changes from the mobile app

With Shifts, **Firstline team members** will be able to:

- Review requests and open shift information from their mobile app
- Request time off, shift swaps or offer shifts from the mobile app
- Set their availability for the day or specific hours

Update Firstline Workers with Policies

- Onboarding new employees and keeping your Firstline Workers updated on the latest company news, safety procedures, and best practices can be challenging when people are spread across locations and policies change frequently. You need an easy way to make the latest news and policies accessible to employees and incorporate new information when necessary.
- Make sure your employees have the latest company safety procedures and policies with Microsoft Teams. Store handbooks, training materials, safety procedures, and other resources in the Files tab so workers can access them anytime. When you add a new employee, they can instantly access the information they need from any device.
- Use @general mentions to let your entire team know when new or updated procedures, product specs, or sales reports are available. Use chat to answer any questions they have or to provide additional context.
- You can also do trainings with live events and answer employees' questions in real time. Employees can also work together in Teams to share best practices, ask questions, and get feedback instantly.
- Make training materials easily accessible to all employees.
- Communicate new procedures instantly.
- Create interactive trainings so employees can ask questions and share best practices.

Effectively Onboard New Employees

- Successful new-hire onboarding is critical to engagement and retention, but it can be challenging when the right processes aren't in place.
- You need an easy way to make resources, documents, and trainings accessible, and connect new employees with their team and the broader organization for support.
- Create a channel dedicated to new hires to ensure new employees get the information, support, and training they need.
- Host trainings with live events and answer questions in real time and address any follow-up questions via chat. Save training videos, documents, and other information in the Files tab so new hires have all the information they need all in one place.

Simplify Budget Management

- Managing large budgets and getting multiple sign-offs can take a lot of time and energy.
- Simplify the process by bringing your budget planning and management teams together in a common workspace with the apps and files you use every day.
- Store files like templates and historical budget documents in your Microsoft Teams channel for easy access and standardization.
- Share important updates and track departmental needs, commitments, and budget releases in the same channel to ensure clarity across the team.

Make it Easy to Do the Right Thing

Search

Why Microsoft Teams Will Soon Be Just as Common as Outlook

Published: 18 June 2018 ID: G00348503

Analyst(s): Larry Cannell | Mark Cortner

Summary

Microsoft Teams is playing an increasingly unifying and expanding role in Office 365. This report guides technical professionals on getting the most value out of Teams, analyzes Teams' impact on the rest of Office 365, and assesses Teams' strengths and weaknesses.

Table of Contents

Analysis

Microsoft Teams From an End-User Perspective

Channels Are the Heart of Group Collaboration in Microsoft Teams

Peer-to-Peer Chat Provides Simple Messaging and Sharing

Teams Also Provides Personal Productivity Features

How Teams Impacts Other Office 365 Products and Services

Membership: Teams and Office 365 Groups

Messaging: Teams, Yammer, Skype for Business and Outlook

Content Collaboration: Teams, Office 365 ProPlus, OneDrive for Business and SharePoint

Why Gartner

Gartner delivers the technology-related insight you need to make the right decisions, every day.

[Find out more](#)

By default, anyone can create an Office 365 group. Therefore, anyone can create a team in Microsoft Teams. However, history has shown that allowing this privilege to go ungoverned can result in users creating workspaces on impulse. Such workspaces often become abandoned, because their creators fail to promote them. Ultimately, people wonder why the workplaces were created in the first place. For example, you may recall the early days of SharePoint Server. Some enterprises saw the creation of hundreds, perhaps thousands, of sites, with little thought given to why those sites were needed.

https://www.gartner.com/doc/3879669

Why Governance is Critical to Adoption

Setting the right rules up-front makes it easy and reduces resistance

Strategy Alignment

- **Why:** Understand the broader business objectives and success criteria for information management
- **How:** Review and align with the organisations long term vision and existing frameworks

Business Information Architecture

- **Why:** Understand the information landscape focusing on the information processes of an organisation, how information is captured, distributed and used
- **How:** Define the Information landscape and the architectural aids, structures and repositories to help connect information needs with information resources.

Governance

- **Why:** Assess the people, process and technology dependencies and requirements for the various information domains and processes of the organisation
- **How:** Assign supporting roles, develop supporting communication and education activities, the ongoing governance and sustainable practices for both IT and the business

Communications & Change Management

- **Why:** Open and consistent communications ensures end users not only know what changes are coming but understand the value they get and are willing to learn how to best take advantage of the new tech
- **How:** Document success criteria and goals in practical terms, align with organizational cultural change activities, develop train-the-trainer materials for scalable communications

Self-Service
Enablement

Empower business users and increase use of existing Office 365 services.

Balanced Controls

Promote sustainable adoption with appropriate controls in place.

Efficiency Through
Automation

Create repeatable and consistent service delivery.

Ongoing Governance

Streamline security reviews and maintain inventory of collaboration spaces.

Managed Disposition

Eliminate sprawl and reduce clutter while maintaining compliance.

What Do I Need to Govern?

For collaborative workspaces, customers want to govern:

How are Teams requested, approved and created

Provisioning

How are availability, compliance and changes over time are managed

Management

How do I retain/expire/dispose of Teams as appropriate

Lifecycle

Consideration

How Teams are
Born

- Sprawl
- Duplication
- Appropriateness
- Convention
- Cataloging

Microsoft native tooling to help govern Teams provisioning...

Restricting self-service creation

Can restrict creation to select group of users

Set group visibility

Options for public/private, hidden membership/group

“Classification”

Set one “classification” per group and have it displayed on Group page

Usage Guidelines

Link to acceptable use policy etc.

Dynamic Membership

Set group membership by AAD attribute

Naming rules

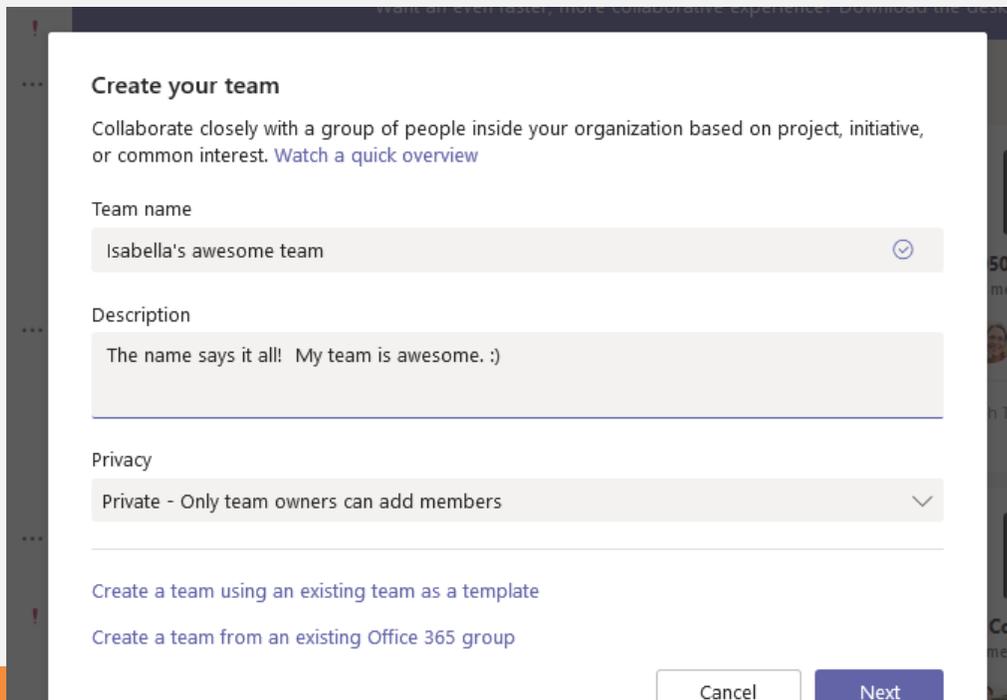

Prefix/Suffix, blocked words

Two approaches to onboarding

- Organic onboarding – driven by your users
- IT-driven onboarding – driven by pre-identified business requirements

There is space for both approaches in many organizations

Create your team

Collaborate closely with a group of people inside your organization based on project, initiative, or common interest. [Watch a quick overview](#)

