

ACCELERATE MICROSOFT 365 ADOPTION

AvePoint facilitates sustainable adoption for companies around the world by creating fluent, confident, and self-supporting Microsoft 365 users – we're proud to have helped over 9 million people in this way already, and that number is growing every day.

Whether you are planning a migration to Microsoft 365 or have been using Microsoft 365 for awhile, getting the business to use, understand and implement these tools is a challenge.

Common issues that organisations face are:

- Higher than expected help desk call volume
- User complaints
- Users are confused and do not know what to use when
- Users still dependant on the old system and haven't embraced the new way of working
- Digital collaboration is still poor and highly dependent on Exchange and Teams meetings
- IT lack of training to fully understand the potential of M365 to raise productivity and collaboration within a business

Jumpstart your Microsoft 365 user adoption today.

What is included in the jumpstart package

Discovery phase

- Discovery Phase includes interviews with business stakeholders to explore data ownership and ways of working today across teams and within the department
- A clear plan to communicate the value of the new platform and how it will benefit the workforce
- Custom communications package to help raise awareness and engagement

Comm-unication plan

End User training plan

Champions Plan

Continuous Learning support

- End users training via custom training videos for your business*
- Train the champions so you have an inside team resource to support user adoption*
- Access to 1000 + bite sized learning content for Microsoft 365, including a learning and development platform integrated with Microsoft Teams*

Business outcomes for your employees & organisation

Unlocks the value of Microsoft 365 by increasing usage across the entire suite and ensures a return on your Microsoft 365 investment across roles and departments.

Empower your employees to be confident in their new digital skills and enable a workforce with the Microsoft 365 skills they need to raise their productivity and collaboration.

Terms and conditions
