

Fighting Sprawl and Helping Your Users Get Their Shift Together in Office 365

Fighting Sprawl

It is easier than ever for end-users to maximize Office 365 and start collaborating with Microsoft Teams and SharePoint. But this ease of use can be a double edged sword. Learn how can you prevent content sprawl, and ensure the right permissions and privacy settings are in place when most admin controls are out of your hands.

Executive Challenge

Realize the Investment

How to Measure & Show Value??

- Share Success Stories
 - Sustained Activity
-
- Heavy promotion and expected adoption of Office 365 and new solutions
-
- Larger #s = Usage (***more=better***)

Important of Governance

Without It...

Here is what happens:

- Eventual content abandonment
People leave, no ownership of assets
- Duplication of content & collaboration spaces
- Too much to navigate & content clutter

- **Legal & compliance issues (regulated):**
Can't purge without authorization
- **Knowledge of existing assets (no insight into what you have)**

Our Solution

Establish governance & proper levels of control for provisioning process

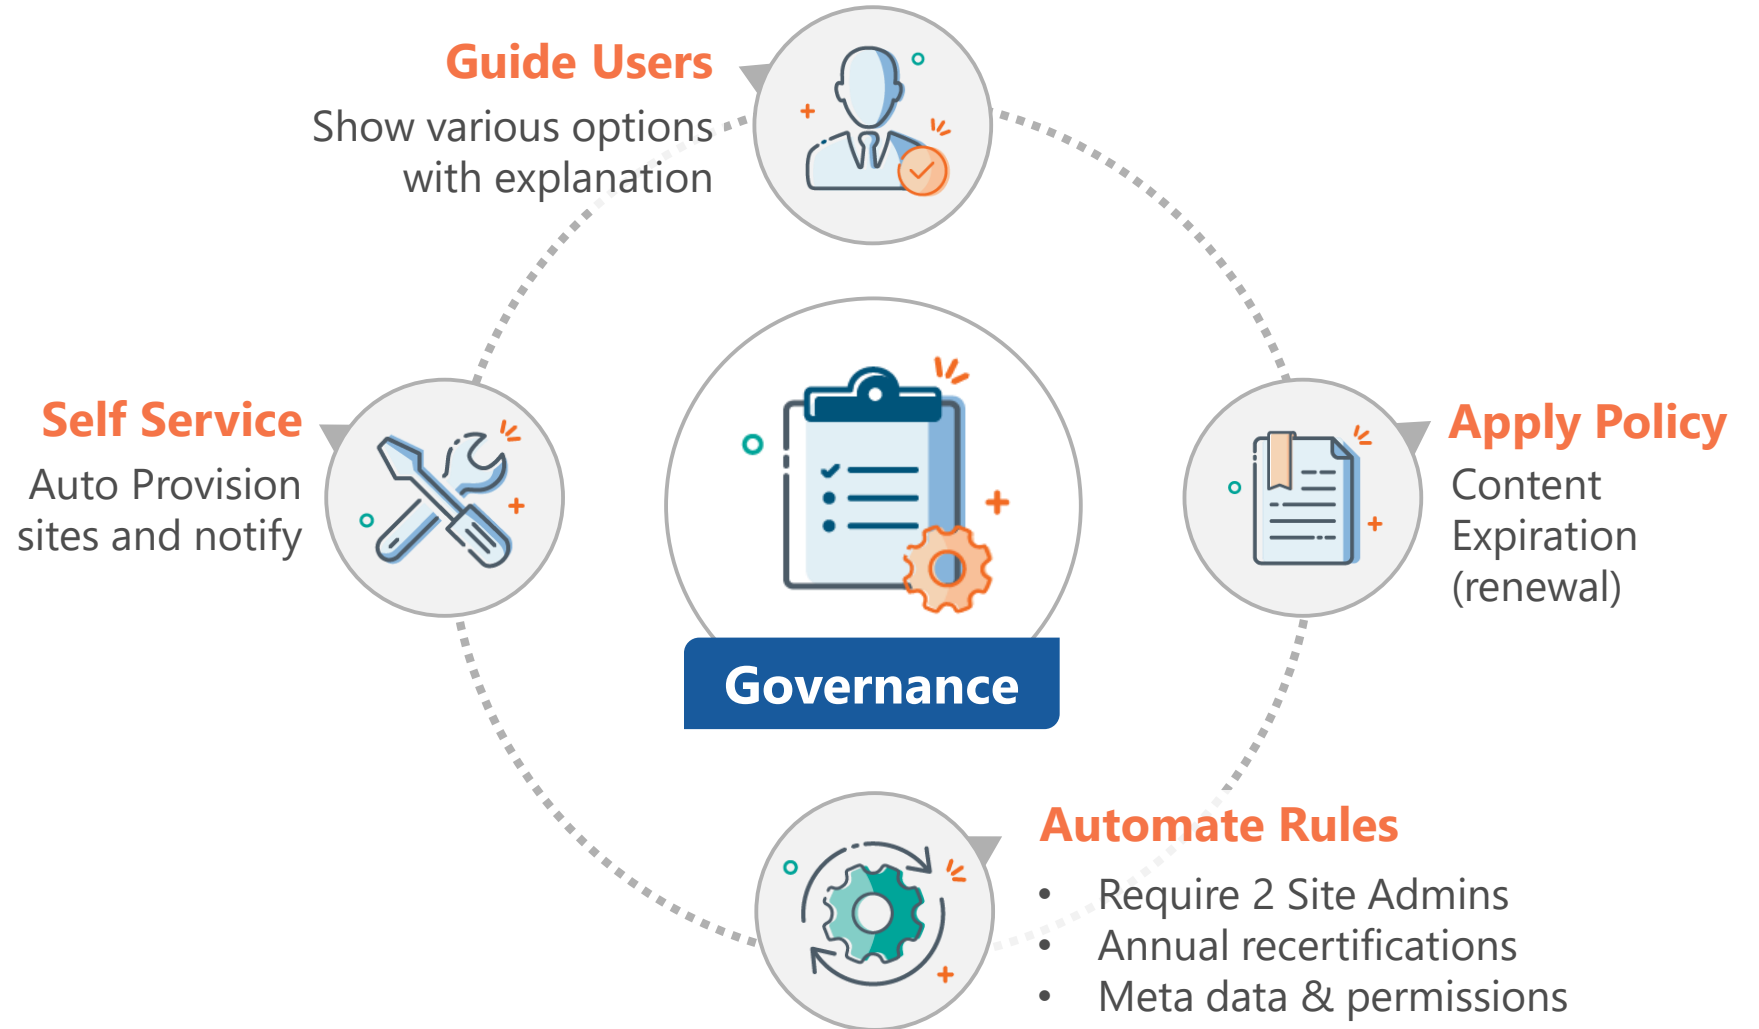

Basic principles

- Ownership of content
- Content shouldn't exist forever and has expiration
