AvePoint®

Divide and Conquer Each *State Agency's* Requirements in Microsoft 365

Customise Microsoft 365 For Each Agency's Needs – On One Tenant

Leveraging a centralised solution across all state agencies is a widely accepted approach to IT. You can maximise IT investments, mitigate risk by ensuring broad state policy and streamline some operations. However, while these benefits are valuable, not all agencies are created equal.

Health Services handles sensitive information and requires a thorough review of membership and purpose of a new Teams channel, while Transportation has no restrictions and needs the ability to spin up a new Teams channel quickly. And both need to understand their allocation in Microsoft 365 to complete their budget for next year.

You try to accommodate everyone, but there are too many individual requirements. How will you strike a balance between the state and all the agencies?

AvePoint's solutions will empower you to meet every agency need:

Easily backup and recover data

Recover lost, deleted, or corrupt content at the agency level by trusted administrators. On-demand granular recovery manages conflicts to ensure the most authoritative copy is recovered without disrupting the rest of your tenant. Content is stored either in our unlimited secure storage in Azure or choose to bring your own storage (BYOS).

Gain visibility and control over license cost

Not sure whether you're under-or-over-assigned Microsoft 365 licenses? Having difficulty aligning your total license costs with each agency? Delegate control to agency budget holders to avoid IT bottlenecks. Gain insights and report on license consumption and associated costs, so you can better allocate licenses and create a budget and IT alignment.

Increase scalability with automated IT services

Decrease time-to-value for users while still ensuring agency-level policy and compliance requirements with automated workspace provisioning. In addition, combat sprawl with automated workflows recertifying collaboration spaces and the members within Microsoft 365.