Team name
Isabella's awesome team

```

IT-driven onboarding

- With or without self-service group creation enabled
- PowerShell cmdlets in the Microsoft Teams PowerShell Module for automating team creation and settings:
 - Create team
 - Update settings
 - Update channels
 - Add/remove members
 - Rolling out templated team creation via API

When considering native self-service...

You should be thinking about:

Impact on user experience and business agility

Desire/need to mandate options and settings

What can/can't be adjusted afterwards

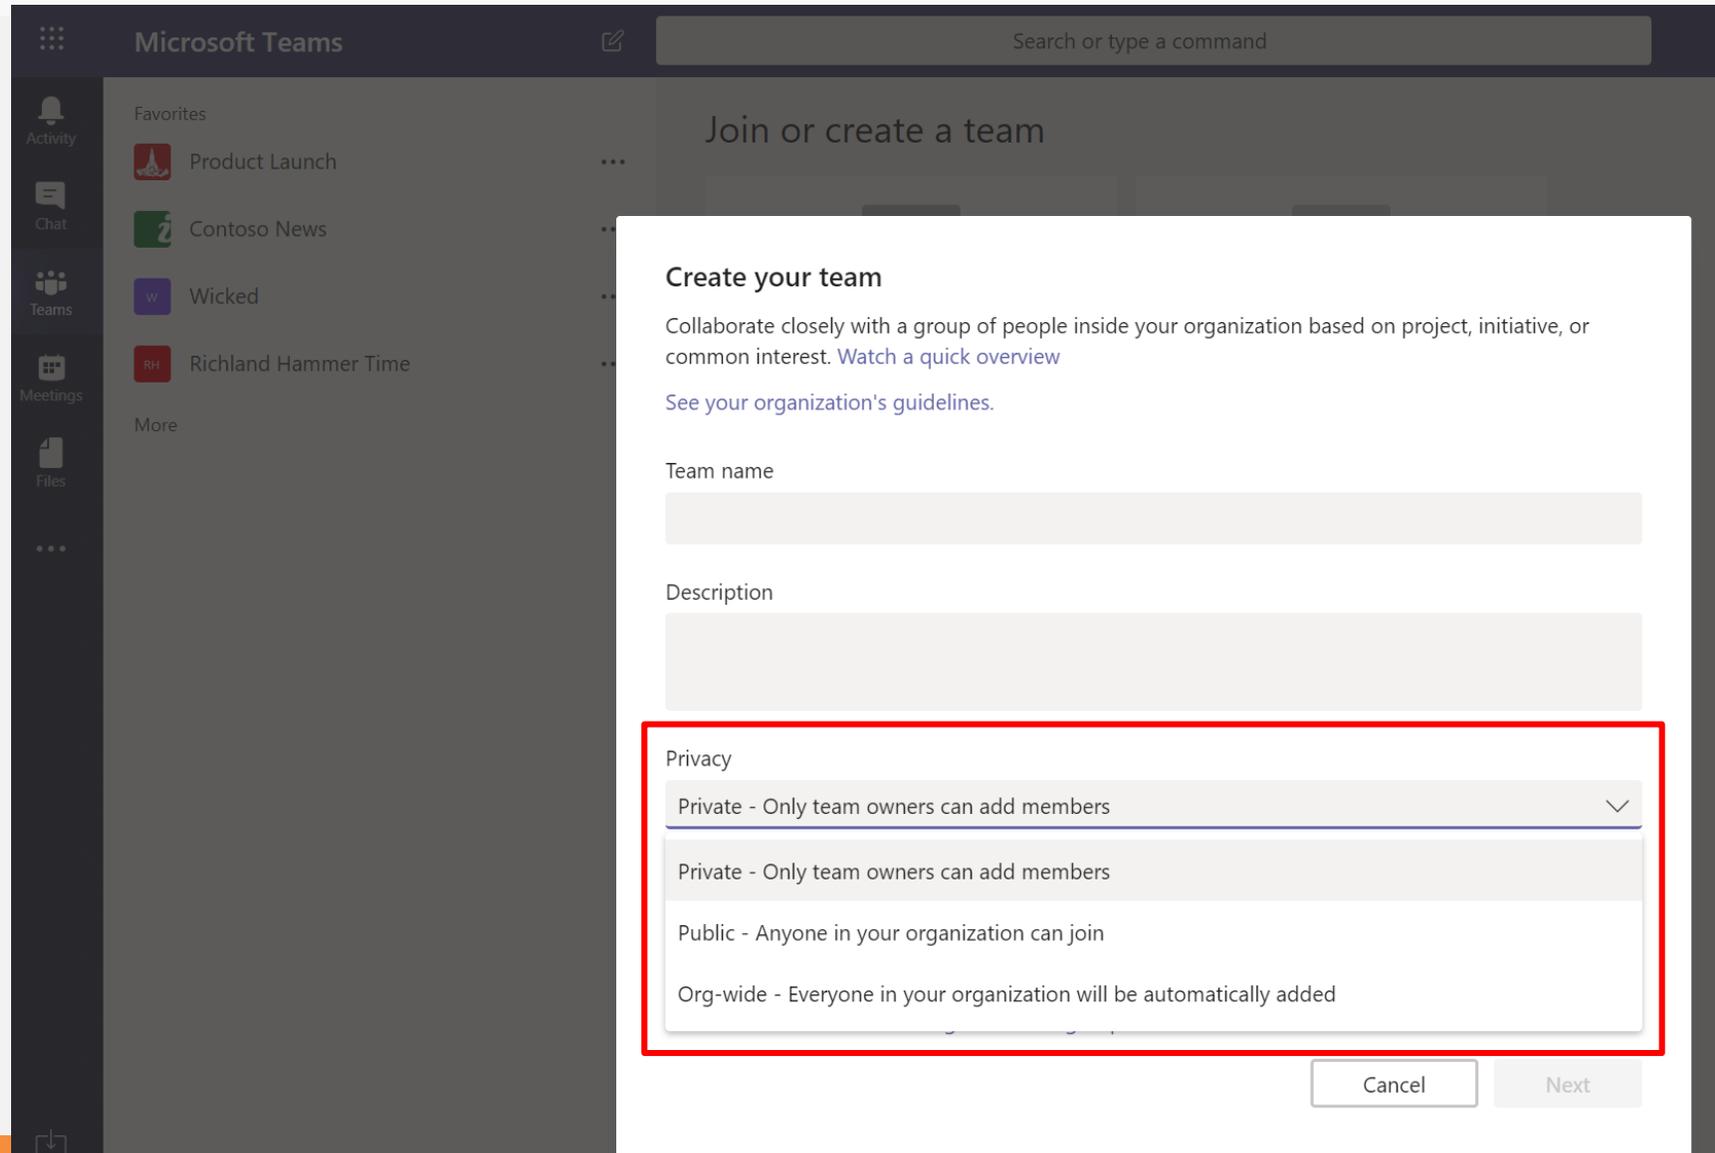

Classification and Privacy...

The screenshot displays the Microsoft Teams interface. On the left is a navigation pane with sections for Activity, Chat, Teams, Meetings, and Files. The 'Teams' section is expanded to show a list of teams, including 'Richland Hammer Time'. The main area shows the 'General' channel of this team. At the top right of the channel header, there are two buttons: 'Private' and 'Toxic', which are highlighted with a red rectangular box. Below the header are buttons for 'Add more people', 'Create more channels', and 'Open'. The chat history shows three messages from 'MOD Administrator' dated 10/24. The first message says 'Tab conversation has begun.' and includes a 'Task Plan' tab. The second message says 'Hey @Adele Hello'. The third message says 'This doc needs attention' and includes a document attachment named 'Project tracker1.ods'. At the bottom, there is a text input field with the placeholder 'Start a new conversation. Type @ to mention someone.' and a set of icons for adding content like text, links, emojis, GIFs, and video.

Private or Public- What's the impact?

The screenshot shows the Microsoft Teams interface with a 'Create your team' dialog box open. The dialog box contains the following text and fields:

Create your team

Collaborate closely with a group of people inside your organization based on project, initiative, or common interest. [Watch a quick overview](#)

[See your organization's guidelines.](#)

Team name

Description

Privacy

- Private - Only team owners can add members
- Private - Only team owners can add members
- Public - Anyone in your organization can join
- Org-wide - Everyone in your organization will be automatically added

Buttons: Cancel, Next

The 'Privacy' dropdown menu is highlighted with a red box, showing the selected option 'Private - Only team owners can add members' and the other available options.

Understanding "Public" content visibility

The image shows a Microsoft Teams interface. On the left is a navigation pane with icons for Activity, Chat, Teams, Meetings, Files, and Get app. The main area displays a group chat for 'Contoso News > General'. A red box highlights the 'Public' visibility setting in the top right corner of the chat header. Below the chat, an 'Office 365' taskbar is visible. In the foreground, a 'People and Groups' window is open, showing the 'Contoso News Members' list. A red arrow points from the 'Public' box in the chat to the 'Contoso News' entry in the member list. The member list includes 'Contoso News Members', 'Contoso News Visitors', and 'Contoso News Owners'. The 'Contoso News' entry has a checkbox that is checked, and the 'Everyone except external users' entry has a checkbox that is unchecked. The 'Settings' dropdown menu is open, showing 'New', 'Actions', and 'Settings' options. The 'View: Detail View' dropdown is also visible.

Group "Classification"

The screenshot shows the Microsoft Teams interface with a 'Join or create a team' dialog box open. The dialog box has a dark header with the text 'Join or create a team'. Below the header, there is a section titled 'Create your team' with a brief description and a link to 'Watch a quick overview'. The main form area contains several fields: 'Team name', 'Description', 'Privacy' (set to 'Private - Only team owners can add members'), and 'Classification' (set to 'Pretty Safe'). The 'Classification' dropdown menu is open, showing four options: 'Pretty Safe - You know like iffy but still safe', 'WickedlyPrivate - Probably don't show anyone', and 'Toxic - Don't you DARE!'. A red box highlights the 'Classification' dropdown menu. The background shows the Microsoft Teams sidebar with 'Favorites' including 'Product Launch', 'Contoso News', 'Wicked', and 'Richland Hammer Time'. The bottom right corner of the dialog box has 'Cancel' and 'Next' buttons.

Create a team from an existing Office 365 group

Cancel Next

Understanding Classification- *Today*

Can be applied to Sites and Groups

Set at "container" level where Labels are at item level for docs and emails

Currently requires application via PowerShell

PowerShell used by an admin to create and apply classifications

Can be selected by user if self-service site collection provisioning is enabled in SharePoint

Microsoft signaling same for O365 Groups in future

Does not drive any action currently

Currently no impact on retention or expiration

Classifying SharePoint sites and Groups- Soon

The screenshot shows the SharePoint 'Create site' wizard. The main content area displays a team site design with the heading 'Get a team site connected to Office 365 Groups'. Below this, it says 'Use this design to collaborate with your team. Share documents, track events in a shared calendar, and manage project tasks.' There is an image of a desktop and mobile view of the site design.

On the right, the configuration panel includes the following fields:

- Site name:** Contoso Merges and Acquisition. Status: *The site name is available.*
- Group email address:** ContosoMergesandAcquisition. Status: *The group alias is available.*
- Site address:** https://mippreviewtenant26.sharepoint.com/sites/ContosoMergesan...
- Site description:** Tell people the purpose of this site.
- Sensitivity:** Confidential (highlighted with a yellow box).
- Privacy settings:** Private - only members can access this site.

At the bottom of the configuration panel are 'Next' and 'Cancel' buttons.

Other *Policy Driven*
Management Controls?

Using the native “naming policy” for Teams and Groups...

Set the naming policy and custom blocked words

1. Now you can set the prefixes and suffixes. Run the following commands in Azure AD PowerShell:

