

FROM COPILOT TO CATALYST: AGENTIC AI IMMERSION WORKSHOP

A 1-day hands on immersion for business leaders ready to turn AI from an assistant into a catalyst for transformation

Why this workshop

AI is already embedded in everyday work—but in most organizations, it's still used for isolated productivity gains. This one day immersion helps leaders make a critical shift: from “AI helps me” to “AI transforms how we operate.”

Participants explore the **Frontier Firm mindset**, where people and AI agents work together to accelerate impact, innovation, and execution—and then **build real agents tied to real business priorities**.

What makes it different

This is not a lecture. It's a build day.

Participants don't just learn about agentic AI—they experience it by:

- **Building and testing an AI agent** using Microsoft tools
- Learning prompting *in context*, while creating real solutions
- Working in teams to prototype agents for real workflows
- **Demoing outcomes** in a live show and tell that reinforces learning

Who it's for

Designed for **business and functional leaders**, alongside their IT and AI counterparts, who want practical AI impact—without losing control of trust, data, and governance.

Ideal participants: C-suite and VPs, function and operations leaders, transformation owners, and IT/security partners responsible for scaling AI.

What You Will Walk Away With

A Catalyst mindset and shared playbook

A clear model for moving from personal productivity to enterprise execution

A working agent prototype

Built by your team, aligned to a real workflow, and ready to extend

A practical next-steps plan

Prioritized use cases, guardrails, and actions to move from pilot to scale

Key Benefits

- **Accelerate execution** by removing friction in critical workflows
- **Build trusted AI foundations** grounded in data quality, security, and governance
- **Turn curiosity into capability** through hands on learning
- **Create momentum and alignment** across business and IT

Sample 1-Day Flow

Morning: From Copilot to Catalyst keynote + real-world use cases

Midday: Hands-on lab—build your first agent (prompting included)

Afternoon: Team builds, demos, and a clear path to scale with confidence

Why AvePoint

AvePoint helps organizations **collaborate with confidence** by unifying data security, governance, and resilience through the **AvePoint Confidence Platform**—providing the trusted foundation required to deploy AI agents responsibly and at scale.

Ready to Turn AI Ambition into Action?

Let's deliver a **1 Day Agentic AI Immersion Workshop** tailored to your organization's priorities, workflows, and readiness goals.
