How to migrate from Slack to Microsoft Teams

Thursday, April 16

3:00 PM-5:00 PM CEST

[Reserve My Spot](#)

Introductions

Agenda

- Introductions
- Why are organisations moving from Slack to Microsoft Teams
- Establishing a migration framework
 - Migration Methodology and Toolset
 - Discover & Scope Migration
 - Design & Prepare
 - Execute Migrations
 - Common Challenges

About AvePoint: Corporate Overview

Migrate. Manage. Protect

16K
Customers

7M
Cloud Users

88
Countries

7
Continents

 **AvePoint** is headquartered and maintains its principal operational center in Jersey City, NJ, with approximately 1,500 employees across five continents.

Microsoft
Partner

- 2017 Partner of the Year Winner
Public Sector: Microsoft CityNext Award
- 2016 Partner of the Year Winner
Technology for Good Citizenship Award
- 2015 Partner of the Year Winner
Collaboration and Content
- 2014 Partner of the Year Winner
Public Sector: Public Safety and National Security

Why organisations are migrating from Slack to Microsoft Teams?

Strategically align with Microsoft as the core collaboration platform

Unify the collaboration experience for the organisation into one place to go to work together.
Consolidate IT resources and focus to building maturity on one key platform

Stop paying double for collaboration because you have both Slack and Teams

Mitigate risk from shadow IT in disparate departments

Establishing a Migration Framework

Migration Challenges

Data Identification

- Identifying scope clearly
- Moving content per regulatory/compliance concerns?
- Migration performed by IT who are not owners of data

Performance & Capacity

- Throughput required
- Impact on source / destination and network

Timelines

- How long will your migration take?
- Do you have deadlines?
- Ensuring all required content was exported in time

Object Conversion

- What restructuring or transformations will need to occur during the migration?