```
$Setting["PrefixSuffixNamingRequirement"] = "Grp_[Department]_[GroupName]_[Country]"
```

2. Now set the custom blocked words that you want to restrict by typing below. Add your own custom words that you want:

```
$Setting["CustomBlockedWordsList"]="Payroll,CEO,HR"
```

3. Save the settings for the new policy to be effective by typing:

```
Set-AzureADDirectorySetting -Id (Get-AzureADDirectorySetting | where -Property "Group.Unified" -EQ).id -DirectorySetting $Setting
```

Create your team

Collaborate closely with a group of people inside your organization based on project, initiative, or common interest. [Here's a helpful video](#)

Description

Privacy

Private - Only team owners can add members ▼

Limited Prefix/Suffix options

- Fixed text
- AAD properties of the requestor
- Dept, Company, Office, State/Province, Country/Region, Title

Requires *clean* AAD

- AAD properties must be current and complete

“Blocked” words

- MSFT list
- “Custom list”

Other Options for
Naming Policies?

Using the native "Dynamic Membership" for Teams and Groups...

The screenshot shows the Azure Active Directory admin center interface. On the left, the 'Group' configuration pane is visible with the following settings:

- Group type: Office 365
- Group name: My Cool Dynamic Group
- Group description: Enter a description for the group
- Membership type: Dynamic User
- Dynamic user members: Add dynamic query

The main pane shows the 'Dynamic membership rules' configuration for the selected group. It includes the following fields:

- Add dynamic membership rule: Simple rule (selected), Advanced rule
- Add users where: department
- Equals
- Cool People

Based on AAD Attributes

- AAD properties drive membership
- Not based on Security Group Membership

Requires *clean* AAD

- AAD properties must be current and complete

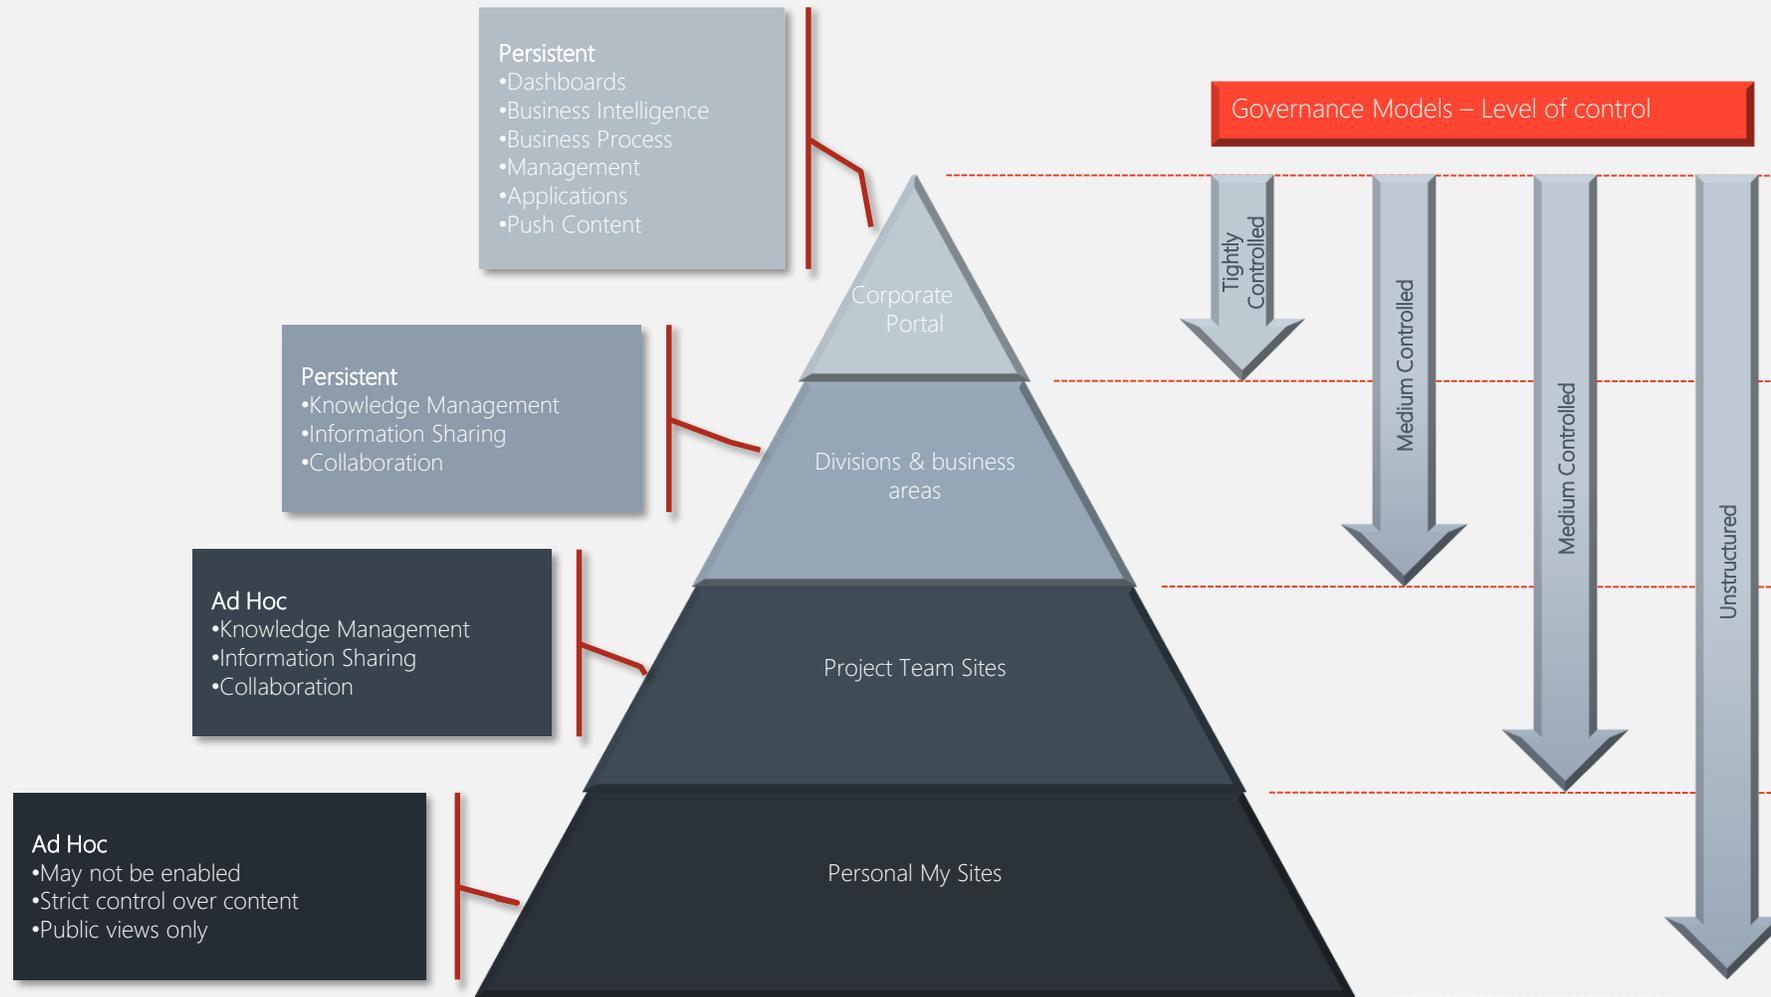

This close-up screenshot shows the 'Advanced rule' configuration pane. It includes the following fields:

- Add dynamic membership rule: Simple rule, Advanced rule (selected)
- Advanced rule: (user.department -eq "Cool People")

Different Strategies for Different Information

EXAMPLE

DEPARTMENT

DEPARTMENT

DEPARTMENT

	DEPARTMENT A	DEPARTMENT B	DEPARTMENT C
EXTERNAL SHARING	No external sharing 	External sharing allowed in: 	External sharing only allowed in:
EXPIRATION/RETENTION	6 Months after last accessed	12 Months after last accessed	9 Months after last accessed
ALLOW THESE USERS TO CREATE A TEAM	All requests through Central IT	All requests through Department IT	Only Joe, Sally, and Harold can create
RECERTIFY MEMBERS	after 3 Months	after 6 Months	after 12 Months

A Best-Practice Approach to Information Architecture and Knowledge Management in Office 365

Don't try and organize your information by department... think about the information type instead.

Team Space

- Distinct group of users, collaborating and storing common info
- Generally part of organizational teams

Backup: All
External Users: No
Recert: None
Reporting: Ad-hoc
 +
Default Labels
Metadata Presets

Project Space

- Dynamic Group
- Spanning different org hierarchies
- Exist only during life of project
- Typically follows a structure

Backup: All
External Users: No
Recert: End of Contract
Reporting: Ad-hoc
 +
Default Labels
Metadata Presets

Extranet Space

- Securely share and collaborate with external parties
- Audited and controlled

Backup: All
External Users: Yes
Recert: 6 Months
Reporting: Annual

Bringing It Together

Drive Sustainable Adoption

Resistance is normal

Resistance is to be expected...

- Time
- Insecure platform
- Yet another tool
