SHAREPOINT RECORDS MANAGEMENT

As a mission-critical collaboration platform and document repository, SharePoint often holds vital information and records that must be managed in a compliant, efficient, and secure manner. Improved collaboration and document management, however, increases the risk of inappropriate use and non-compliance to policies and regulations. AvePoint's DocAve Vault delivers the tools necessary to satisfy all records management policies and auditing requirements in addition to securely storing all records to report on and audit data with ease.

TECHNICAL OVERVIEW

- Export SharePoint content with full fidelity, including security settings and metadata, to Autonomy or Concordance compatible formats for further legal review
- Granularly export SharePoint content with DocAve Vault's flexible filter for site collection, item, and document metadata
- Schedule periodic data retrieval and export in order to keep records up to date while ensuring minimal impact to your SharePoint production environment
- Store exported data in file shares, storage area networks, or network-attached storage
- Automatically send email alerts to stakeholders to review the exported records