New Technology

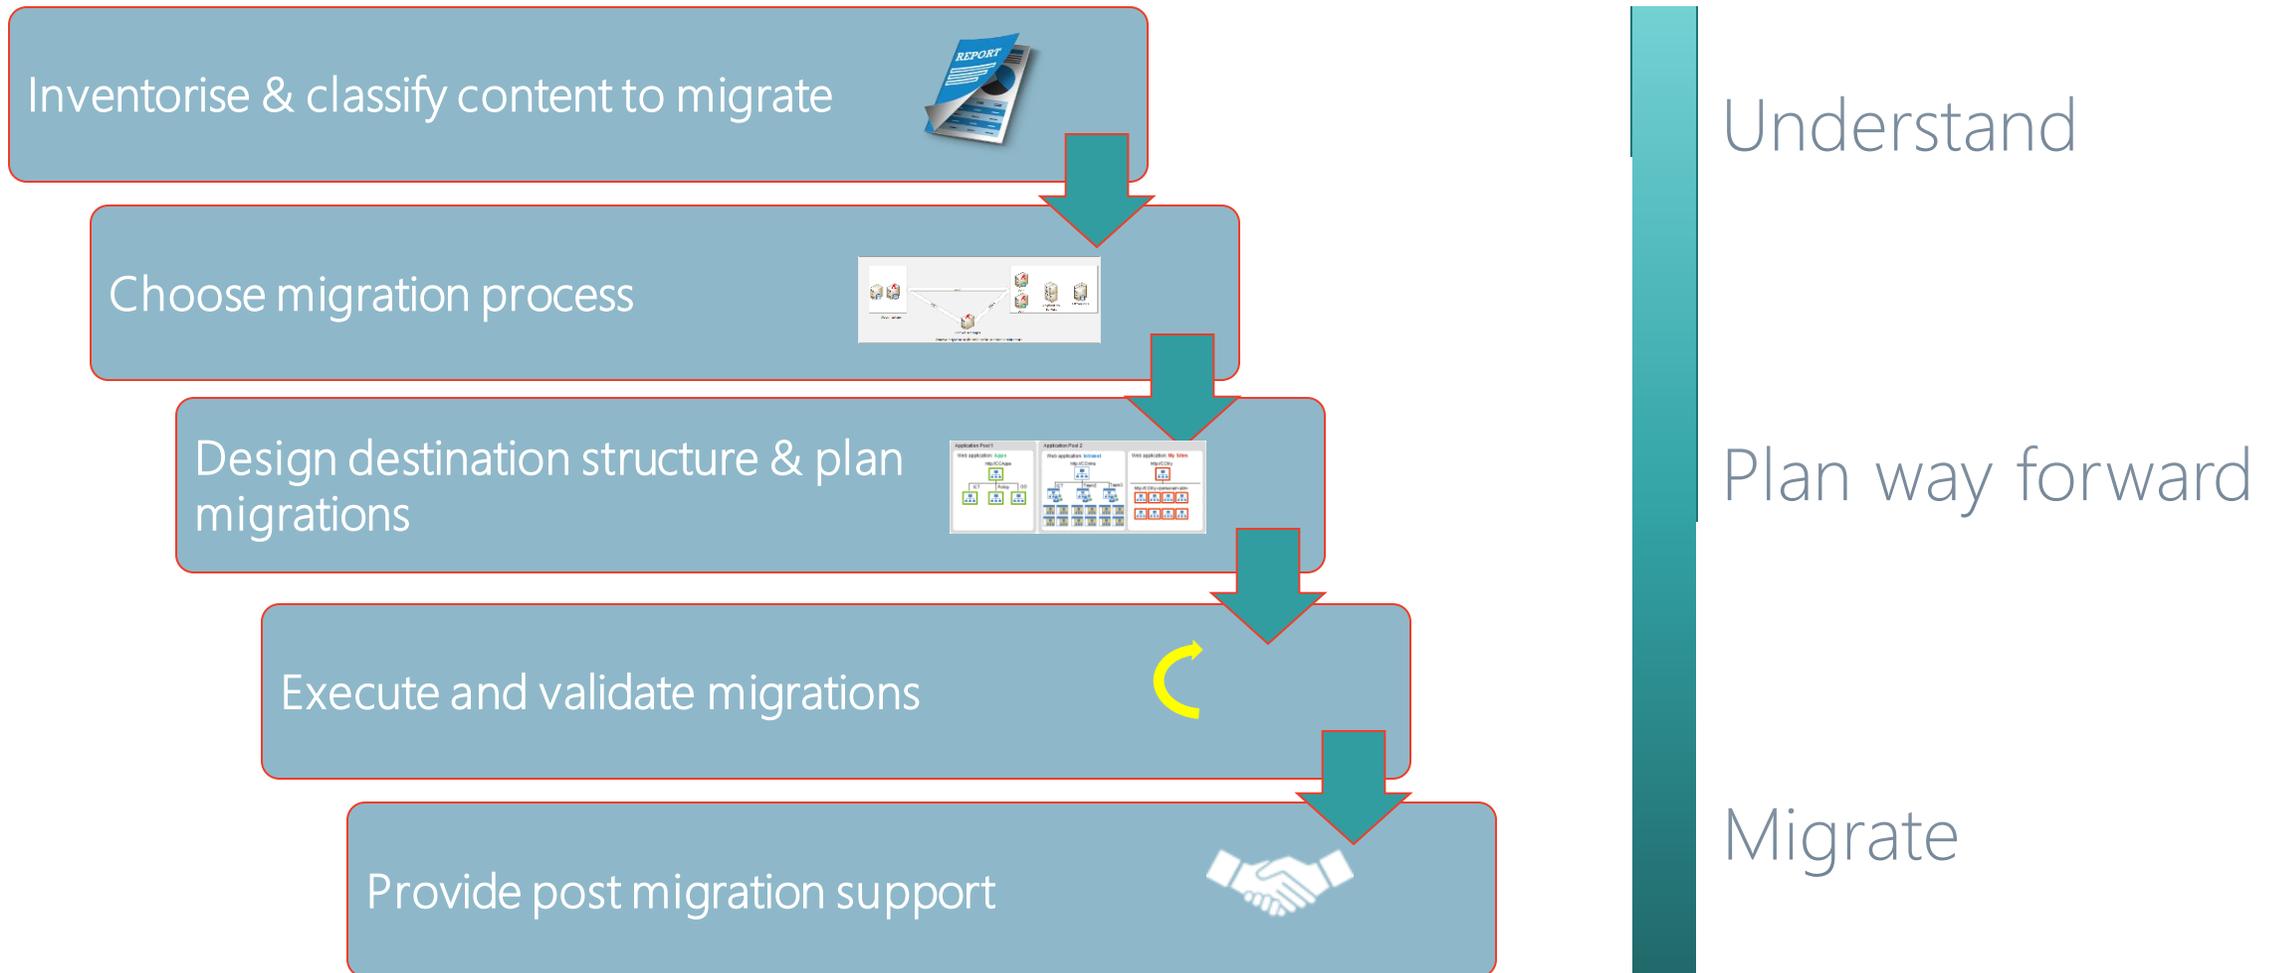

- Adoption resistance and process resistance
- Teaching users how to find migrated content