- Enough support

... and needs to be anticipated

- Sufficient training
- Lack of management reinforcement
- Open collaboration
- 100% ready
- Change is not desirable

Resistance Management Techniques

- Empathy – Listen and understand objections
- Focus on the 'what', let go of the 'how'
- Remove barriers
- Provide simple, clear choices and consequences
- Create hope
- Show benefits in a real and tangible way
- Make a personal appeal
- Convert the strongest dissenters
- Create a sacrifice (find a way to give in)
- Find a motivator

Address resistance with communication

Common Resistance themes	Mitigation with Communications
People don't have time for change	Show how Microsoft 365 adds value and helps them save time
Microsoft 365 perceived as an insecure platform for collaboration and data storage – 'the Cloud'	Highlight safety and security features of Microsoft 365 and that it is centrally endorsed by IT. Consider highlighting competing "insecure" products e.g. WhatsApp.
People are worried there will not be enough support	Include details on how the support services will operate and supporting content/guides
People are worried there will not be sufficient training for new ways of working	Include details training activities and link to supporting content/guides
People are worried they will not have enough time to 'get ready'	Clearly communicate timelines and also opportunities for familiarisation. Focus on a few simple changes to start that save time, are high impact and are relatively easy to pick up e.g. sharing a document and co-authoring.
Senior managers potentially instructing people not to use new options	Supervisor and Manger coaching is a key component to manage resistance and change management. Understand what the blockers are for managers to adopt the new ways of working and help them understand 'what is in it for me' and why the change is important and what role they play in making it a success
Open collaboration is a new concept that for some may seem 'scary' – working in a transparent way and sharing – 'working out loud'	This is a big culture change which needs to be addressed through Exec Sponsor communication, linked to HR ways of working / company values and reinforced with direct managers' behaviours and messaging.
People tend to take steps only when '100% ready' vs new ways of working where collaboration is more important than individual perfect	Similar to open collaboration this is a culture and mindset change which needs to be promoted (and demonstrated) from the top. This will not happen overnight but leaders and managers can help by setting a clear example.
People don't like change, they don't want to change. Period.	Ensure the business sponsorship through to line managers is there and promote the benefits of working the in new way. Provide information on how people can get help (champion support, training) if needed.

Exercise – How may they resist? (optional)

Fill this section out

Expected Resistance

(Insert Ideas)

Resistance Management Plans/Ideas

(Insert Ideas)

Adoption challenges

- SaaS productivity platform move is “lift and shift” and no new value is delivered
- Organizations are ill-prepared to deliver continuous change provided by SaaS productivity platform
- Lack of “digital dexterity” investment such as mobile first programs

* [Maximize the Value of Office 365 by Making it Part of a Digital Dexterity Program](#)

Why Training Alone is Not Working

Non-Contextual

Unclear Roles

Generational Gap

What's In It For Me?

Sustainable Adoption Objectives

- Minimize the negative impact of making technology changes
