Key Features

BYOI (Build Your Own Intranet) With Your Guideline & Branding

No coding experience? No budget? No problem! With built-in templates, rich web parts catalogue and dynamic previews, your team can deploy desired templates to your SharePoint site collections in minutes. Template can be customised and deployed across your intranet - maintaining the branding is never been easier.

Consistent & Streamlined User Experience for Everyone

Update on templates often causes cumbersome & repetitive individual configurations for each portal sites. With APM, you can bulk-update & manage everything at the same time with simple action with pre-approved & configurable web parts, streamlined page publishing processes. all the while reducing human error and workload.

Measure the ROI with Powerful Dashboard

View reports in different graphs based on different conditions to gain a comprehensive understanding of the visits & engagements in your portal sites. Intuitive graphic layout & dashboard reporting surface insights, driving ongoing portal improvement, to help your team to drive towards best outcomes.

Automate Intranet Management for Cost & Overhead Reduction

When integrated with AvePoint Cloud Governance, part of AvePoint Online Services, you can automate enforcement of policies, enable end user self-service for new portal sites adhereing to approval processes, at the same time mitigate any governance burden from IT departments.