Validation of Content

- Migration reports must be checked against extraction reports to ensure completeness of migration

Framework for Migration

Understanding Your Migration

Migration Style	Source Type
Fast and Simple	Modern Cloud Services
Methodical and risk reducing	Existing, well understood services and applications
Legacy and complex	Legacy

Discover & Scope Slack Workspaces

Tuesday, April 14th

Demi Dai 8:16 AM

Hi all - I've finished legal review of the team's proposed customer survey forms for your needs analysis, and redlined some verbiage I would suggest changing.

4 replies Last reply 1 day ago

Destiny Han 8:18 AM

@Jason Jiang please review the contract with Adatum. We need to approve the RFP by 4:00. Thanks!

1 reply 1 day ago

Jason Jiang 8:27 AM

Here is the Mark 8 overview doc. I could use some help with the performance specifications chart and the parts supplier list.

Jason Jiang 1 day ago

@Kathy Gao Do you have time to discuss suggested changes? We're trying to get this out first thing tomorrow, so I would like to meet on this right away if possible and nail it down.

Kathy Gao 1 day ago

@Destiny Han Adele Vance, yes I am available the next two hours.

Jason Jiang 1 day ago

Let's all jump on the Project Review meeting here in 15 minutes.

Demi Dai 1 day ago

Great meeting everyone

Discovery Benefits

Active Channels

- Use conversation and file dates to identify which channels are active
- Help decide the scope of migration

Content Categorization

- Identify “ownership” of Channel
- Complexity categorization

Mapping to Teams

- Enables identifying channels that can be grouped together

Complexities

- Identify extent of unsupported migrations (Shared channels, linked conversation)