- Promote the adoption of new systems and solutions
- Provide users with the resources they need to be successful
- Encourage an organization culture which embraces on-going evolution.

Step 1: Engage Key Stakeholders

Business leadership

Champions

Early Adopters

IT Support

Gain Business Leadership Buy-In

Executive
Leadership

Divisional
Heads

Why champions matter

Learning from co-workers is among the most effective and used methods in learning a new technology

Champions help:

- 1 Generate enthusiasm around the adoption of new collaborative ways of working.
- 2 Build an influence circle within their teams.
- 3 Achieve new working methods.
- 4 Identify possible challenges and solutions.
- 5 Provide feedback to the project team and sponsors.

Make a Difference – Become a Champion

- Get more from Office 365
- Help others do the same
- Enhance your career

Get started at <https://aka.ms/O365Champions>

Team members to include in adoption efforts

Many people throughout your organization will have important responsibilities during the launch of a new technology. The chart below provides a summary of those roles. We have created a template so you can identify and document your team in the – [Adoption Planning Workbook](#).

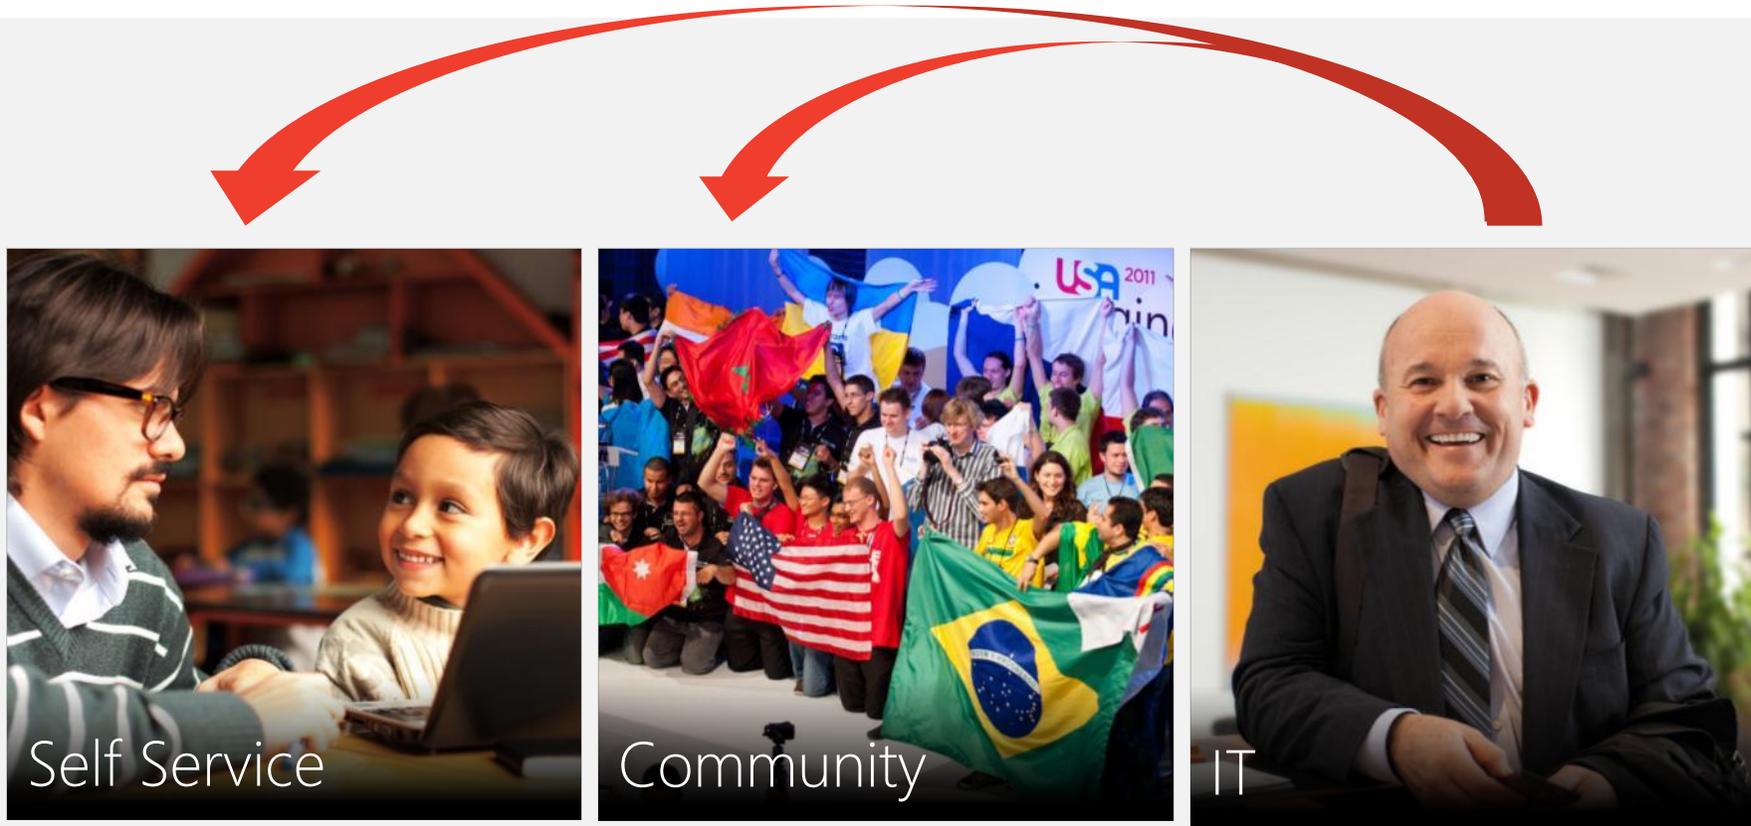

Role	Responsibilities	Department
Executive Sponsor	Communicate high-level vision and values of Microsoft 365 to the company	Executive Leadership
Success Owner	Ensure the business goals are realized from your Microsoft 365 rollout	Any department
Program Manager	Oversee the entire Microsoft 365 launch execution and rollout process	IT
Champions	Help evangelize Microsoft 365 and manage objection handling	Multiple departments
Training Lead	Manage and communicate training content about Microsoft 365	IT or other
Department Leads (Stakeholders)	Identify how specific departments will use Microsoft 365 and encourage engagement	Any department (management)
IT Specialists	Oversee all technical aspects of the rollout, including integrations	IT
Communication Lead	Oversee company-wide communications about Microsoft 365	Corp Communications, IT or other

Note: Though we recommend having each of these roles fulfilled throughout your rollout, you may find that you don't require them all to get started with your identified solutions.

Ensure Scalable Support

Step 2: Establish Use Cases

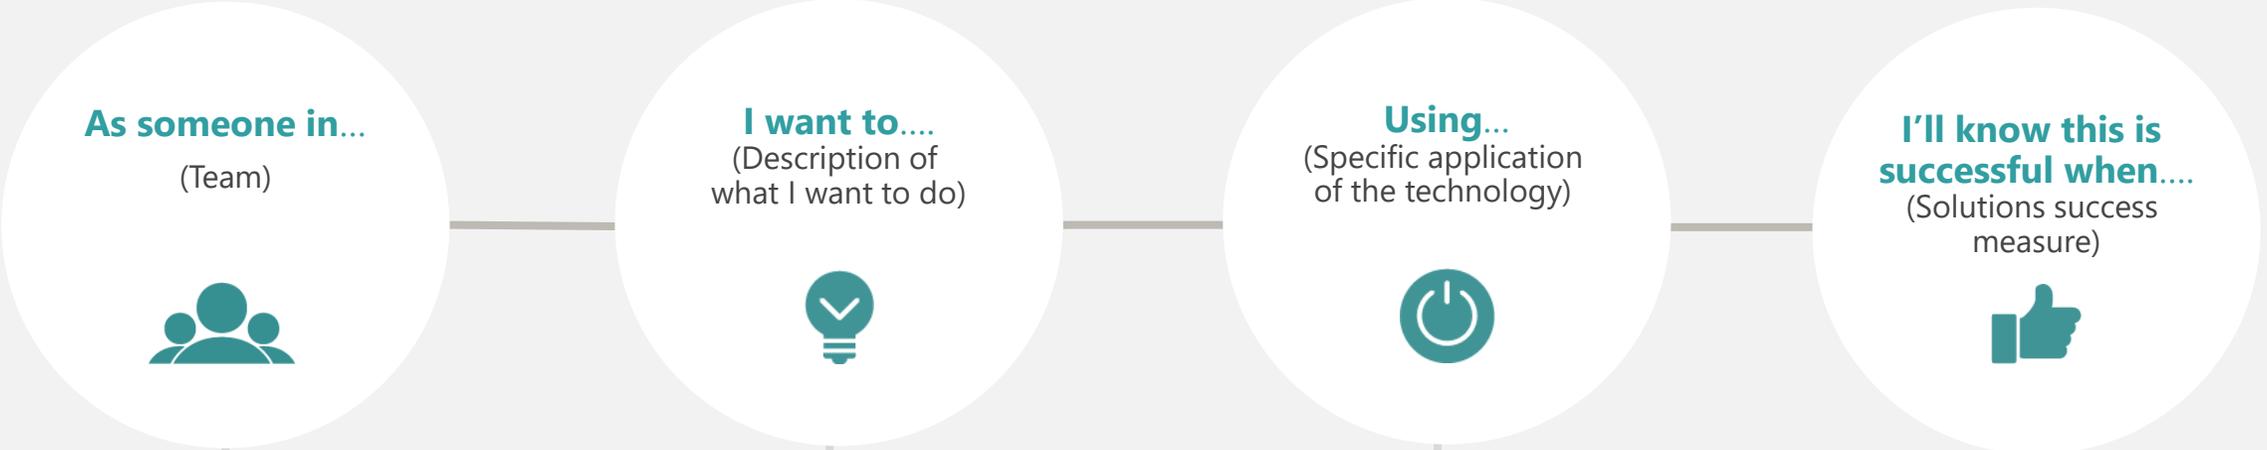

Identify specific use cases

Prioritize scenarios

Communicate value

Example: Identify Business Use Case

As someone in...
(Team)

I want to....
(Description of what I want to do)

Using...
(Specific application of the technology)

I'll know this is successful when....
(Solutions success measure)

As someone in
Sales Management

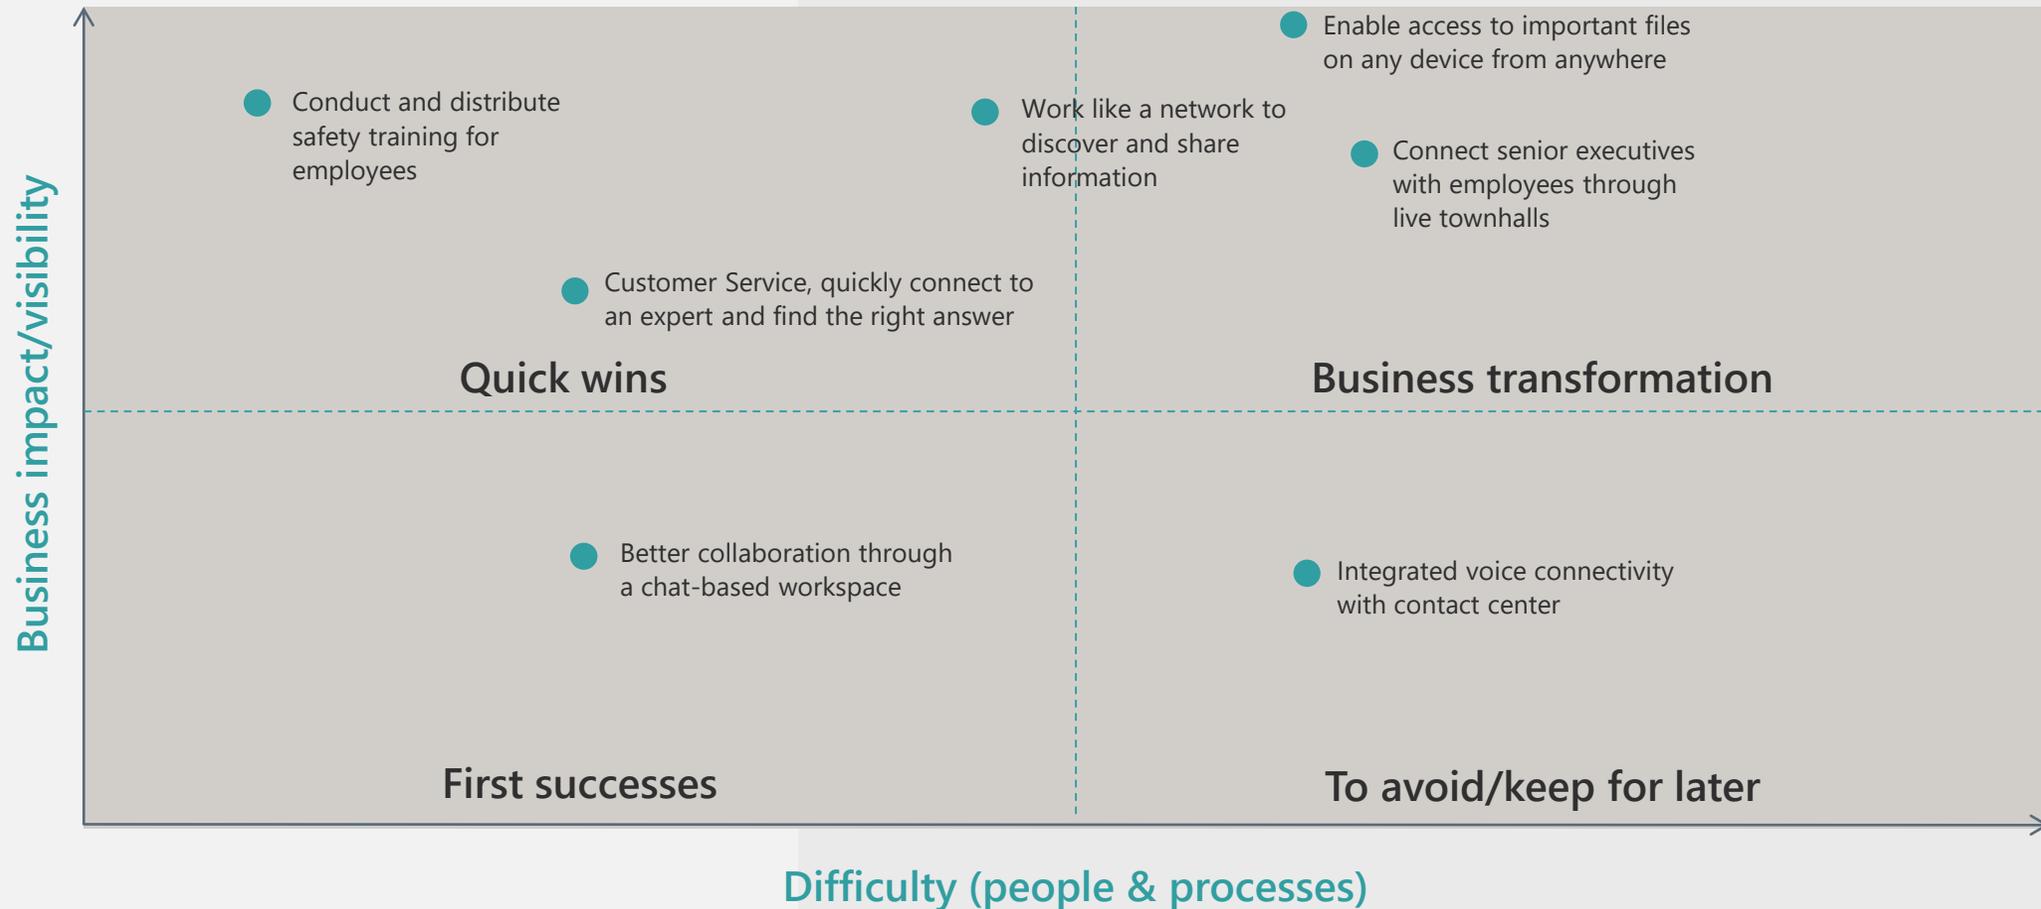

I want to
have a single version of the sales proposal that everyone has access to rather than managing multiple versions in email

Using
a SharePoint site to centrally store and share a single version of a sales proposal that my team can edit together using co-authoring in Word and PowerPoint

I'll know this is successful when
my sales team creates proposals more easily, giving them more time to close deals

Prioritize use case scenarios by evaluating impact and difficulty

Example: Business Use Case

Employee Onboarding

Bring new employees into the department's team from day one and provide a real-time resource of information. Help new employees get up to speed as quickly as possible.

Issue

We currently have a formal onboarding process to inform new employees of processes and resources, however there are limited opportunities to educate them about our departmental culture and create a sense of inclusiveness.

