

# Embedded Analytics for SharePoint

## In-Product, In-Context, and In-Time

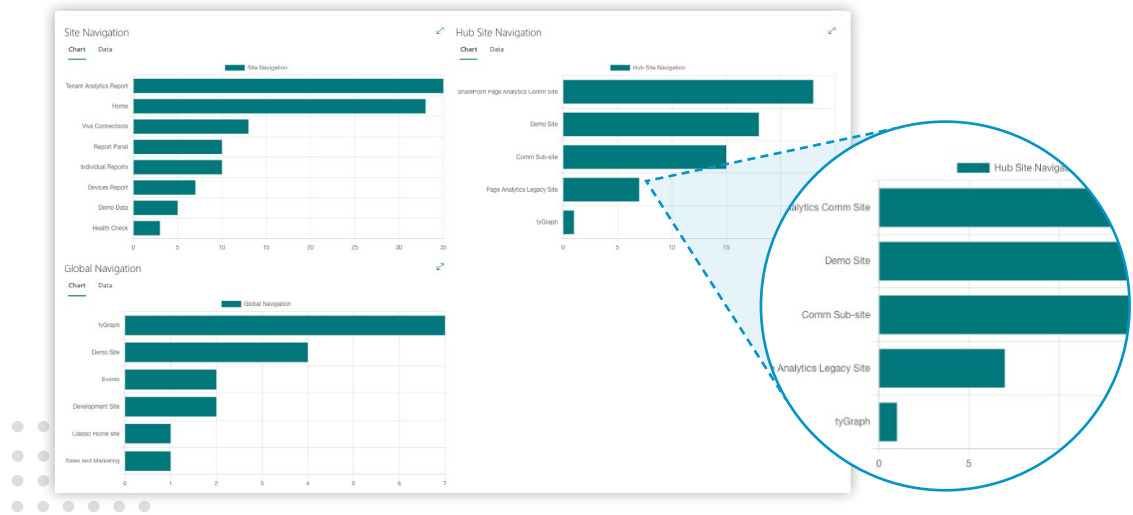

### Delivery & Configuration

- **In-Product Analytics** - View reports directly in SharePoint with web parts and a Report Bar.
- **Report Bar** - Use the Report Bar to view page reports from any SharePoint page.
- **Report Panel** - Understand page performance such as read percentage and time on page, directly from that page.
- **Web Part** - Empower site owners with the analytics they need, choosing from a library of available reports.
- **Configuration** - Sign up, install, and configure to get up and running quickly.

