# Cloud Backup

For Multi-SaaS Data Protection

The ultimate solution for protecting your valuable data across multiple software-as-a-service (SaaS) applications.

## Multi-SaaS Backup & Recovery

### Comprehensive Backup

An unlimited backup service for your business-critical collaboration within Microsoft 365, Azure, Dynamics 365, Google Workspace and Salesforce.

### Recover in Minutes, Not Days

Without having to pick up the phone, schedule restore windows, or perform site-level rollback, easily restore your applications to ensure your data is back where it belongs in no time.

### Worry-Free Backup

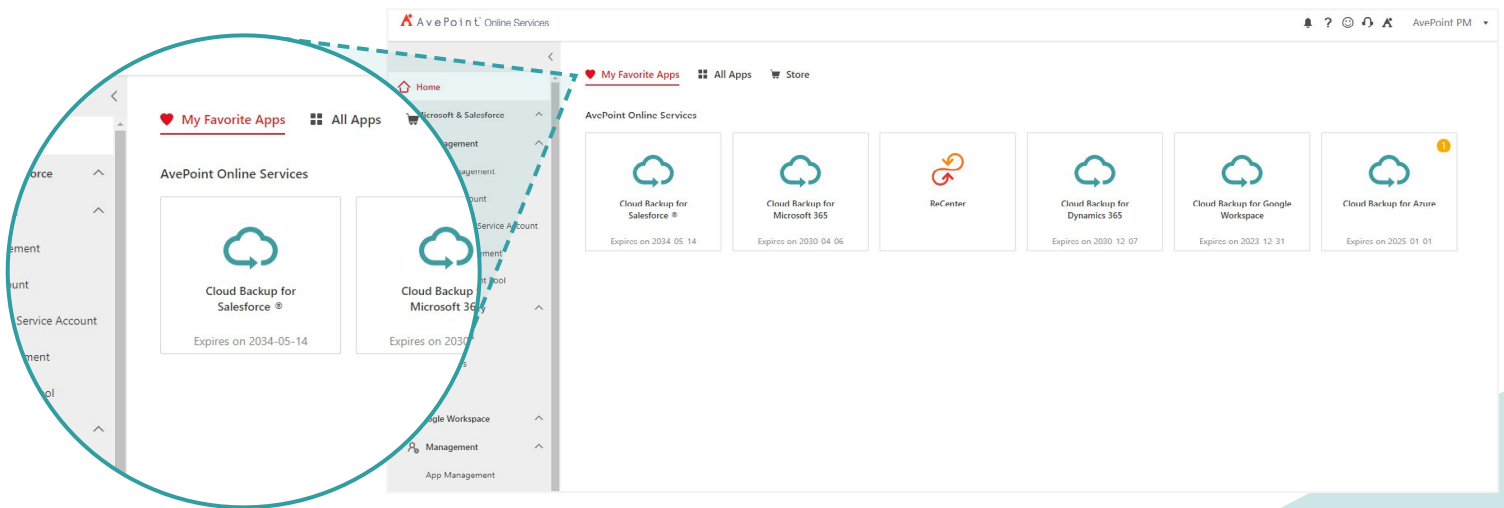

We run automatic backups up to four times a day and retain 100% of your data. Unlimited backup subscriptions give you the flexibility you need, and the protection you want.

### Backup on Your Terms

Choose our scalable Azure Storage, or for some sources, an AWS option is also available. You can also choose to store your backup data in your private cloud or in a data center of your choice.

## A comprehensive backup solution for cloud-to-cloud data protection

AvePoint Cloud Backup is the industry's most complete cloud-to-cloud backup solution for [Microsoft 365](#), [Azure](#), [Dynamics 365](#), [Google Workspace](#) and [Salesforce](#). With unlimited, automated backups, and secure storage options provided by AvePoint or your own cloud, you just decide how much to recover, and when. On-demand and granular, item-level restore across your applications provides anytime access for your business-critical content or CRM data. Help connect your users with their lost data by self-service, automatic restore with ReCenter.

### COMPREHENSIVE BACKUP

- Near-zero configuration for daily backup plans and target protection is up to 4 backups per day that will automatically optimize resources for the best throughput and avoid throttling from your SaaS vendors.
- Built-in business rules and filters enable you to quickly choose which content you want to backup.
- Store backups in our scalable Azure Storage with minimal configuration (AWS option available for some sources), or in your cloud or data center of choice with support for Microsoft Azure, Amazon S3, Dropbox, and any data destination accessible via Secure File Transfer Protocol (SFTP), File Transfer Protocol (FTP) and any S3 compatible storage.
- Further safeguard your data from cyberattacks or leakage by bringing your own Microsoft Azure Key Vault Encryption Key to meet compliance regulations around sensitive data.
- Be in control of your data with GDPR capabilities to search and remove content on demand.
- Our backup engine fully complies with industry standards, including ISO certifications, demonstrating our commitment to AOS and ensuring the highest level of data protection.

### GRANULAR RESTORE

- On-demand, granular recovery of content to the online or offline storage location of your choice while maintaining all metadata and permissions.
- Granular restore means more than just restoring an individual document or version—perform security roll-backs to undo unintended permissions changes.
- Restore content and conversations out of place to other environments, workspaces, and sites etc.
- Export and restore your content to its native file format, allowing you to access it offline, providing you with the flexibility to work anywhere and at any time.
- Recover quickly with “search first” capability allowing you to discover user content across workspaces.
- Delegate and empower content owners with a self-service tool to easily locate and restore lost content.
- Monitor your daily changes, detect unusual activity as well as potential ransomware attack events at an early stage, investigate the issue preemptively, and quickly restore from a good backup point with ease.