Solution

Bring employees onto Microsoft Teams on their first day at the organization. By creating early adoption, employees are more likely to participate in conversations – and do so more frequently - and will be more informed at an early stage in their tenure. Employees will also be able to see conversations that happened prior to their start date, to speed up their awareness.

Benefits

- Increase adoption
- Convey department culture and benefits to employees early on
- Live FAQs for new employees
- Historically searchable

Success Metrics

- Use of Microsoft Teams by new employees
- Employee survey response after 90 days

Owner & Timeline

- HR team and Departmental Managers
- Before Summer 2019 hiring season

Step 3: Develop Contextual Learning

Use case driven

Multiple modalities

Align to various phases

Build your training strategy

- Focus on the why
- Use real work scenarios
- Use multiple formats
- Reinforce

- What is best practice?
 - What is current vs future state?
 - Technical literacy of employees?
 - Any other change programs?
 - Training preferences of employees?

Build capability through **varying methods**

Onsite Training

Virtual Training

Self-Help Resources

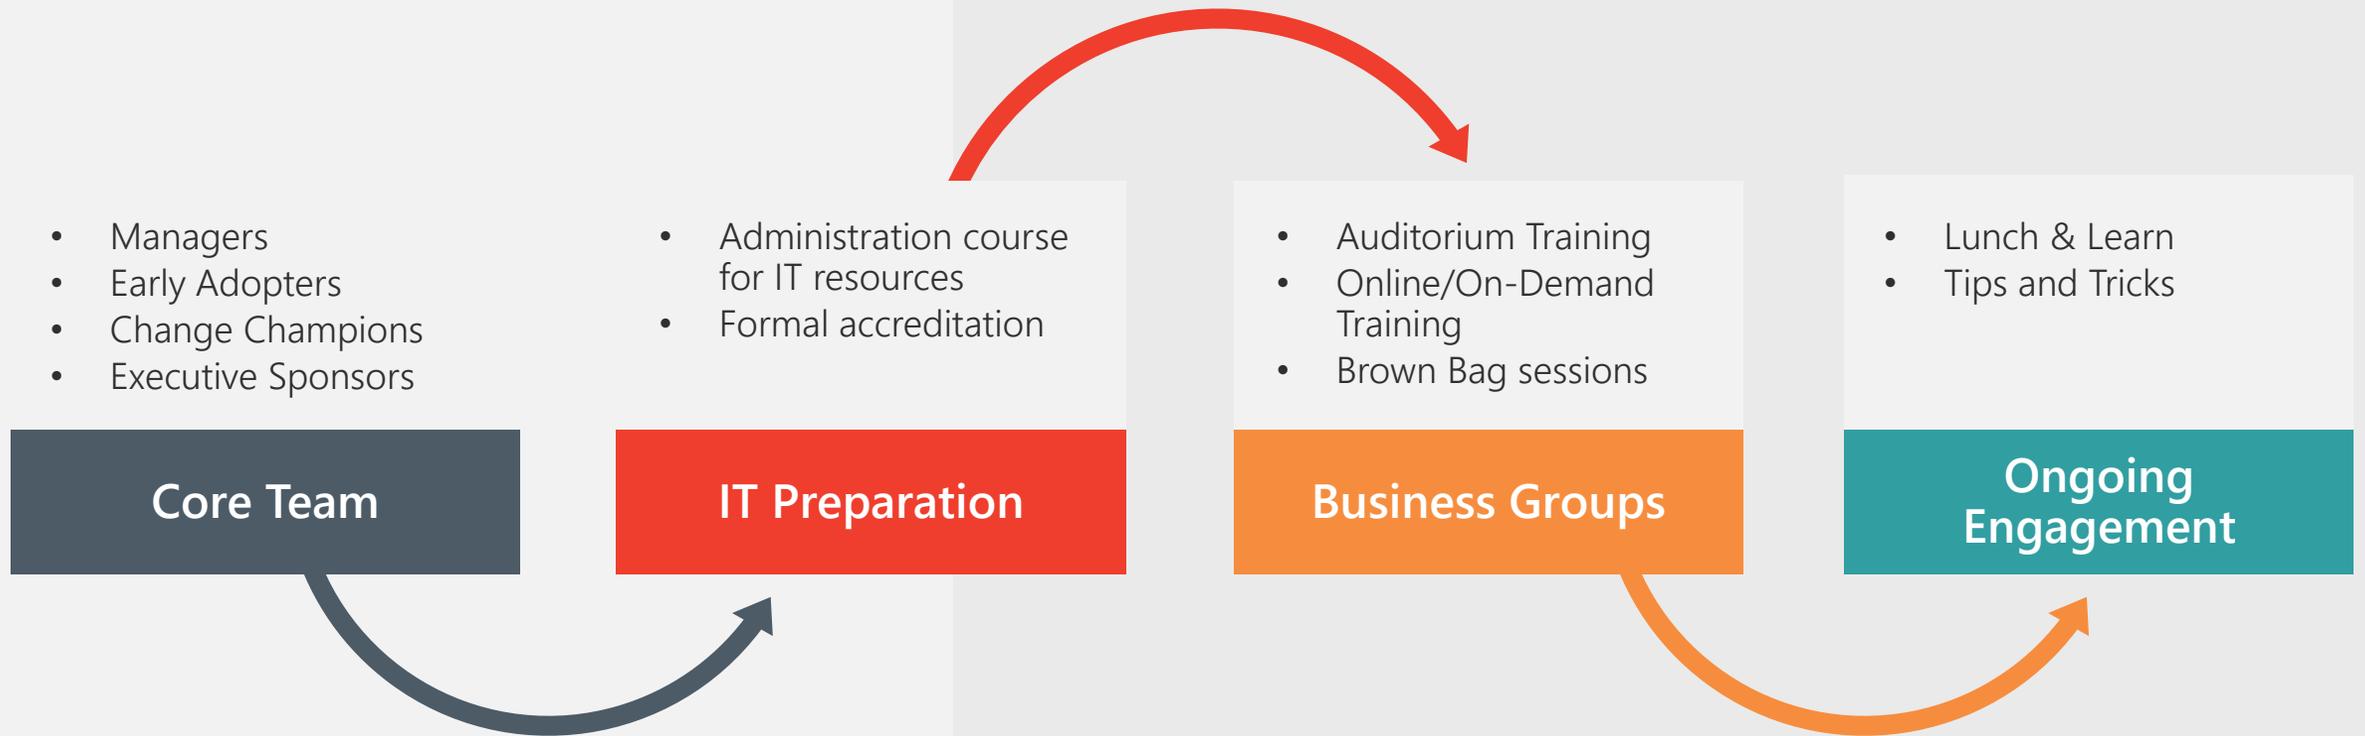

Live Support

Champions Network

Align training strategy throughout phases

All Employees - Needs Assessment

We need to understand the personas and the move from legacy through transition to future state

Transition State

- Big picture overview of the new environment and role in it
- New process skills/knowledge [linked to Persona and Scenarios]
- New system and technical skills/knowledge [O365]
- New organizational or role skills/ knowledge

Future State

- Big picture overview of new environment and role in it
- New process skills/knowledge
- New system and technical skills/knowledge
- New organizational or role skills/ knowledge

All Employees - Needs Assessment Recommendations

Recommended Modalities

- **Face-to-face training** – Sponsors (1 hour), Ambassadors Training (1 hour), Change Champions (1 hour), Manager (1 hour)
- **Web-based training** – On-demand webinars, videos, Online Training (OLT) for O365 training
- **Self-paced training** – Review Theodore training activities incorporating persona and scenarios, Frequently Asked Questions (FAQ) sheets

Recommended Reuse of Existing Source Material

- Office 365 training materials, contextualized for Personas and Scenarios.

Recommended Timing

- Face to face training
 - T-7 weeks
 - Sponsor training (hosted by Theodore Margand)
 - Sponsors attend high-level training on new ways of working (Gaby Bosse and Theodore Margand lead)
 - T-6 weeks Ambassador, Champions and Managers
- Self-paced and Web-based Training to be started T-3 weeks and review self-paced training weekly to accommodate for updates ahead of auditorium training (T-1 week)

Recommended Resources to Scope, Develop, and Deliver Training

- Office 365 Training Materials (see Productivity library on Fast Track).
- Theodore Margand 1 hour training decks for onboarding each key role in the Core Change team.

Ask questions and get help

<https://docs.microsoft.com/en-us/office365/customlearning/>

Step 4: Communicate & Drive Awareness

A high-angle photograph of a woman and a man leaning over a table. The woman, on the left, has blonde hair and is wearing a red sweater with a brown and white patterned vest. The man, on the right, is wearing a light blue button-down shirt and glasses. They are both looking at a tablet computer on the table. The tablet displays the Windows 8 Start screen with various colorful tiles. To the left of the tablet is a yellow smartphone. The table is covered with a large sheet of paper, possibly a blueprint or design document. The background is a plain, light-colored wall.

