

Microsoft 365 Baseline Management for MSPs

Secure every tenant, every time—automatically. AvePoint Elements Baseline Management empowers MSPs to define, enforce, and restore secure Microsoft 365 configurations across all clients. Whether you're onboarding, auditing, or scaling, it transforms policy governance from manual and reactive to automated and strategic.

Key Capabilities & Use Cases

Create & Manage Baselines

- Use trusted templates to onboard clients faster and reduce setup errors.
- **Result:** 60% faster onboarding with compliance built-in.

Apply Baselines at Scale

- Enforce security settings (e.g., MFA, sharing policies) across tenants with one click.
- **Result:** Save hours and reduce human error.

Spot and Fix Changes

- Real-time alerts for policy drift or risky changes.
- **Result:** Fewer incidents, stronger compliance, and proactive support.

Rollback Instantly

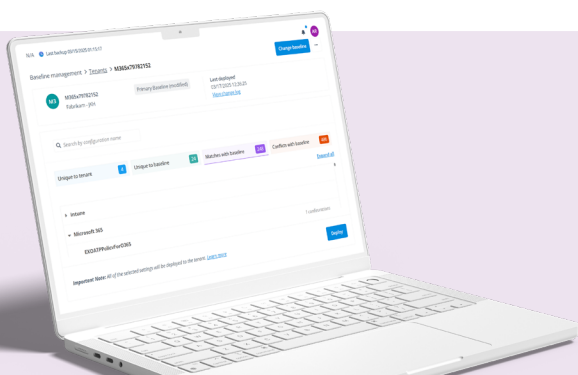

- Restore known-good configurations in one click.
- **Result:** Avoid downtime, escalations, and SLA violations.

Audit & Report

- Deliver monthly reports to show value and prove policy enforcement.
- **Result:** Improved renewals, client trust, and differentiation.

WHY IT MATTERS TO MSPS

- **40% more revenue:** Package compliance as a premium service.
- **85% less manual work:** Automate drift correction and enforcement.
- **Higher retention:** Prove value with reports and consistent security.
- **Faster onboarding:** Shorter time to invoice and value.
- **Operational scale:** Serve more clients without more staff.