Volume Analysis

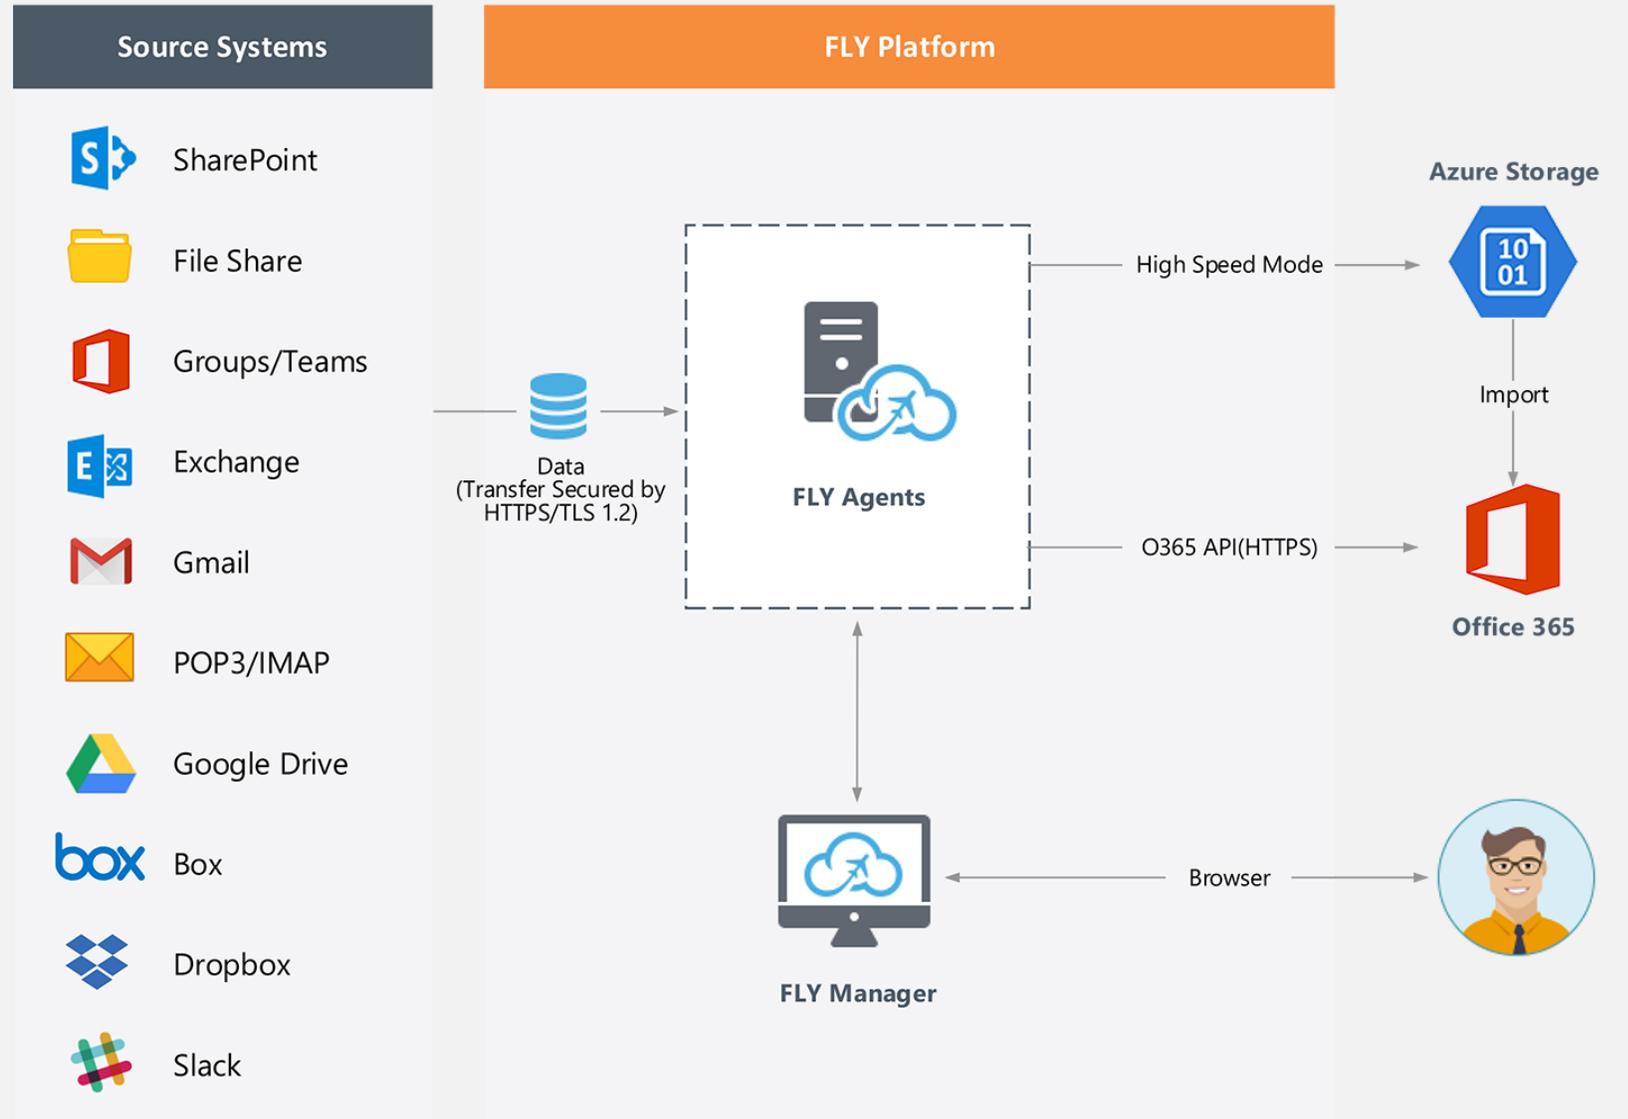

- Helps schedule migration of project based on remediation schedule

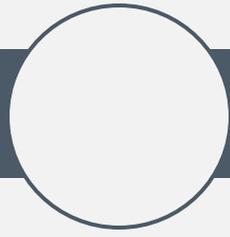

Design & Prepare for Migration

Migration Product Architecture

1. Migrate
2. Monitor

Design Challenge

Mapping Workspaces/Channels to Teams/Channels [Public/Private]

