

**Collaborate in confidence with AvePoint's modern, intelligent virtual data room.**

## Confide for Microsoft 365

### Support and Secure Collaboration

Rest easy knowing your most sensitive data is being shared as intended. Confide's simple, powerful controls allow business leaders to manage project-specific sharing quickly and accurately. With granular permissions and visibility into audit trails, you can be confident that your data is secure. Assign and manage project-specific tasks with secure, in-line communications.

### Drive Ease and Efficiency

Hosted within your own Microsoft 365 tenant, Confide is a low-friction, highly secure collaboration platform. As hyper-sensitive projects emerge, quickly spin up a new workspace to suit the security needs at hand. Unlike many other virtual data rooms, Confide does not require your IT department to enable external M365 access, which means it's easier than ever for guest users to collaborate securely.

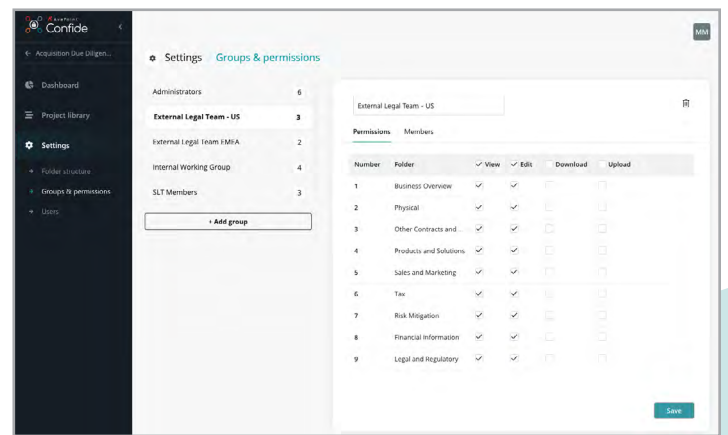

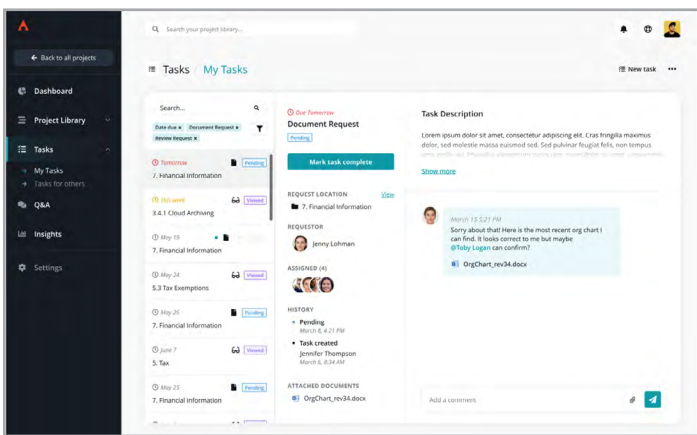

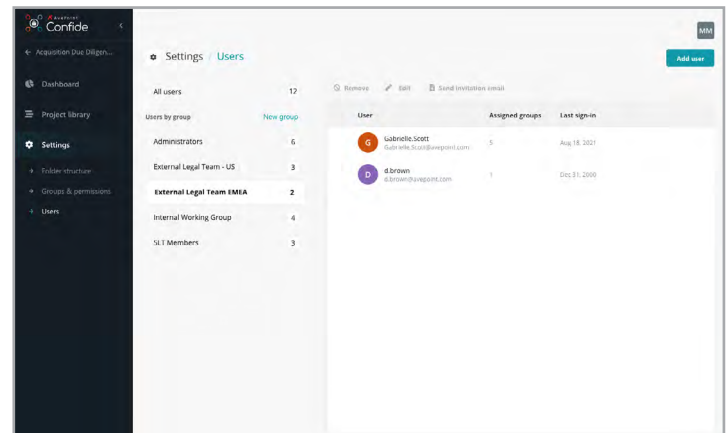

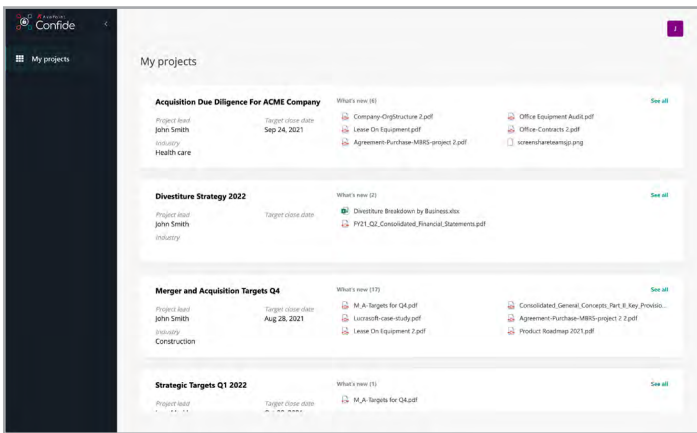

### Monitor Real-time Insights

Optimize your most sensitive projects with real-time insights and intelligence to help you make strategic decisions. Whether one project or ten, Confide's centralized dashboard offers an easy way to access high-level metrics for all active projects. Drill down into individual projects to monitor user activity, project engagement, and more.

### When everything is on the line, you can trust in Confide.

Enterprise data security is always a top concern, but when you're working on hyper-sensitive projects such as mergers and acquisitions, audits, IP management, and more, the stakes are that much higher. Any security breach could be catastrophic. So how can you enable cross-functional teams—both internal and external—to collaborate securely? Confide can help.

Provision and manage virtual project spaces that provide full control and transparency to specific business users or groups. Monitor key metrics and activity across multiple projects from one centralized dashboard. Secure critical project workflows with in-line task management and communications. Take advantage of real-time insights to optimize project workflow and inform strategic decisions.

- **Permissions** – Quickly set up granular, custom permission levels. As needs change, easily downgrade, change, or remove users.
- **Security controls** – Ensure data is being shared as intended by using Confide’s simple and streamlined effective controls.
- **Locally hosted** – Keep your most important data close to home with a locally hosted solution that sits within a walled off section of your own Microsoft 365 tenant.
- **Low-friction** – Pave the way for seamless external collaboration, with no need to enable external Office 365 access. Outside organizations whose security settings block external Office 365 will have no trouble accessing Confide.
- **Task management** – Create, assign, and manage project-specific tasks with secure, in-line communications.

- **Intuitive interface** – Set up and manage your project with intuitive wizard-style workflows and drag-and-drop.
- **Custom folder structure** – Build your Project Library to meet specific needs, with fully customizable folders and subfolders. Easily update your structure to meet changing needs.
- **Centralized dashboard** – Monitor multiple active projects at a glance, keeping an eye on key metrics and recent activity.
- **Real-time insights** – Drill down into individual projects to monitor user activity, project engagement, file/folder consumption, project health, and more.
- **Workflow shortcuts** – Quickly view newly posted materials and easily jump back to the active files you’ve been reviewing.