Focus on what's in it for me

Engagement events

Showcase success stories

Awareness matters

Validates the importance of the change

Ensures everyone understands what's happening

Helps generate enthusiasm

Gets everyone on board with using the new technology

Best practices to generate awareness and spark excitement

Communications

- Deploy a variety of tactics
- Focus on the “What’s in it for me?”
- Tailor plan to company and culture
- Send out communications

Engagement events

- Engage Executive Sponsors to kick-off launch
- Staff events with IT and Champions
- Distribute banners and leaflets
- Place demo booths in cafeteria/foyer
- Host online events for remote offices

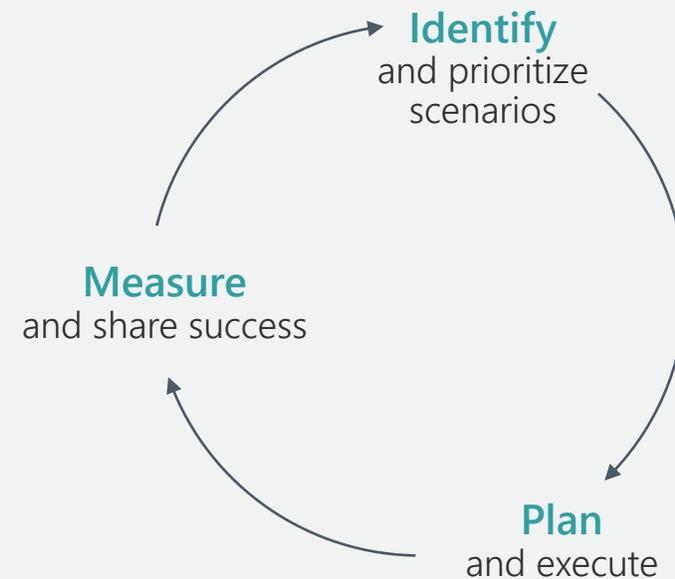

Communicate value to stakeholders with scenarios

Delivering value

Review scenarios and determine the best use cases to be utilized for the organization-wide launch. Scenarios will help inform the communications plan by:

- Translating core scenarios into uses that solve real business problems
- Determining which scenarios make sense for the company to promote in its Microsoft 365 launch
- Using the resources associated with each scenario to implement email announcements and training activities

Report and build on wins

Incorporate success stories

What makes a good success story?

- **Time.** The story should begin with a time marker so the audience knows when it happened.
- **Characters.** The story should feature names, so the audience knows who was involved.
- **Events.** The story should recount the events that took place.
- **Visuals.** The audience should be able to picture what happened.

Step 5: Deliver 90 Day Plan

A man in a dark suit and blue striped tie is sitting at a conference table, gesturing with his hands as he speaks to a woman in a light blue blazer. They are in a modern office setting with other people and monitors visible in the background.

Pilot Microsoft Teams

Launch organization wide

Introduce new use cases

Develop 90 Day Plan

Month 1

- Identify 3 use cases for Teams
- Engage leadership and secure buy-in
- Develop rules of engagement and how-to resources

Month 2

- Engage 3 departments/groups to pilot Teams use cases
- Identify what works and what doesn't with use cases then modify
- Configure Teams to support use cases for company wide deployment

Month 3

- Launch use cases company wide
- Encourage leadership to consistently promote and adopt the use cases
- Showcase and highlight wins of adopting Teams

Evaluate, Adapt & Iterate

Continuously Drive Engagement

Office 365 User Satisfaction Surveys

This document contains sample end-user surveys you can customize for your ROLLOUT and ENTPHASE SOLUTION.

This document includes:

- Three (3) pilot user surveys (baseline, mid-point, and final)
- Three (3) rollout survey templates (baseline, mid-point, and post-implementation with Office 365)

These sample surveys give you a good foundation to be designed for a different point in the lifecycle:

- Baseline** - Circulate this survey shortly before pilot or rollout to get data about people's knowledge of Microsoft Office 365, their user knowledge and experience with Office 365, how they use Office 365, how they use your hybrid product, and how they use the rollout process. You can use this information to help measure user adoption from a baseline survey can help capture user feedback for training.