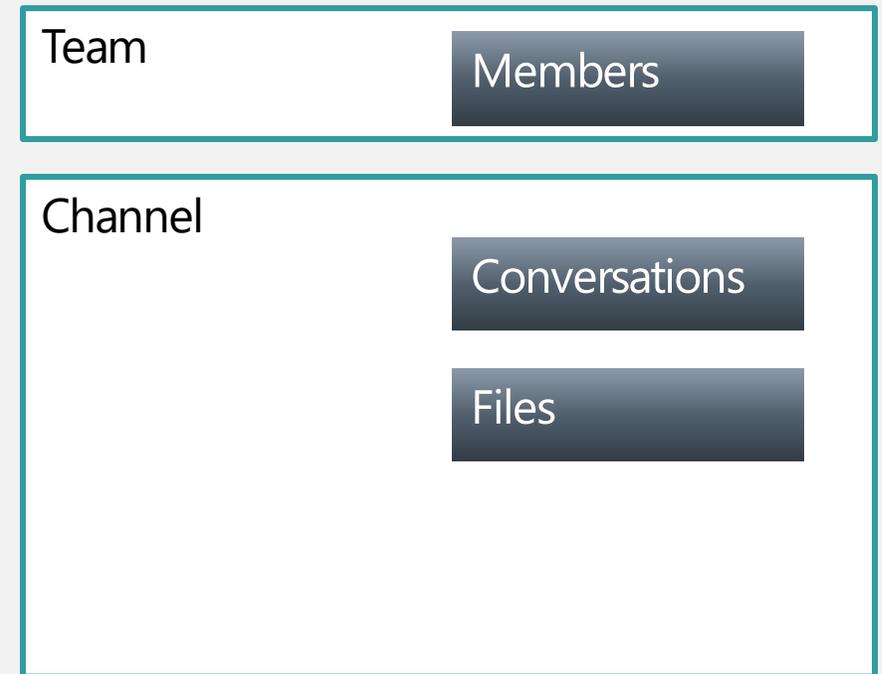

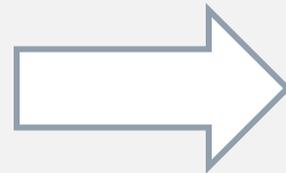

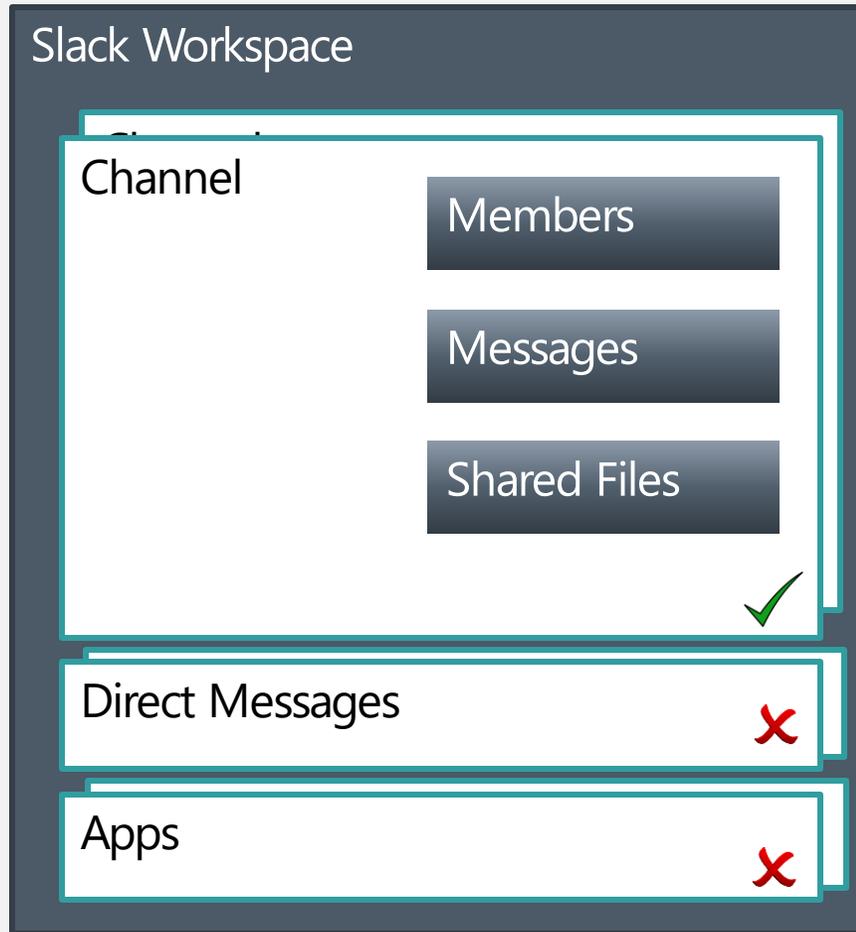

Number of ways to map; depends on how slack is used within organization.

