AvePoint | THE AI TRUST COMPANY

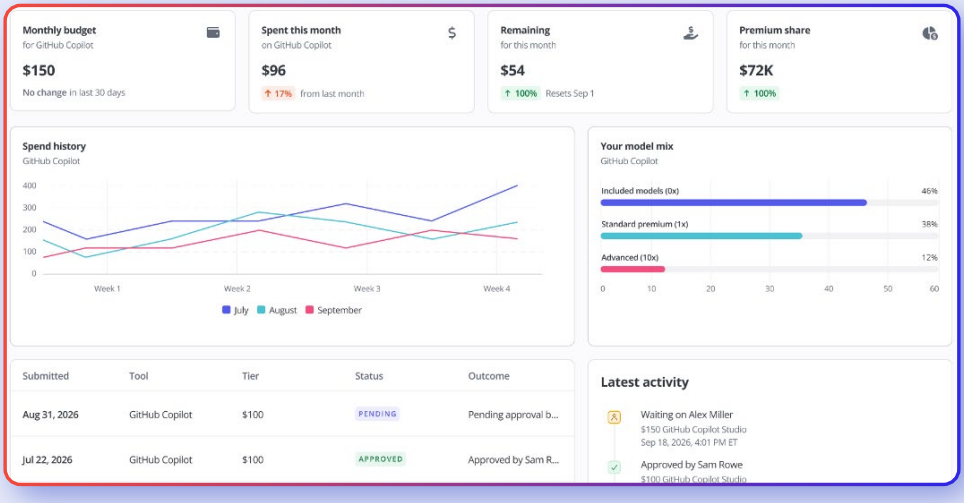

AI Cost & Optimization

Make Every Token Count

Full visibility into token consumption, structured budgets aligned with business outcomes, and prescriptive coaching to deliver ROI on your AI investment.

SEE EVERY DOLLAR YOUR AI SPENDS, BEFORE YOUR CFO ASKS

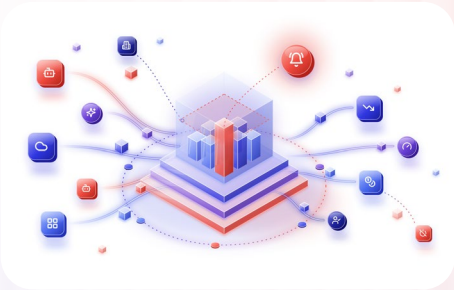

Copilot licenses. Tokens. Agent workflows. Third-party LLM subscriptions. Every department is adopting AI on its own timeline, and none of it rolls up into one number your CFO can trust. AvePoint's AI Cost & Value Optimization approach unifies spend data across Microsoft, Google, and more into a single dashboard, along with usage and adoption, so IT and finance can finally answer the question that matters: what are we actually paying for AI, and is it working?

"93% of organizations are exceeding their AI budgets."

MCKINSEY, HOW CIOS CAN MANAGE AI DEMAND AT SCALE

AI Cost & Optimization

One Dashboard for Every AI Dollar

Track usage, cost per agent, and spend trends across your entire AI estate, not just the platforms with built-in analytics. The spend management dashboard covers Microsoft, Google, and other AI vendors in one place, so nothing hides in a departmental budget line.

Alerts and Nudges before Costs Spiral

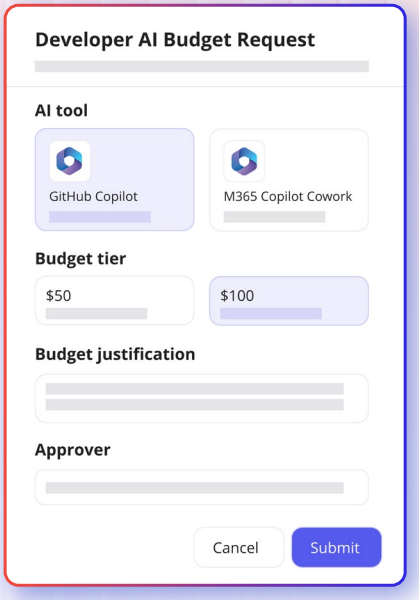

Get notified the moment spend crosses a threshold or usage patterns look off. Configurable nudges steer teams toward lower-cost alternatives and better usage habits, before a runaway agent or an unused license becomes next quarter's surprise.

Recommendations You Can Act On

AI Cost Optimization doesn't stop at reporting. It surfaces where spend can be reduced, right-sized, or eliminated based on real usage patterns, and connects that spend data to governance, so a high-cost agent gets flagged for policy, not just budget.

Budget Management

Allocate license and token budgets by department, region, or business unit, and give each one real-time visibility into what they're spending against what they're allowed. When a team needs more, they can request it directly, with proper approval routing instead of a side conversation with IT.