Note: It is best to define your own acceptable levels for scores that setting a "good" target can be an iteration of the survey in detail, specify the answers they expect, and then review the results in detail. Take these release once you have a chance to identify what is most from, it is hard to interpret, the results afterwards.

For optimal results, customize the questions to meet your other survey tool for streamlined reporting and analysis.

Rollout - Final Survey

A. Profile Questions

1. Please enter the name of the organization you work for.
2. Indicate how well each organization you work for is able to perform in each area.

Organization	Baseline	Mid-point	Final	Rollout	Final
Microsoft	1	2	3	4	5
Microsoft Lync	1	2	3	4	5
Microsoft SharePoint	1	2	3	4	5
Microsoft Exchange	1	2	3	4	5
Microsoft Office 365	1	2	3	4	5
Microsoft Office 365 Lync	1	2	3	4	5
Microsoft Office 365 SharePoint	1	2	3	4	5
Microsoft Office 365 Exchange	1	2	3	4	5
Microsoft Office 365 Lync	1	2	3	4	5
Microsoft Office 365 SharePoint	1	2	3	4	5
Microsoft Office 365 Exchange	1	2	3	4	5

End User Survey Templates

Success Criteria	Method/Source	Metrics	Example Goal
Increased adoption: Increased usage correlates to user adoption of the technology.	Quantitative: • Office 365 reports	<ul style="list-style-type: none"> Mailbox usage SharePoint usage Lync IMs and conferences Minutes of Lync audio used 	Comparison of pre- and post-rollout usage reports will show increasing adoption of 10% per month.
Training effectiveness: Increased usage correlates to training effectiveness.	Quantitative: • Office 365 reports Qualitative: • End user surveys	<ul style="list-style-type: none"> Mailbox usage SharePoint usage Lync IMs and conferences Minutes of Lync audio used 	Comparison of pre- and post-training usage reports will show increasing adoption per month. Employee Net User score is 130+ the final training

[Customer Name] Pilot Success Criteria Status

Overall Status: ● ● ●

#	Metric	Measurement	Goal	Actual	Trend	Status
1	Acceptable Lync Call Quality	Percentage of poor quality calls	< 3%	Y%	↑	↑
2	Conferencing User Adoption	Users who have organized at least one conference Total amount of Lync hosted audio conferencing minutes	3%	Y%	↑	↑
3	User Acceptance of Lync system	User survey satisfaction scores	X		↔	↔
4	Help Desk able to support Lync	Average time to close support ticket	X	Y	↑	↓
5	Lync Operationally Ready	Time to resolve open monitoring alerts Session success rates	X	Y	↔	↔
6	User Communications and Training	P2P Audio: X%	P2P Audio: Y%	↔	↔	
		IMP App Sharing: X%	IMP App Sharing: Y%	↔	↔	
		Conf App Share: X%	Conf App Share: Y%	↔	↔	
		Conf Join: X%	Conf Join: Y%	↔	↔	
7	Lync Meets SLAs	Comparison to production SLAs	Recovery: X Availability: X	Recovery: Y Availability: Y	↔	↑

Work from locations will report feelings of satisfaction with their work within 3 months of rollout.
Satisfaction by 15% within 6 months.

Success Criteria Examples

... and Measure Success

Achieve real business relevance by measuring your outcomes in terms of ROI. Use enterprise social engagement data to support your findings.

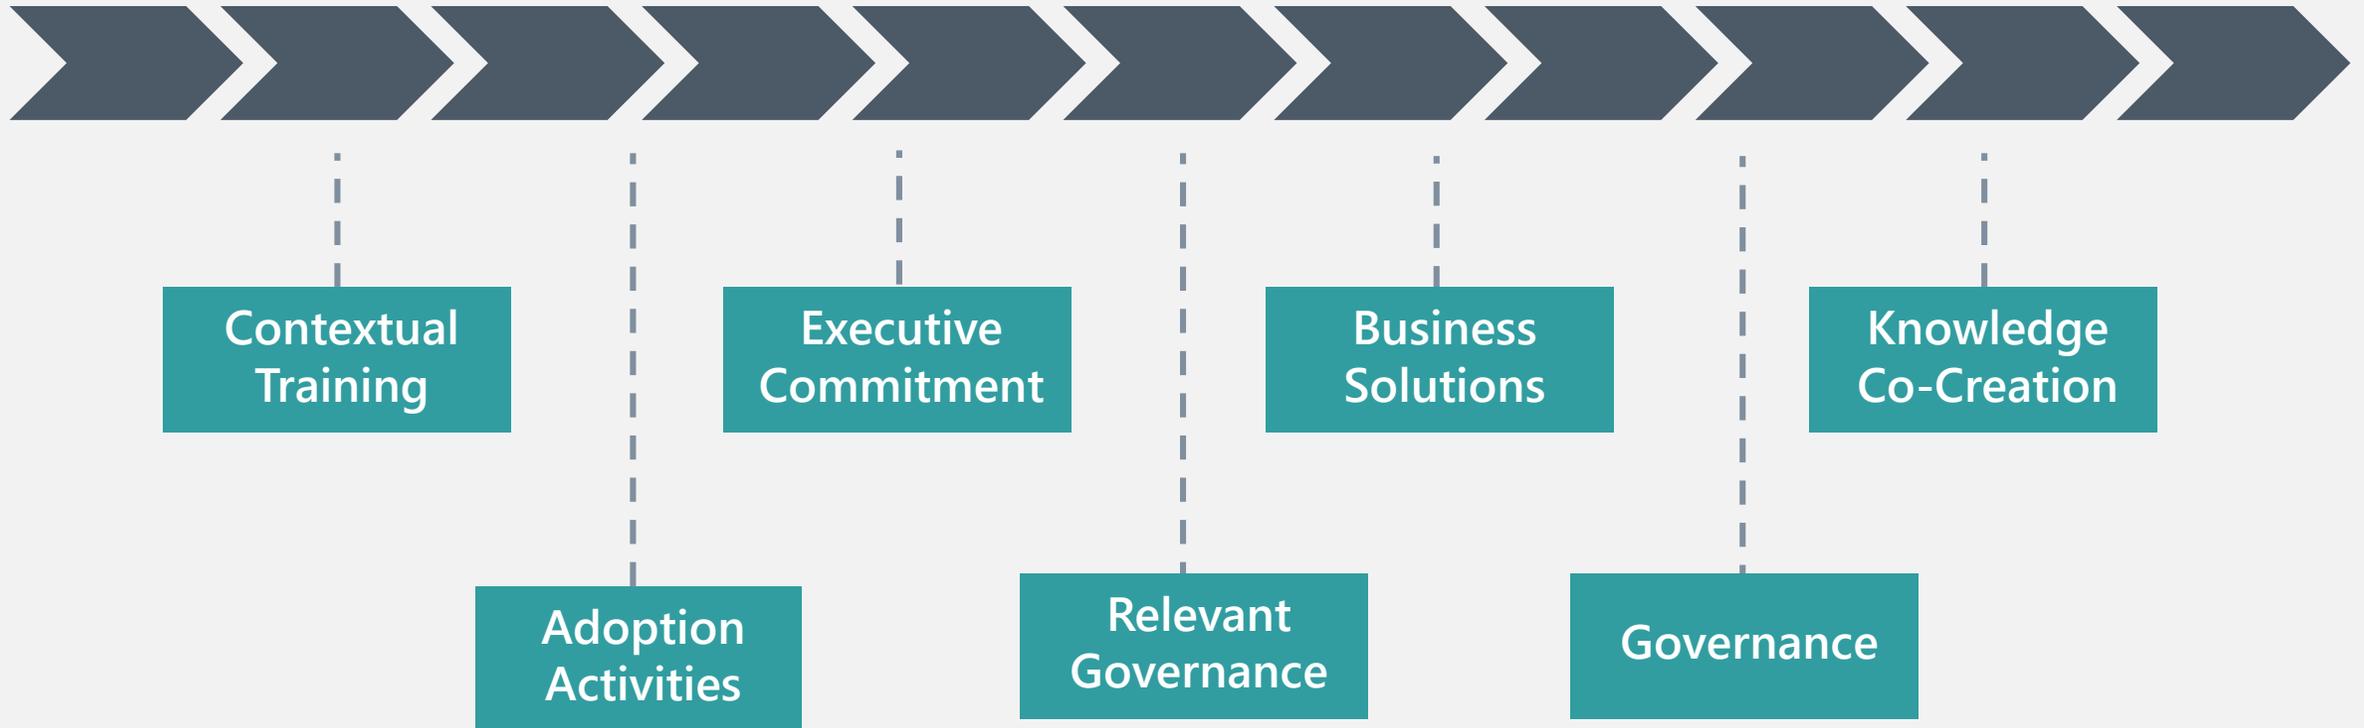

Business Value Opportunity	How did SharePoint help?	What was achieved?	How is it measured?
Team Collaboration	Streamlined collaboration across regions and teams to execute go-to-market strategy.	Increasing global spread of business.	15% improvement in increasing number of successful innovations for new products or services.
Employee Engagement	Find experts and information fast.	Time saved in searching for assistance with Sales training.	30% improvement in access to experts and knowledge.