Addressed By:

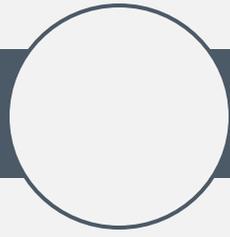

1. Standard rule does not normally work
2. Design workshops based on discovery data and usage understanding

Migration and Mapping

Design Challenge

Migrating Conversation History

Conversation history including dates/participants/replies/file links are to be kept as is

Addressed By:

1. FLY can keep conversation history as is but it will impact performance when conversation count is high
2. Migrate conversation history as HTML where possible is preferred

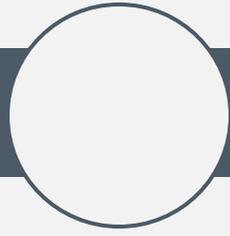

Conversation History Migration

Channel Activity	Conversation Migration Design
Active Channel	Migrate conversation as conversations (users mapped, threaded conversations retained, file links retained)
Inactive Channel	Migrate conversations as HTML file add add to teams channel (users mapped, threaded conversations retained, file links retained)
Active Channel with long history	Hybrid : Last n month conversation as conversations in teams; earlier conversations as html

Design Challenge

Shared Channels – Within Organization

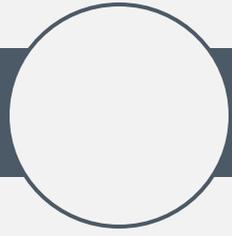

Shared channels have accounts termed as “strangers” which cannot be mapped as only names are available

Addressed By:

1. Report all strangers during discovery reporting, map them by name
2. Post migration script to add strangers as members

Design Challenge

Shared Channels – External Organization

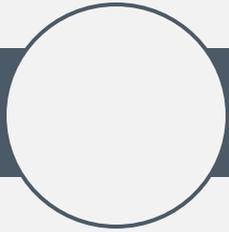

Shared channels have accounts flagged as “Is - strangers” which cannot be mapped as only display names are available

Addressed By:

Post migration script to give a report of all external accounts to be added

Design Challenge

Links to Conversations

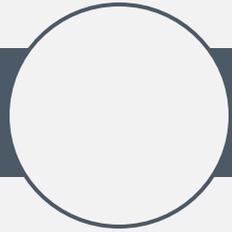

Conversations in one channel could link to conversations in another channel and this can be circular

Addressed By:

Copying conversations from the referenced channel to the linked channel

Design Challenge

Muted Channels & Pinned Messages

Muting a channel to avoid notifications and Pinning messages are individual profile settings

