

Microsoft 365 Workspace Management for MSPs

AvePoint Elements Workspace Management brings order to Microsoft 365 collaboration with automation, compliance, and AI readiness. Designed for Managed Service Providers (MSPs), it offers centralized control, lifecycle automation, and actionable insights to optimize client environments at scale.

Key Capabilities & Use Cases

Automated Provisioning

- Auto-create Teams/Sites using templates and policies.
- **Result:** Saves admin time and ensures naming/security standards.

Compliance Enforcement

- Auto-apply sensitivity labels, retention policies, and sharing rules.
- **Result:** Reduce risk of violations and improve governance.

Lifecycle Management

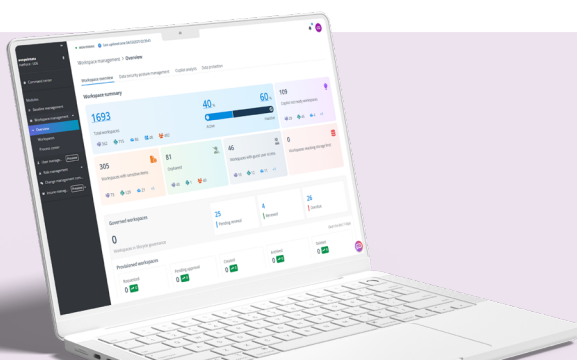

- Auto-archive or delete inactive workspaces.
- **Result:** Prevent sprawl, save storage costs, and optimize AI results.

Centralized Oversight

- Multi-tenant dashboard shows risk, compliance, and ownership.
- **Result:** Manage all customers from one interface.

AI Readiness

- Insights on labeling, permissions, and content quality.
- **Result:** Prepare environments for Microsoft Copilot and secure AI adoption.

WHY IT MATTERS TO MSPS

- **New revenue:** Upsell premium governance and compliance services.
- **Less support:** Fewer tickets thanks to automation and self-service.
- **Stronger compliance:** Clients stay audit-ready without manual effort.
- **Happier clients:** Clean, secure environments boost satisfaction and loyalty.
