

Risk and Change Management

Risk & Change Management for MSPs

Proactively manage risk, automate compliance, and guide change across every Microsoft 365 tenant—all from the Elements Platform. AvePoint Risk & Change Management gives MSPs the tools to identify threats, enforce policies, and streamline change events, ensuring secure, resilient environments with less manual effort.

Risk & Change Management Key Capabilities & Use Cases

Automated Risk Detection

- Continuously monitor for misconfigurations, policy violations, and risky behavior across all tenants.
- Result: Early identification and remediation of threats before they impact clients.

Policy Enforcement & Compliance Automation

- Apply policy templates and automate compliance checks with alerts and reporting.
- Result: Simplified audit readiness and reduced manual work.

Change Management Workflows

- Track and govern onboarding, offboarding, and change requests with approval workflows and audit trails.
- Result: Accountability and control over every change event.

Centralized Visibility

- Gain a unified dashboard for risk posture, compliance status, and change tracking across environments.
- Result: Faster response to incidents and improved operational efficiency.

Integrated with Elements Modules

- Works seamlessly with Baseline Management, Workspace Management, User & Device Management, License Optimization, and Marketplace Integration.
- Result: Comprehensive governance and risk mitigation as part of every service package.

Why It Matters to MSPs

- Reduce manual effort and administrative overhead with automation and centralized controls.
- Accelerate onboarding and change management for faster, safer service delivery.
- Improve compliance and reporting with audit-ready documentation and insights.
- Scale operations efficiently to support more clients without increasing staff.
- Strengthen renewal and upsell conversations by delivering ongoing risk and change insights.