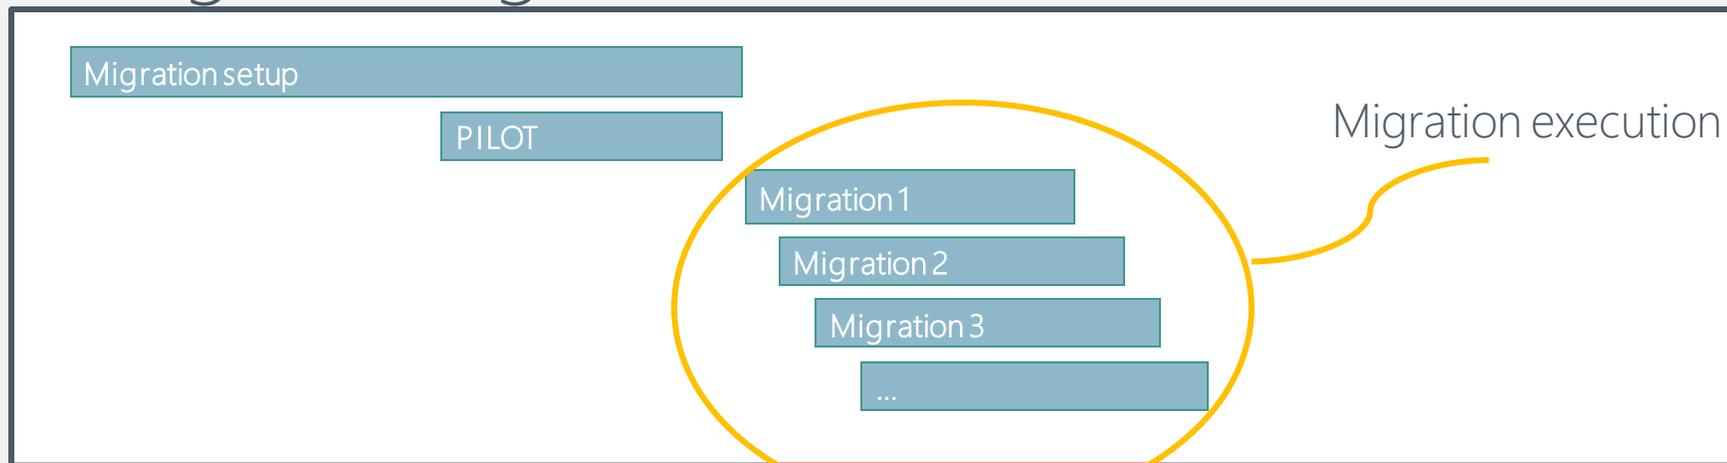

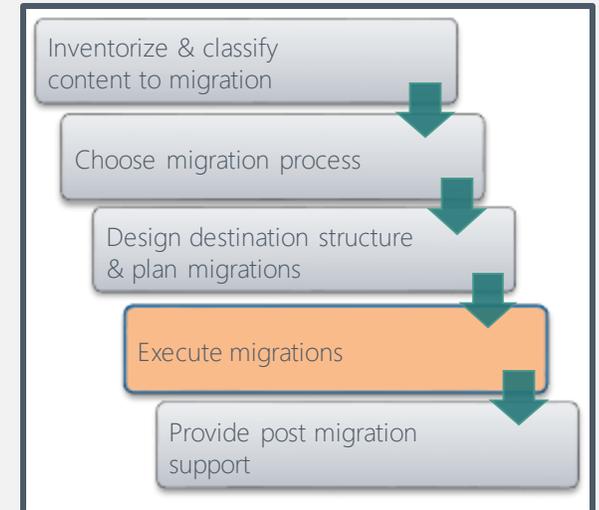

Though there are similar features in Teams, migrating it will not be feasible.

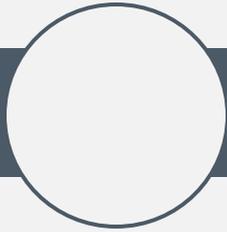

Business Process

Migration executions are repetitive in nature
PILOT migration followed by batched
migrations (e.g. business unit by business
unit)

Change management built in

Business Process

Communication during migration

Migration Communication APP 1:42 PM

The migration of your Slack Channel [#flyo](#) will start in X week!

Dear members of [#flyo](#)

We are glad to inform you that your Slack channel will be migrated to Microsoft Teams soon.

The migration is scheduled on **2020-04-10 5PM CET** and expected to end by **2020-04-13 5PM CET**. Before the migration starts, you can continue using the Slack channel for daily business.

You will get 2 additional notifications here later regarding the migration process. Stay on tuned.

In case of any questions, please reach out to Migration Project Team (project@migration.com)

Best regards,

Migration Project Team

Migrate Phase

Connect to Slack

Slack Connection

- Connection established through an APP created for Slack
- APP will have permissions for public channels
- Private channels are supported if APP is given permissions

FLYMigrator

Settings

Basic Information

[Collaborators](#)[Install App](#)[Manage Distribution](#)[Security & Compliance](#)

Slack ❤️

Basic Information

Building Apps for Slack

Create an app that's just for your workspace (or build one that can be used by any workspace) by following the steps below.

[Add features and functionality](#)[Install your app to your workspace](#)[Manage distribution](#)

App Credentials

These credentials allow your app to access the Slack API. They are secret. Please don't share your app credentials with anyone, include them in public code repositories, or

[Discard Changes](#)[Save Changes](#)

...then you can easily create connections to Slack.

The screenshot displays the FLY Connection Manager interface. On the left is a navigation sidebar with the following items: Home, Pre-Migration Report, Migration, Migration Status, Migration Settings, Connection Manager (highlighted), and Management. The main area is titled 'Connection Manager' and features tabs for SharePoint, File System, Exchange, and G Suite. Below these tabs are '+ Add' and 'X Delete' buttons. A table lists connections:

<input type="checkbox"/>	Connection Name	Workspace Domain
<input type="checkbox"/>	FLYConnection	avepointworkspace

Below the table, it indicates '0 of 1 selected'. An 'Edit Connection' dialog is open on the right, showing the following fields:

- Description:** An authorized app is required to connect to a Slack workspace. Please enter the Client ID and Client Secret of the app.
- *Connection Name:** FLYConnection (with a link to 'How to configure a connection?')
- *Client ID:** 367247424-18960614
- *Client Secret:** [Redacted]
- Advanced Options:**
 - Select an Agent to run the migration. (with an info icon)

At the bottom right of the dialog are 'Update' and 'Close' buttons.

