No appliances, no limits, no worries backup for Microsoft Azure and Amazon Web Services

bud Backup

Cloud Backup for Microsoft Entra ID(Formerly Azure AD), Azure VMs, Azure Portal Settings, Azure Storage and Amazon AWS EC2 Instances

👗 AvePoint

For laas + Paas

One Vendor for SaaS, laaS and PaaS Backup •

Purpose Built for IaaS and PaaS

Worry-Free Backup

Backup on Your Terms

Unlimited backup for Microsoft Entra ID, Azure VMs, Azure Portal Settings, Azure Storageand Amazon EC2 Instances from the same vendor that protects your business critical SaaS applications like M365 and Salesforce.

Recover in minutes and with application and machine awareness. This is true laaS and PaaS Backup and Recovery. Automatic backups up to four times a day and with unlimited retention plans. Choose AvePoint managed storage or bring your own storage (BYOS)

Incorporate Cloud Infrastructure and Platform Backup into your disaster recovery plan.

Organizations and employees continue to navigate the shifting challenges presented by hybrid work and moving to the cloud. The productivity tools and processes intended to enhance the quality and effectiveness of collaboration may potentially introduce vulnerabilities either through human error or malicious attack. As teams continue the transformation into the Modern Workplace, organizations can mitigate risk by protecting their users and business critical applications by incorporating AvePoint's IaaS + PaaS backup solution into their disaster recovery plan.

COMPREHENSIVE BACKUP

- Near-zero configuration
- Up to 4 backups per day (or every 6 hours)
- Protect Microsoft Entra ID (formerly Azure AD), Azure (VM, Portal Settings + Storage) and Amazon EC2 Instances.
- Built-in business rules and filters enable you to quickly choose which objects you want to backup.
- Store backups securely outside your Azure subscription in our hosted scalable storage with minimal configuration or in your own private cloud.
- Identify unprotected and vulnerable cloud resources
- Our central command dashboard provides job status, storage consumption, and more across all your protected cloud workloads

GRANULAR RESTORE

- On-demand, granular recovery of Microsoft Entra ID (formerly Azure AD), Azure Virtual Machines, Azure Blobs/Files Storage, and Amazon EC2 instances.
- Choose to restore the backup data to the original or an alternative location via the Export feature. Even a different Azure subscription.
- Compare backup data with your production Microsoft Entra ID or compare between two different backups. Identify any gaps or changes to quickly recover from your backups.
- Recover quickly with time-or-object-based restores.
- Granularly restore settings and preserve your data.
