Advanced Multi-Tenant Management for Microsoft 365, Dynamics 365, Salesforce and Google Workspace Managed Service Providers

AvePoint Elements modern multi-tenant management provides MSPs with the ultimate recipe for expansion and retention with unique capabilites to empower your business.

The Challenges MSPs Face

Scaling your managed services in today's competitive environment is a juggling act - managing thousands of security and compliance settings spanning across multiple admin centers and hundreds of screens presents an ongoing challenge to set proper settings, scale these across customers, identify any deviations, and take action to remediate.

These challenges are compounded by the need to keep up with frequent and unannounced updates from Microsoft, changes in the market and regulatory landscape, and the constant demand from customers to do more with less.

That's Why We Transformed Technology for MSPs

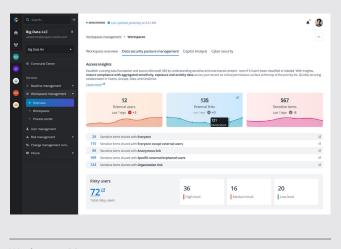

AvePoint Elements modern multi-tenant management provides MSPs with the ultimate recipe for expansion and retention with unique capabilities to empower your business. Set baselines with drift monitoring, implement workspace governance with security, access, data management, and copilot reporting, monitor and manage risks, and communicate changes with your customers' users - all within the Elements platform.

Baseline Management Dashboard

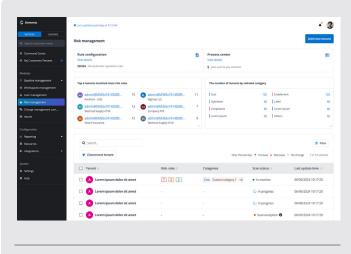

Baseline Management creates and customizes baselines from existing tenants or out-of-the-box templates for centralized and simplified management of security and compliance settings. Proactively manage configuration drift to ensure multi-tenant consistency and promptly remediate deviations, and point-in-time backup and restore of tenant configuration and settings.

Workspace Management for Microsoft Teams, Groups, and SharePoint Online, with security, access, data management, and Copilot reporting.

Scale governance of your customers' digital workspaces using a streamlined, MSP-tailored solution that offers insights, controlled self-service provisioning, and templated policies to manage workspace lifecycle and governance efficiently across customer tenants.

Risk Management

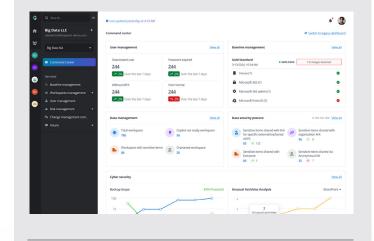

Risk Monitoring protects your clients' environments with proactive tenant security monitoring. Enforce security rules, quickly address potential risks, and rapidly resolve issues in Elements or notify users to take action.