Hi all - I've finished legal review of the team's proposed customer survey forms for your needs analysis, and redlined some verbiage I would suggest changing.

Here is the Mark 8 overview doc. I could use some help with the performance specifications chart and the parts supplier list.

Demi Dai 2020-04-14 7:27:54 AM (UTC)

Thanks. My team is already working on it.

Kathy Gao 2020-04-14 7:29:00 AM (UTC)

I am having trouble finding all of the vendor information from our records. [Megan Bowen](#), can you point me in the right direction?

Demi Dai 2020-04-14 7:29:19 AM (UTC)

I think we should discuss what relevant data we need for the overview. I'll setup a meeting.

Jason Jiang 2020-04-14 3:28:39 AM Demi Dai , have you reviewed the vendor contract yet?

Destiny Han 2020-04-14 3:28:57 AM This will be useful for the contract.

Kathy Gao 2020-04-14 3:29:43 AM Demi Dai,what are your thoughts on these priorities?

Destiny Han 2020-04-14 3:30:02 AM Kathy Gao - let's discuss the ones for Q2

Jason Jiang 2020-04-14 3:31:10 AM Demi Dai I can help

Kathy Gao 2020-04-14 3:36:27 AM This is great stuff, guys!

Destiny Han 2020-04-14 3:32:36 AM Usability Testing

Hello, we've finished our first round of usability testing on the X1050. In general, things went very well. There are a few issues to overcome in the next few weeks prior to launch, but the dev team is moving forward rapidly. Our user testing has also identified some really compelling opportunities for additional features that may be included after launch. You can find more details in the attached documentation.

Jason Jiang 2020-04-14 3:34:10 AM Destiny Han I'm driving the advertising collateral for the project in another workstream. Was there any feedback on aesthetics such as color palette, font selection, or iconography? I'd like to get that incorporated in my designs as soon as possible in order to get the package off to print.

What's Next

Read all about it

The most critical piece of the puzzle was ensuring that their Slack conversation history stayed intact.

"Miken Technologies really needed to be able to see their Teams conversations just as they were in Slack. AvePoint really stepped up to the plate and was able to make that happen. This was the overall deciding factor," said Robison.

The image shows a preview of an AvePoint case study document. The document header features the AvePoint logo and the text "Case Study". The main content area is titled "miken technologies" and describes a migration project. It includes sections for "Customer Location", "Industry", "Platform", "Solution", "Critical Needs", "Success Highlights", "Customer Profile", and "The Challenge". A quote from Jason Robison, Chief Technology Architect at Miken Technologies, is featured in a callout box. The document is presented with a dark header and a light body with a colorful horizontal bar.

Critical Needs

- Migration of channel conversation history from Slack to Teams
- G Suite to Office 365 migration of 220GB
- A single independent software vendor for both migrations

"Our client really needed to be able to see their Teams conversations just as they were in Slack. AvePoint really stepped up to the plate and was able to make that happen."

Miken Technologies Migrates a Client from Slack to Microsoft Teams While Retaining Conversation History

Success Highlights

- Migration of Slack channel conversations to Microsoft Teams
- Reduced time cost of G Suite to Office 365 migration by 40 hours
- Quick adoption of Teams

Customer Profile

For over 30 years, Miken Technologies has been providing solutions for IT and business communications as well as project management services. They partner with major software/hardware vendors and integrated solutions providers while working closely with clients to both develop and deliver solutions.

The Challenge

Miken's client, a financial services organization, had been leveraging Slack for over a year in conjunction with G Suite before considering Office 365.

"When Microsoft revealed Teams, our client's interest in Office 365 peaked. Why would you continue using Slack if you can have all of that real-time collaboration tied into the pure integration and immersion of Office 365?" said Chief Technology Architect Jason Robison, Miken Technologies.

During their client's consideration and evaluation of Office 365, Miken found this to be a suitable time to leverage Microsoft's Customer Immersion Experience. Through this hands-on involvement, Miken's client was able to step into the shoes of an Office 365 owner and feel the seamless collaboration, notably with Microsoft Teams.

"The Customer Immersion Experience really pushed this company in the direction of Office 365," said Robison.