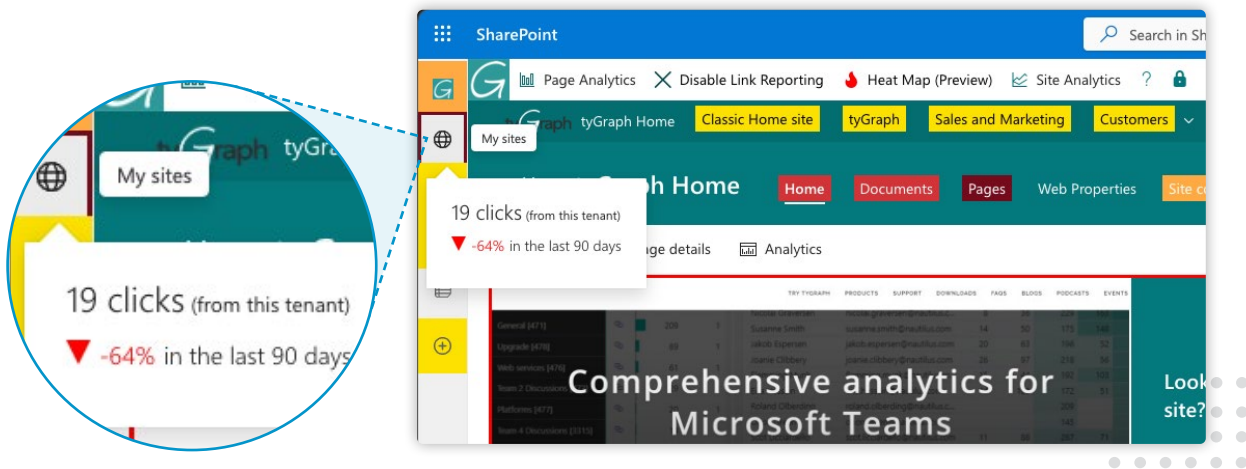

### Features

- **Navigation Reporting** - Understand the performance of navigation at the site, hub site, or global navigation level.
- **Site owner reporting** - Empower your site owners with reports tailored to their specific site.
- **Historical Data** - View up to 365 days of history, data volume permitting.
- **Page Clicks** - Identify what users have clicked on in any SharePoint page.
- **Data Obfuscation** - Choose whether to obfuscate user data, based upon your requirements.
- **Publish Dates** - Choose a specific date to identify which pages were published within that timeframe.
- **Page Engagement** - Track engagement using page likes and comments.
- **Viva Connections Adoption** - Measure your organization's adoption of Viva Connections.
- **Viva Topics Usage** - Discover how Viva Topics are interacted with on a page.
- **Embed as Teams Tab** - Embed Site Analytics as a Team Tab to share reports with your team.

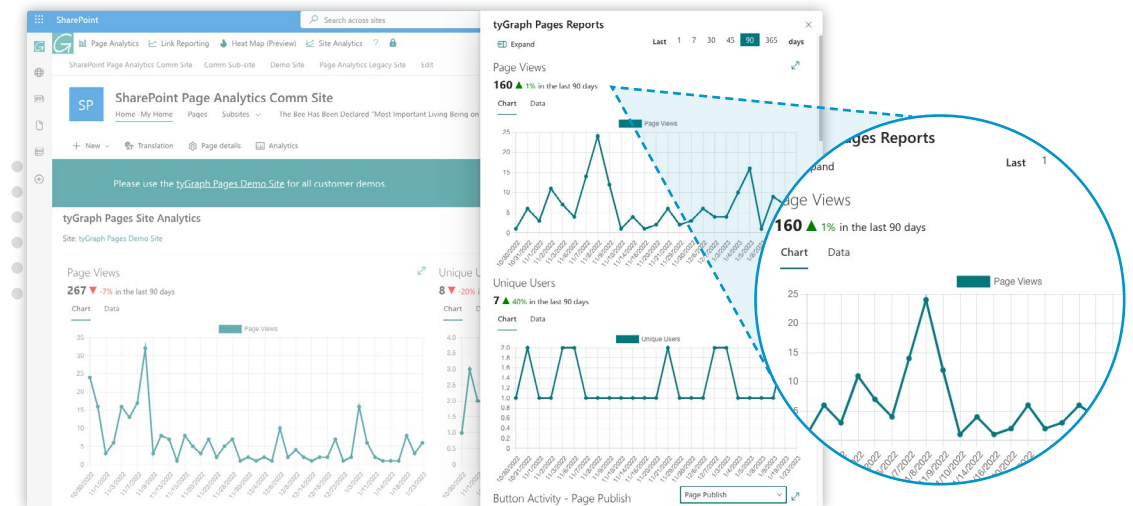

## Report Bar

- **Link Clicks** - Hover over a link to view how many times that link has been clicked.
- **Heat Map** - Easily see which links are clicked most frequently, with color-coded heat mapping.
- **Site Analytics** - Launch Site Analytics from the Report Bar on any page.

## Report Panel

- **Page-Level Metrics** - Launch the Report Panel directly from any SharePoint page to view that page's performance.
- **Performance Metrics** - Quickly review key metrics, such as read percentage, page load time, and time on page.

## Web Part

- **Select Your Scope** - Choose whether to generate reports at the site, hub site, or tenant-level.
- **Permissions** - Decide whether to allow users to change the site / hub site scope. Disable the use of filters and toggles in the Site Analytics web part.
- **Date-Based Filters** - Filter report data by a specific number of days, up to 365 days (data volume permitting). Select a start and end date to filter report visuals.
- **Full Screen View** - Expand visuals to the full width of your browser to zoom in on data.
- **Customized Display** - Choose from a library of prebuilt report visuals, including:
  - **Site Analytics** - Site usage, top pages, and top news
  - **Navigation** - Site, hub site, and global navigation
  - **Devices** - Browsers, devices, and operating systems
  - **Viva Connections** - Viva Connections adoption