- Tag and secure content appropriately (identification of use)

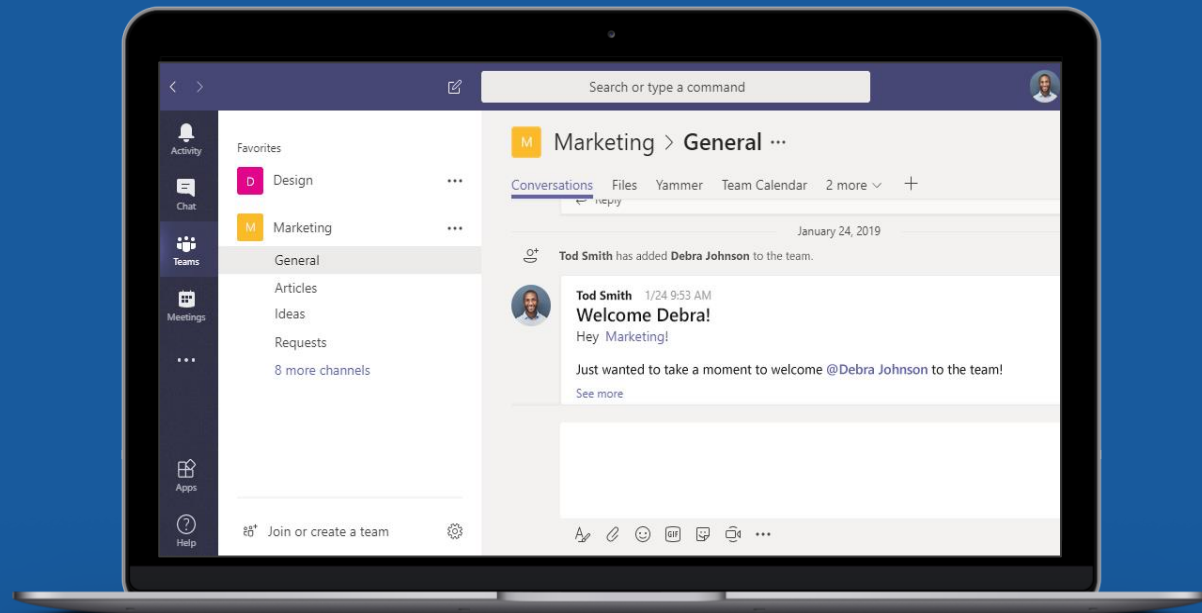

SharePoint Approach

SharePoint

How Does This Change with Microsoft Teams?

Teams

Merck Implementation

Our Size & Scale

1.05TB

of data in OneDrive

Our Journey

Migration efforts from 2007 to 2010

- Lack of ownership
- Costly Business analyst efforts to plan migration

On Premise Outage

- Lack of knowledge to prioritize

Custom built governance solution put in place

Movement to SharePoint Online

- Decision – buy or rebuild solution?
- Custom built governance solution put in place

Ability to support future innovations in Office 365

Key Uses of Governance Automation

Site Directory

- Filter
- Sort
- View meta data
- Site Contacts

Self Service Provision

- Self Service
- Guide/Direct Users

Policy Application

- Apply Policy
- Enforce guard rails

Success Achieved

More sites retired, than created

Migration path easier

Awareness of key assets

Legal hold enforcement & identification

Establishing a Partnership

A vendor can be a supplier of product OR a Partner

Worked with AvePoint a great deal on their product

- Complex security model (application trust model)
- Branding importance
- Usability features and feedback
