Quick approval process – within 5 working days upon submission of your use case.

Expert Support
AvePoint provides tech consultation and builds AI use cases to drive your business goals.

AI Solutions That Drive Real Business Impact

Explore a wide range of AI-powered solutions to streamline backend operations and enhance front-end experiences, helping your business work smarter, faster, and more efficiently.

Digital Assistant

AI-powered assistant that can handle employee or customer queries 24/7, integrated into web, mobile, or internal systems.

Business Value:

- Reduces response time and ensures instant, accurate answers.
- Frees up staff from repetitive inquiries, allowing them to focus on higher-value work.
- Scales easily without adding headcount, addressing staff shortages.

Document Management

AI-driven system that automates classification, summarization, and retrieval of documents (contracts, reports, HR files, etc.)

Business Value:

- Saves hours spent searching through files with smart search and auto-tagging.
- Reduces compliance risks by ensuring correct access control and retention policies.
- Automates document workflows (approvals, contract renewals).

Business Process Automation

Automation of repetitive, rules-based tasks across core business functions such as Finance, HR, Operations, and Sales.

Business Value:

- Improve operational visibility and responsiveness.
- Accelerate quote approvals, order tracking, and performance reporting.
- Streamline onboarding, leave approvals, and payroll.

Bring your ideas to life — the grant is flexible to support your business's AI vision. Register your interest today!
