AvePoint® DocAve® 6

DOCAVE SHAREPOINT MIGRATOR
FOR MICROSOFT® SHAREPOINT® MIGRATION

Migrate. Quickly consolidate enterprise content from previous Microsoft SharePoint versions into Microsoft SharePoint Server and SharePoint Online.

KEY BENEFITS

PRODUCTIVITY IMPROVEMENT	BUSINESS CONTINUITY	FLEXIBLE MIGRATION AND SCHEDULING	HIGH SPEED MIGRATION TO OFFICE 365
Minimize the effort required to upgrade SharePoint by automating content migration from source SharePoint 2013, SharePoint 2010, and 2007 instances to SharePoint Server or SharePoint Online sites.	All folder structures, document properties, and associated metadata – as well as permissions and access control – are retained with full fidelity. Information critical to the business is kept intact throughout the transfer.	Empower administrators to plan migration jobs according to business needs with granular or bulk content migration as well as flexible job scheduling.	Migrate large quantities of content from previous versions of SharePoint to Office 365 up to ten times (10x) faster than before, while ensuring full fidelity around your content .

MIGRATION TO SHAREPOINT MADE EASY

With DocAve SharePoint Migrator, administrators can perform full-fidelity content migration from previous versions of SharePoint to SharePoint Server 2016, SharePoint Server 2013, and Office 365 – SharePoint Online. DocAve's efficient and reliable data transfer is unique in its ability to migrate content while retaining all of the associated metadata, enabling organizations to maximize their return on investment and gain more value from Microsoft's latest release. And with High Speed Migration for Office 365, you can make the transition into Office 365 quickly and efficiently, making cloud-based productivity a reality.

TECHNICAL OVERVIEW

- Delegate migration plan management based on administrative roles
- Scan source content prior to migration to identify the scope of migration, and detect any illegal characters, user permissions, user names, user domains, and other elements that must be mapped in order to migrate successfully into SharePoint Server or SharePoint Online
- Selectively migrate content according to business needs with granular content selection as well as customizable filtering options based on content properties or item counts, and perform test runs to validate migration plan configuration
- Perform multi-thread content uploads directly to Azure through Azure Express Route
- Run 2007, 2010, and 2013 High Speed Migration jobs in Offline Mode to import discs to Azure, or in Online Mode, to import directly to Azure across live networks
- Support Security Trimming to empower eligible users to perform migrations within allowed scopes
- Migrate Managed Metadata with flexible options to migrate an entire Managed Metadata Service, specific term sets and all of the terms within them, or the granular terms and their parents associated with the source content
- Perform full and subsequent incremental migrations to keep network bandwidth resources optimized, only migrating content that has been updated since the last migration
- Bring your own Azure storage, or let DocAve automate the creation, encryption, and disposition of temporary Azure storage required for High Speed Migration at no extra cost
- Automate construction of your new SharePoint environment on-the-fly during your migration
- Preserve all metadata – including security settings, attributes, and properties – with full fidelity, utilizing customizable mappings to properly represent legacy elements and quickly take advantage of the features in the latest version of SharePoint
- Migrate workflows – including those created with SharePoint native functionality, SharePoint Designer, and Nintex
- Migrate actions – including user alerts, customized forms, views, and InfoPath forms – to Office 365 – SharePoint Online
- Create dynamic rules based on out-of-the-box interfaces to customize mappings and filter policies in order to meet specific business needs, including the ability to create new Managed Metadata in the destination
- Migrate online over existing networks, or offline to securely migrate data across firewalls
- Keep source and destination environments in sync with customizable scheduling to minimize business disruption throughout the course of the migration project

*To migrate content within or across SharePoint environments of the same version, use DocAve Content Manager.

Point-and-click migration simplifies the transfer of content into SharePoint.
