AvePoint | THE AI TRUST COMPANY

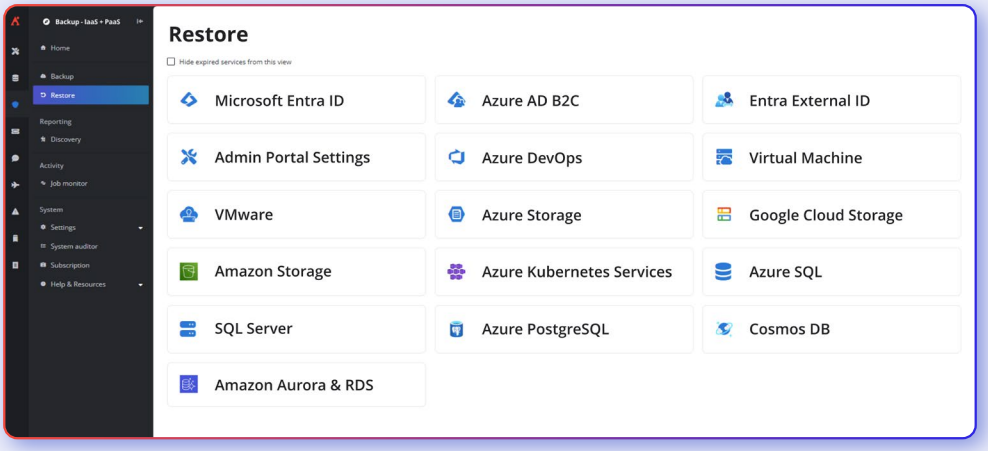

Identity & Infrastructure Protection

Protect the infrastructure powering AI

Rapid recovery of human and non-human identities, enterprise app governance and accountability, and predictable infrastructure backup to secure AI's operating layer.

YOUR DATA MAY BE GROWING, BUT YOUR BACKUP BILL DOESN'T HAVE TO

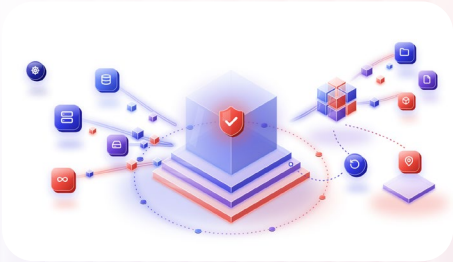

Eliminate the storage fees, data-growth penalties, and fragmented licensing that make infrastructure protection difficult to forecast. AvePoint replaces that uncertainty with a singular user-based licensing model, helping CFOs protect infrastructure across Azure, AWS, and Google Cloud while maintaining greater cost control and forecast accuracy. Replace cost guesswork with a predictable, scalable backup model.

"Unpredictable cloud backup costs are driving many heads of I&O to reevaluate how they're protecting data stored in cloud infrastructure as a service (IaaS) and platform as a service (PaaS)."

MARKET GUIDE FOR CLOUD BACKUP | GARTNER

TRUST AT SCALE

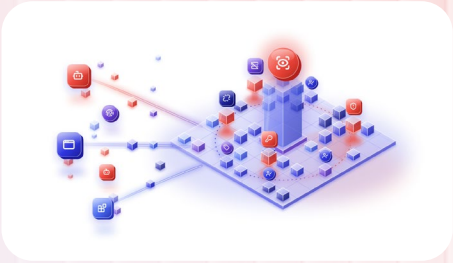

Keep Your Azure Infrastructure Running

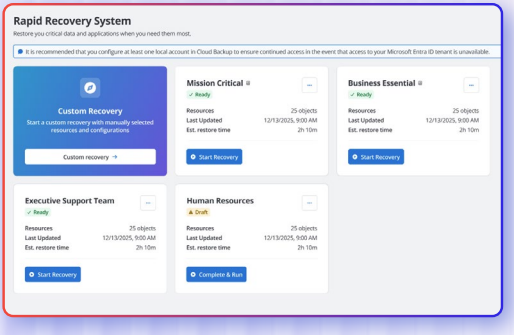

Backup compute, databases, storage, Kubernetes, and DevOps with flexible recovery from complete workloads down to individual files, folders, and objects. Recover in place or to alternate locations, with customizable retention and storage options to meet everyday recovery and broader resilience requirements.

Prevent Enterprise App Sprawl

Gain centralized visibility into enterprise apps and registrations, assign accountable owners, and maintain critical business context. Continuously identify orphaned apps, risky permissions, expiring credentials, and unmanaged service principals, to prevent unintended risk from AI agent and platform sprawl.

SPEED WITHOUT COMPROMISING VALUE

Multi-Cloud Flexibility

Cloud infrastructure protection engineered for absolute predictability and scale across Azure, AWS, and GCP. Eliminate billing surprised with intuitive licensing based on users, not complex backend storage consumption per platform.

Express Recovery

AvePoint's Entra Express Recovery powered by Microsoft Entra Backup and Recovery brings back your critical Entra ID objects to a known-good state. Coming soon, utilize preset recovery profiles and intelligent recommendations to prioritize recovery and quickly stabilize operations.
