# AI Evolution

	Predictive AI	Generative AI	Agentic AI
<b>Objective</b>	Forecast future events	Create new content	Perform tasks autonomously
<b>Main Technology</b>	Machine Learning (ML), Statistics	Deep Learning (e.g., Transformers, GANs)	Reinforcement Learning, Multi-modal AI
<b>Autonomy Level</b>	Low (requires human decisions)	Medium (creates but does not act)	High (makes decisions and acts)
<b>Example Use Case</b>	Predict stock prices	Generate images or text	Automate complex workflows

# Journey to the Frontier Firm

## PHASE 1

### Human with assistant

Every employee has an AI assistant that helps them work better and faster

## PHASE 2

### Human-agent teams

Agents join teams as “digital colleagues,” taking on specific tasks at human direction

## PHASE 3

### Human-led, agent-operated

Humans set direction and agents execute business processes and workflows, checking in as needed

A panoramic view of the London skyline at dusk. The sky is a mix of deep blue and orange from the setting sun. Several prominent skyscrapers are visible, including the Gherkin, the Shard, and the Walkie-Talkie. Many windows in the buildings are lit up, and construction cranes are visible in the foreground and midground.