> "*Without using Cloud Governance, the 500 active Teams we currently have would have taken up to 1,000 hours to create. Thanks to Cloud Governance, the 500 active Teams took only a total of 250 hours to create – a 75% decrease in time spent.*"
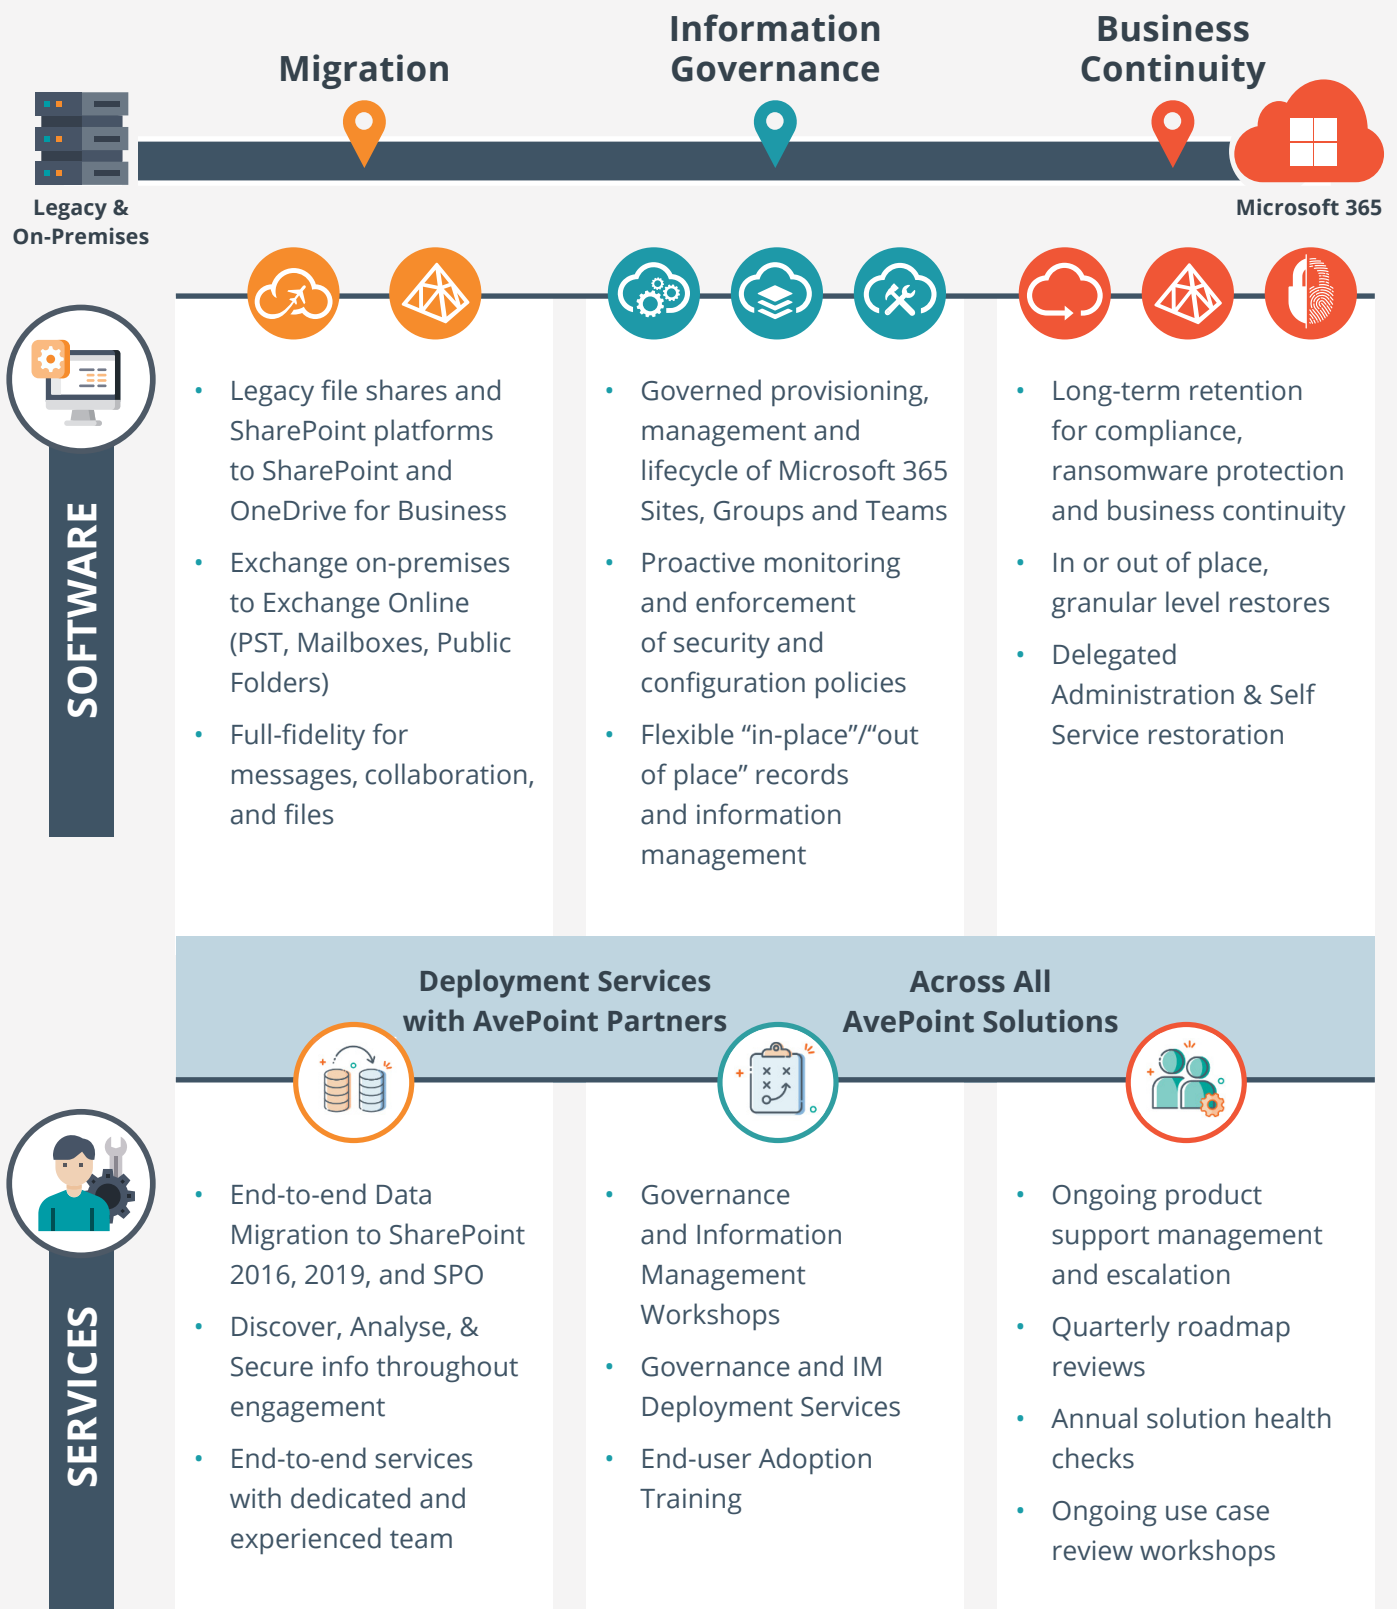

- Richard Maschwitz

Project Systems and Assurance Manager, Major Transport Infrastructure Authority

Legacy & On-Premises

Migration

Information Governance

Business Continuity

Microsoft 365

SOFTWARE

Migration
- Legacy file shares and SharePoint platforms to SharePoint and OneDrive for Business
- Exchange on-premises to Exchange Online (PST, Mailboxes, Public Folders)
- Full-fidelity for messages, collaboration, and files

Information Governance
- Governed provisioning, management and lifecycle of Microsoft 365 Sites, Groups and Teams
- Proactive monitoring and enforcement of security and configuration policies
- Flexible "in-place"/"out of place" records and information management

Business Continuity
- Long-term retention for compliance, ransomware protection and business continuity
- In or out of place, granular level restores
- Delegated Administration & Self Service restoration

SERVICES

Deployment Services with AvePoint Partners
- End-to-end Data Migration to SharePoint 2016, 2019, and SPO
- Discover, Analyse, & Secure info throughout engagement
- End-to-end services with dedicated and experienced team

- Governance and Information Management Workshops
- Governance and IM Deployment Services
- End-user Adoption Training

Across All AvePoint Solutions
- Ongoing product support management and escalation
- Quarterly roadmap reviews
- Annual solution health checks
- Ongoing use case review workshops
